COMMENT: The commenters generally supported the rulemaking to allow the sale and possession of stun guns by persons age 18 or older. The commenters also stated that the ability to own and possess a stun gun will have a significant positive impact on individual and public safety within the State. However, one commenter expressed concern over the age requirement allowing persons age 18 to be permitted to own or possess a stun gun and suggested the age limit be raised to 21 and older.

RESPONSE: The Division believes that the amendment to N.J.A.C. 13:54-1.3(a) and new N.J.A.C. 13:54-5.8, prohibiting the sale and
possession of stun guns to minors is reasonable and sufficient to address the blanket prohibition and maintain public safety.

COMMENT: One commenter objected to the proposed amendment to N.J.A.C. 13:54-1.2, Definer. The commenter requested the definition of stun gun be revised to remove language defining a stun gun as being able to “permanently disable” a person. The commenter noted that stun guns are designed to temporarily disable a person with the clear intent to protect oneself or others from bodily harm.

RESPONSE: The proposed definition of stun gun in N.J.A.C. 13:54-1.2 is identical to the definition provided in N.J.S.A. 2C:39-1(t), and there is no basis to limit the scope of the statutory formulation. While certain stun guns may not be intended to permanently disable a person, the statutory definition incorporated into the rule is intended to cover a broad range of devices that emit electronic charge or current intended to disable, whether temporarily or permanently. The effect of the suggested modification to deviate from the statutory definition and limit the rule definition of stun guns to exclude devices that emit an electronic charge or current intended to permanently disable a person would be to permit minors to obtain and possess devices with the potential to inflict a greater degree of harm (that is, stun guns that can permanently disable person). This would be contrary to the public safety purpose the rule is intended to serve. The Division, therefore, rejects this suggestion.

Federal Standards Statement

A Federal standards analysis is not required because the adopted amendments and new rule do not exceed Federal standards, and are not adopted under the authority of, or in order to implement, comply with, or participate in any program established under Federal law or under State statutes that incorporate or refer to Federal law, Federal standards, or Federal requirements.
