

Uju Ekeocha in Columbus October 27th, 28th, & 29th

Obianuju (Uju for short) Ekeocha, an internationally acclaimed pro-life speaker and strategist will be coming to Columbus October 27-29th. **Uju** is the founder and president of **Culture of Life Africa**, an initiative dedicated to the promotion and defense of the African values of the sanctity of life, beauty of marriage, blessings of motherhood and the dignity of family life. Culture of Life Africa answers the assaults on these values with African women's voices, in unity with Christ and His Church and consistent with St. John Paul II's Theology of the Body.

Culture of Life Africa has proposed, organized and facilitated many major pro-life conferences and March for Life rallies in Africa.

Uju has advised African bishops from different countries on women and life issues, and co-authored three declarations with African bishops promoting the gospel of life in Africa.

Consistent with her love for the wonder of life, Uju is also a specialist biomedical scientist in Haematology, working at a Hospital in the United Kingdom. Prior her current position, she was a Medical Laboratory Scientist at the University of Nigeria Teaching Hospital. She holds a Master's degree in biomedical science from the University of East London and a Bachelor's degree in microbiology from the University of Nigeria. Uju was born in southeast Nigeria, the youngest of six children, and has resided in the U.K. since 2006.

Please join our sponsoring churches and organizations for this once in a lifetime opportunity during Respect Life Month.
