

## How We Secure Data

We use a variety of security measures to protect your data. We do this by maintaining physical, electronic and procedural safeguards to help prevent unauthorized access to and improper use of personally identifiable information.

We use a variety of security measures to also protect our donors' transactions and personal information using several measures such as encryption, access controls, network firewalls, and physical security. Using these measures makes it extremely difficult for anyone to intercept the donor information you send to us. When we work with other companies to process credit card transactions, etc., those companies also use encryption and other appropriate security measures.

PJTN does not sell, trade, or share our donors' personally identifiable information with any other entity nor does PJTN send mailings to our donors on behalf of other organizations.

No website or electronic data can ever be completely secure, but we at PJTN are always working to maintain up-to-date and appropriate security mechanisms.
