

# Surveying along the Ontario Line corridor

## What is the Ontario Line Transit Project?

The Ontario Line will connect communities with 15.5 kilometres of transit service, making it faster and easier for hundreds of thousands of people to get where they need to be each day. It will also help alleviate congestion on transit and roads by providing 17 new connections to GO trains and TTC service.

## What is happening?

To advance design concepts and other structural plans for the Ontario Line, Metrolinx will be using small drill rigs to gather information and evaluate underground conditions. Using this information, Metrolinx can determine the optimal construction approach for this project.

---

## WHAT TO EXPECT

- A one or two person crew will use monitoring equipment to locate utilities in the field, and apply paint markings on the ground to note physical location of underground utilities.
- A second crew uses surveying equipment to take measurements of the utility locations.
- Utilities are located within the public right of way.
- The limits of the road or sidewalk do not always match up with the limits of the public right of way. At times, utility location markings will be visible on sidewalks, driveways and front lawns.
- Crews will avoid entering private property to the extent possible and will work from municipal plans.
- During construction hours, lane reductions may be required.
- Every effort will be made to minimize disruptions and expedite work.
- Access to properties will be maintained at all times through at least one driveway.
- Please take care when walking near construction areas. Watch for additional signs directing pedestrians, as detours may be required.

## TIMING

- Work is continuing until the end of this year (December 2021).
- Work will occur between 9 a.m. and 5 p.m., Monday to Friday.
- Work could be rescheduled and delayed due to weather conditions or any unforeseen circumstances.
