Dear _____

As Ontarians, we have a proud history of being a caring and compassionate community. We take it upon ourselves to look in on each other and look out for each other.

This letter is written on behalf of our disabilities community. It is our invitation to join the ranks of families whose adult children upon their 18th birthdays are cut off from their childhood supports, to then be put on 2-5 years-long waitlists for adult supports.

This stark reality leaves us, them, and their families, suffering with overwhelming physical, financial and emotional distress. We are **ALL** in crisis situations.

Please be a champion alongside the thousands of families affected. There are approximately 40,000 people living with developmental disabilities in Ontario and there are approximately 14,000 adults on the Passport funding waitlist in Ontario.

We ask you to actively support the amendment to the *Services and Supports to Promote the Social Inclusion of Persons with Developmental Disabilities Act of 2008*. It is known as **Noah and Gregory's Law** (Transition to Adult Developmental Services and Supports) 2018.

This bill will bring relief to families.

As our children turn 18 years of age, they will celebrate a new reality in which they will no longer be cut off of their supports. They will continue to be involved in their communities and live as independently as possible. Their families will no longer be abandoned to fend for themselves, thereby continuing to contribute to their young adult's quality of life.

This amendment will help us take care of Ontario's most vulnerable citizens, and end family despair.

Kindly reply to our invitation by Jan 19th, 2019

Sincerely,
