

NextGen Leaders Workshop
Accelerating Advocacy & Accountability for Non-Communicable Diseases in East Africa

May 5-7, 2017

Kigali, Rwanda- Hotel La Palisse

Summary

On May 4-7, 2017, the Young Professionals Chronic Disease Network (YP-CDN) and RTI International will host our second NextGen Leaders for Noncommunicable Diseases (NCDs) workshop in Rwanda. Launched at the first workshop in Nairobi in September 2016, the NextGen Leaders program seeks to build capacity and leadership among aspiring advocates and policymakers in the field of NCDs by delivering skills, knowledge, and networks to improve NCD prevention and control. During this workshop in particular, participants will learn skills and create strategies to build accountability of governments and other stakeholders to deliver on their national commitments for NCDs, looking toward the 2018 UN High-level Review on NCDs. Hosting the NextGen Leaders workshop in Rwanda, a country that has demonstrated leadership on NCDs in the region in recent years, is an excellent opportunity for young professionals to come together to drive progress on NCDs.

Rationale

The world urgently needs skilled leaders in all corners of the globe who know how to respond to the devastating impacts of non-communicable diseases, such as cancer, diabetes, cardiovascular disease and mental illness, at community, national and international levels. Particularly in low-and middle-income countries, there is a paucity of interdisciplinary training opportunities and mentorship to prepare the next generation of health leaders to drive the necessary changes on NCD prevention and control, as envisioned in the Sustainable Development Agenda.

About the NextGen Leaders program

Young professionals and trainees in the health sector in East Africa will be equipped with skills to collaborate across sectors, learn research and policy skills, and how to communicate research to inform better health policies in their countries. Workshops, training materials, dedicated mentorship and practical experience placements within key NCD policy and research institutions will equip these emerging leaders with the tools to lead NCD research and policy initiatives, as well as provide opportunities for dialogue and learning across cities and countries. The diverse network of experts at RTI International and YP-CDN's strong reputation NCD policy influence worldwide, the NextGen Leaders program is uniquely positioned to provide training and opportunities to young talent to impact global NCD goals.

Goals of the program

- To build the capacity of Young Professional (YP) leaders for improved NCD advocacy, research and policy influence at sub-national, national, regional and global levels.
- To nurture and implement opportunities for collaboration between RTI, YP-CDN and partners across the globe that further national and global NCD goals.

Workshop Objectives

- Bring together 50 young advocates from across East Africa to learn from experienced advocates and experts, and to jointly develop a East Africa regional NCD accountability initiative/campaign across 6 YP-CDN Chapters leading up to the 2018 United Nations Review on NCDs
- Provide overview and discussions on NCD policy, research and progress in the East African region to set the stage for participants on current situation and future opportunities for influence at local, regional and global levels
- Train participants on advocacy and policy influence, accountability initiatives, leadership and organizing, grant writing, and best practices for using existing NCD research

AGENDA

Friday, May 5
