

I support passage of the New York Health Act or Medicare for All that will guarantee healthcare for all under one comprehensive plan, including medical, dental, vision, hearing, and reproductive care. It would be paid for fairly without insurance company premiums, deductibles, or copays, and will protect your choice of doctor and hospital. I urge my state and federal legislators to take action to pass universal healthcare legislation that will treat health care as public good rather than a for-profit commodity.
