

Canadians deserve a Green New Deal that will fight to protect our families and our planet.

The climate crisis remains an urgent and existential threat; here in Ontario we are seeing record breaking heat waves, floods, tornados, even forest fires.

Angella MacEwen and the NDP will take the bold steps needed to fight our climate crisis and create at least more than a million good jobs through investments in energy efficiency retrofits, affordable housing, a public inter-city bus program, renewable energy, infrastructure, electrified transit, child care and other low carbon sectors. We'll pay for it by taking on big polluters.

I support the NDP's plan for urgent climate action that creates jobs and protects our environment:
