

Oaktree is an ambitious non-for-profit, with the mission of young people leading, demanding and creating a just world. As with any organisation, Oaktree needs a solid foundation.

You, as a Data Analyst, will play an important role within the Data team, tracking the performance of our campaign: Live Below the Line, and our everyday activities with your sights set on: aligning data to the campaign strategy.

As a Data Analyst, a typical day might look like:

- Tracking the day-to-day performance of the campaign.
- Researching areas of growth for the campaign.
- Assist to optimise the ETL process for tracking the day-to-day performance of the campaign.
- Build automated data analysis processes and drive changes in Australia's largest youth-run development agency.
- Utilise data to help us better understand how our supporters interact with our social media platforms including: Facebook, Instagram, LinkedIn, etc.

Who we are looking for:

- A knack for learning software skills pretty quickly.
- Basic data analytic skills using Excel and/or any other statistical software.
- Critical-thinking skills and the ability to use evidence to guide decisions.
- Great attention to detail, and the curiosity to investigate things that look a little out of line.
- The confidence to work independently, but the ability to build strong relationships and collaborate with team members.
- A passion for equality and ending extreme poverty.
- Experience in using PoweBI, Python, or R will be highly regarded but not essential

We value will over skill, determination over degrees, and passion over years of experience. So go for it. Put your name forward

What you will get out of it:

- Learn practical skills that are useful for almost any professional data, analytics, strategy, marketing or communications job.
- Help Oaktree Make a significant impact in the fight against poverty.
- 'Help carry out one of Australia's largest anti-poverty campaigns.
- Make a massive contribution to creating a more just world.
- Obtain skills such as people and project management that will carry forward in your career.
- Change your mindset, giving you the confidence to take on tasks and challenges you didn't think you could before.

TIME COMMITMENT: 1-2 days a week

REPORTS TO: Iris Wat | Director of Data & Analytics
