

Friend—

We are hosting a conversation Saturday, May 11 on how to get to 100% clean, renewable energy (and the role neighborhood councils can play in the transition). Please join us for what is bound to be a stimulating discussion! See below for more details.

**How and when will we move to 100% clean, renewable energy? EVENT May 11**

Since Mayor Garcetti's February announcement that the Los Angeles Department of Water and Power (LADWP) will not be repowering three gas-fired power plants, the question has arisen—what will we use instead to power our homes and businesses? How quickly can we move to 100%? This will be an opportunity to learn more about Garcetti's "Green New Deal" and what some of the leading thinkers in the city are saying about where we go from here. Visit [https://www.ncsa.la/clean\\_renewable\\_energy](https://www.ncsa.la/clean_renewable_energy) to learn more and to RSVP.

**Planning 101: Planning for the Environment**

The Department of City Planning will host a series of trainings in May. Participants in Planning 101: Planning for the Environment will learn about the role of the city and its residents in planning for the environment and the regulations that guide environmental analysis, including the California Environmental Quality Act (CEQA). Visit [here](#) to learn more.

**New NCSA members**

We want to welcome the many new members to the NCSA—Central Hollywood, NoHo, Palms, Watts, and Wilshire Center Koreatown! Visit <https://www.ncsa.la/members> to see the full list.
