

Humanities Majors Outperform Their Peers on Several Measures

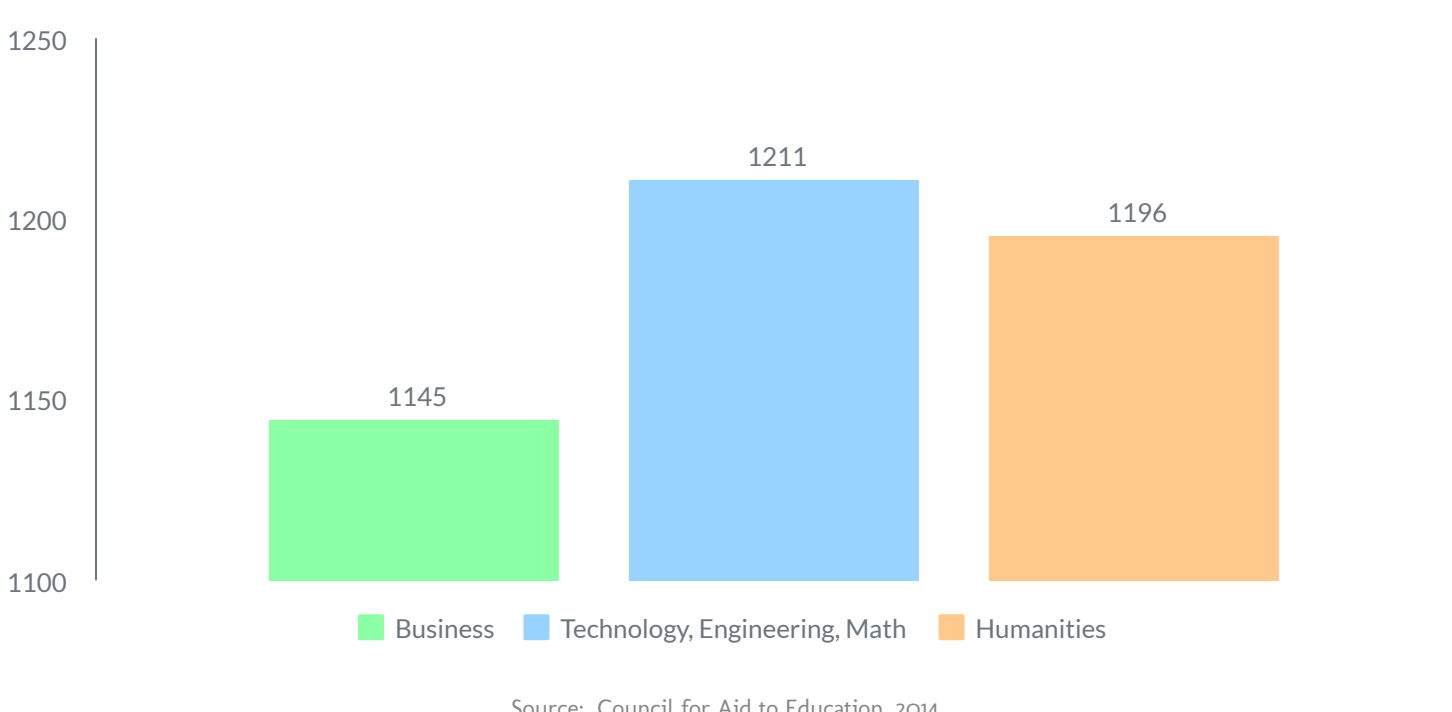

Humanities majors achieve substantially greater gains than business and technology, engineering, and math majors in writing ability, complex reasoning, and critical thinking—skills that today’s employers are actively seeking.

