

# Universal Healthcare: A Reality or Delusion?

*film screening and moderated discussion*

## FIX IT

HEALTHCARE AT THE TIPPING POINT

View the documentary film *FIX IT*, as it goes deeply into the heart of the current health care crisis, reaches across the political and ideological divide, and makes a case for business leaders to support Single Payer healthcare. In a Single Payer system, the financing is public while the delivery of care remains private.

Would a Single Payer system solve our country's runaway costs? Would it deliver the best health care to you, the consumer? From a Conservative business leader's view, is it the least expensive, most supportive of a free market, and does it make economic sense?

The one-hour film will be followed by Q&A discussion moderated by Dr. William Thar.

**Dr. William Thar**, moderator, is a physician with vast experience in several sectors of health care: private practice, corporate and public. He is a member of **Physicians for a National Health Program (PNHP)**, and serves on the board of **New Jersey Universal Health Care Coalition (NJUHC)**.
