

The Certified Facility Manager (CFM) credential sets the industry standard for ensuring knowledge and abilities of practicing facility managers. The certification process is designed to assess competence in the field through work experience, education and the ability to pass a comprehensive exam that covers 11 competencies that make up the facility management body of knowledge. Since the program began in 1992, more than 3,600 facility managers from 32 countries have achieved this prestigious recognition.

FM Learning System and CFM Review offered by IFMA, Los Angeles Chapter:

CFM candidates have a variety of preparation resources available to them including this course. For more information on preparation resources, please go to IFMA.org.

Course Duration: 3 consecutive days, 8AM - 4:30PM

Course Overview:

The IFMA FM Learning System™ is a premier quality review course designed to meet the needs of professionals and organizations. It is developed based on input and guidance from a wide spectrum of facility management subject-matter experts and leaders. This course will provide you with the tools necessary to learn the updated FM body of knowledge as well as help you prepare for the CFM Exam with emphasis on certain competencies.

The IFMA FM Learning System (FMLS) is a preferred source for CFM Exam preparation. In addition to preparing professionals for the CFM Exam, the Learning System is an excellent professional development tool and an indispensable on-the-job resource.

The IFMA Facility Management Learning System™ is a certification preparation program and is not a substitute for the CFM certification examination. Completing this program does not entitle the users to present themselves as CFMs, or to use the CFM designation. The only way to earn the Certified Facility Manager certification is to apply for and pass the CFM Exam. If you wish to take the CFM Exam, you must submit an application form and separate exam fee through IFMA.

CFM Review: Review the overall methodology of the CFM Exam and practice applying FM knowledge and critical thinking skills in a competency-based exam through practice exam questions. Participants are expected to have the necessary knowledge of the 11 competencies tested on the CFM Exam. This workshop is focused on exam strategies and does not include knowledge-based instruction explicitly covering the competencies.