Humanities majors see greater writing and critical thinking gains in college

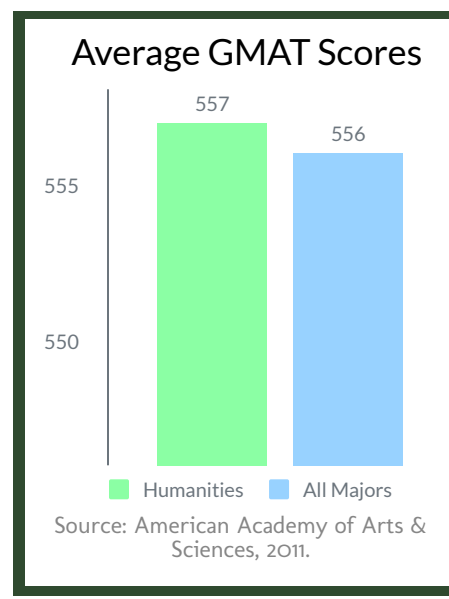

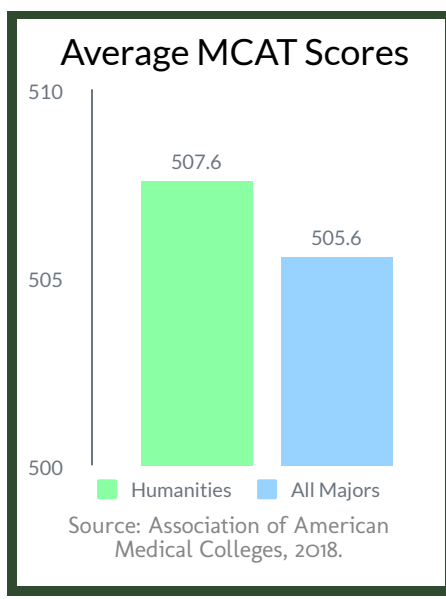

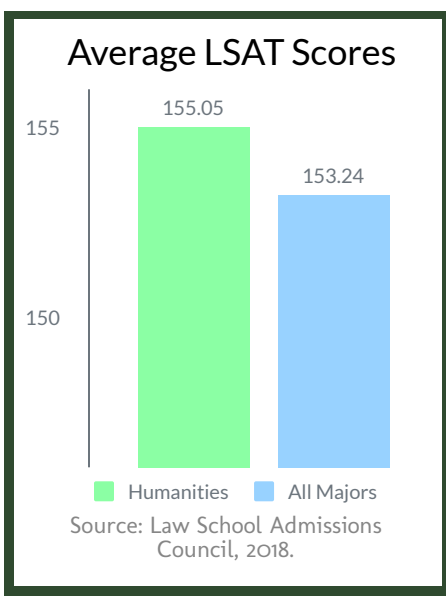

These above average gains in critical thinking ability among those who major in the humanities are accompanied by strong absolute scores on the Collegiate Learning Assessment.

Humanities majors perform well on tests of critical thinking skills

Humanities Majors Excel on a Range of Graduate School Entrance Exams

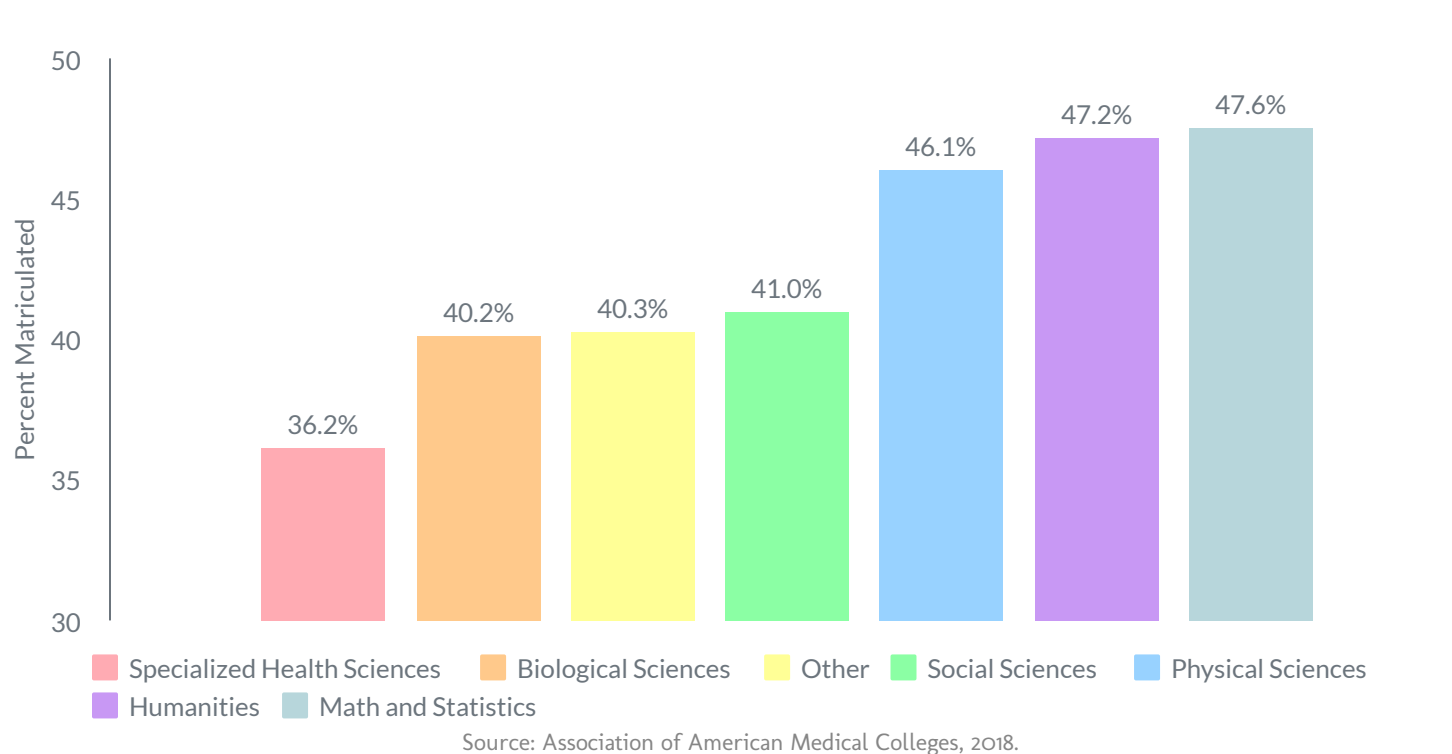

Medical and law school applicants from humanities majors are accepted and matriculate at higher than average rates.

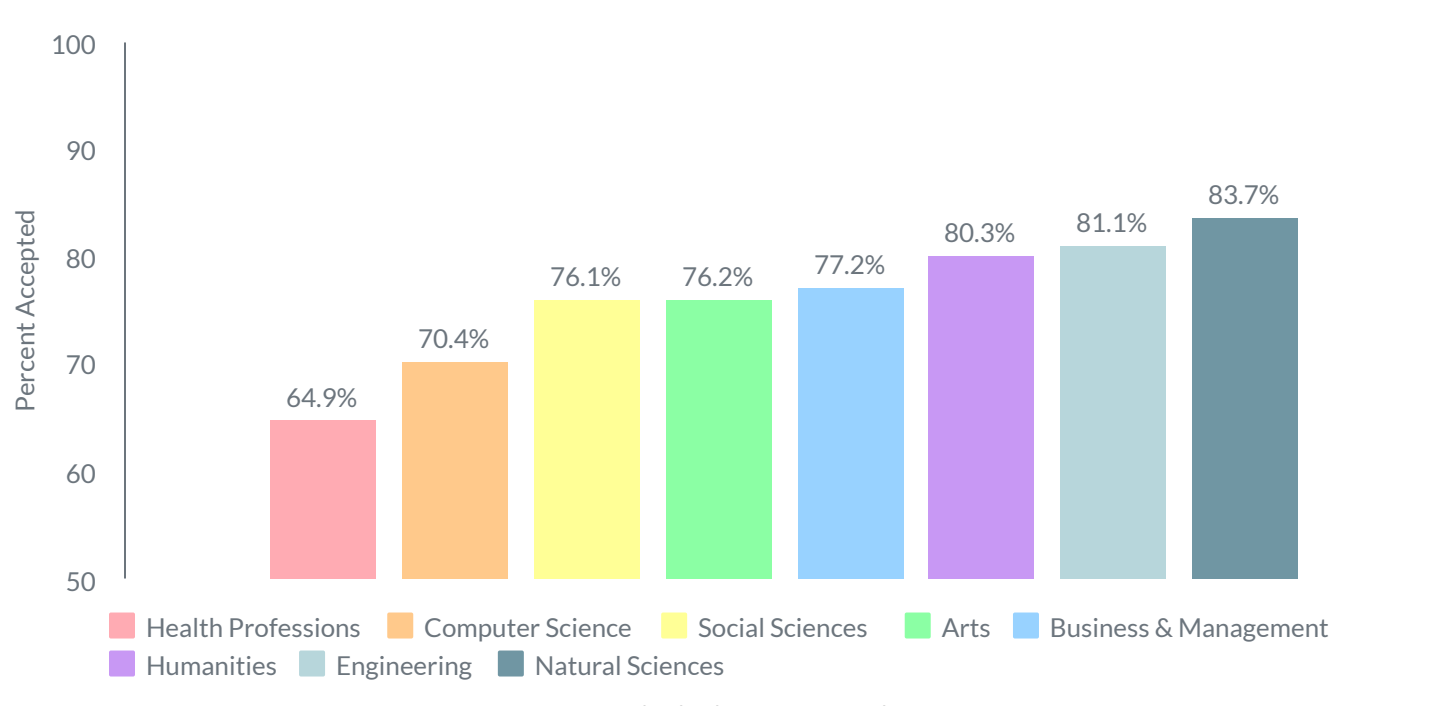

47.2% of applicants from humanities majors matriculated to medical school in 2018, compared to 41% of all applicants.

More than 80% of humanities majors were accepted to law school in 2018, compared to 77% of all applicants.

Humanities majors matriculate to medical school at higher rates than almost all other majors
