

You shouldn't have to pay for the pandemic, those who have profited should.

The pandemic has been devastating for young people, families, and small businesses. It's a different story for the wealthiest Canadians, who are getting richer. Some wealthy corporations are making record profits *because* of the pandemic. Canada's billionaires are \$78 billion richer since March 2020.

Join Angella MacEwen and the NDP in our call to have those who profited from the pandemic help pay for the support and the recovery that the rest of us need.

I support the NDP's call on Justin Trudeau and the Liberals to introduce a temporary COVID-19 excess profit tax that at least doubles the tax rate on excess profits, and a 1% wealth tax on people with fortunes in the tens of millions:
