

An Enbridge Line 5 tunnel won't eliminate the risk

- A tunnel under the Straits of Mackinac will take 5-7 years or longer to completeand oil will continue to flow through the Straits until it is completed.
- A tunnel will not protect us from an oil spill for the other 640 miles of Line 5.
- Anchor supports for the pipeline are making its operations riskier by the day.

The 66-year old pipeline needs to be retired and removed! All of it!

University of Michigan 30-Day Oil Spill Projection

Protect your property values and our pure waters!

Please join us for a discussion on how you can help to shut down Line 5!

Tuesday, September 10, 2019, 6:30 – 8:00 pm
