

Survey stake replacement within and adjacent to the rail corridor between Gerrard Street East and Eastern Avenue

Beginning January 19, 2021

What is the Ontario Line Transit Project?

The Ontario Line will connect communities with 15.5 kilometres of transit service, making it faster and easier for hundreds of thousands of people to get where they need to be each day. It will also help alleviate congestion on transit and roads by providing 17 new connections to GO trains and TTC service. What is happening?

Contractors working on behalf of Metrolinx have identified missing survey stakes that need to be placed within and adjacent to the rail corridor between Gerrard Street East and Eastern Avenue. This work must be done to determine the approach for the construction of early works in this area which will only proceed following the necessary environmental studies. No significant expansion of the current rail corridor is anticipated and mitigation measures are being developed to minimize community impacts.

WHAT TO EXPECT

- A small crew will use handheld surveying equipment including GPS devices and a small hammer in order to replace galvanized iron survey stakes (approximately 1 foot in length by 2cm diameter) along the Metrolinx right of way within and adjacent to the rail corridor to collect data that will support design and planning of the Ontario Line. No paint will be used.
- Residents and businesses near the survey site can expect to hear periodic hammering.
- There will be no pedestrian or traffic impacts associated with this work. Community members will still be able to access park amenities as this work takes place.

TIMING

- Work is scheduled to take place over two days on January 19 and 20, 2021. Work will occur between **9 a.m. and 3 p.m.** Additional notice will be provided to individual property owners if access to private property is required.
- Work could be rescheduled and delayed due to weather conditions or any unforeseen circumstances.
