What Data Does the state produce?
Case Study: Competitive Housing Assistance for Multifamily Properties

Here is an example of data typically made available to the public on new housing allocations.

\[\textit{CHAMP Round 8: } \$28 \text{ million awarded to support the development of 200 units of affordable housing – Announced March, 2016}\]

\textbf{New Britain, Columbus Commons:} DOH will provide up to \$1,976,000 to Tunxis Road Associates, LLC for the Columbus Commons project. The project will consist of the construction of 14 townhouse rental units in two buildings on a currently underutilized property on a main city thoroughfare. The site has easy access to highways and is a short distance to the CTfastrak Downtown New Britain station, governmental offices, shopping opportunities, and other amenities. The project will serve a range of incomes and will also include market rate units to ensure a vibrant mixed-income development.

What is missing?

- Address
- Incomes served
- Demographic served – elderly? People needing supportive services? People with disabilities?
- Number of bedrooms per unit
- Total cost per unit
- Information on whether the development will include units accessible for people with mobility challenges
- The number of project-based Housing Choice Voucher units

This is critical information for planning and assessment.
