Introduction

PepsiCo is the world’s largest snack food company and is among the top five largest food and beverage companies in terms of annual revenue. Its main competitors in the food and beverage industry include The Coca-Cola Company, Nestle, Kraft Foods Inc and Archer Daniels. In the world of soft drinks, however, their main rival is Coca-Cola.

In many ways PepsiCo is a very different corporation than The Coca-Cola Company. Unlike Coke, which focuses primarily on beverages, PepsiCo is a diverse corporation producing soft drinks as well as snack foods and cereals. Their beverages division only accounts for portion of their $29.26 billion annual revenue (2004).

The first Pepsi-Cola company was formed in 1902 by a North Carolina pharmacist who 9 years earlier invented the drink that became Pepsi-Cola.¹ Pepsi-Cola declared bankruptcy twice before 1931 when it was finally purchased by the large candy company, Loft Inc. In 1941, after Pepsi sales had taken off, Loft changed its name to the Pepsi-Cola Company.

Pepsi-Cola merged with Frito-Lay in 1965 to form PepsiCo and become the giant in the snack food and beverages industry it is today. Adding to their already long list of brands and subsidiaries, PepsiCo purchased Tropicana in 1998 and then merged with Quaker in 2001. Unlike The Coca-Cola Company, whose flagship brand is linked to their corporate logo, Pepsi-Cola is only one of four internationally recognizable brands attributed to PepsiCo. PepsiCo beverages and snacks are available in over 160 countries around the world.

PepsiCo has a smaller profile on the world stage than Coca-Cola, but their operations and products have had negative impacts on society and the environment. PepsiCo highest profile misdeed was their investment in Burma during the early 1990s. This, however, is only one in a long list of negative actions – from labour abuses in several countries, to shameless marketing to school children, to exploiting scarce water resources in India – this corporation has been involved in over the years.

The purpose of this profile is to provide a snapshot of PepsiCo’s operations and dealings from a critical perspective. The information provided here will act as a tool for dissecting and analyzing certain parts of PepsiCo in order to discern its strengths and vulnerabilities. The profile examines the corporation’s financial, organizational and social track record in order to provide a resource for potential and ongoing campaigns against the company. With the use of the Polaris Institute’s ‘x-ray’ methodology, the profile presents strategic information on PepsiCo for corporate campaigns. The profile is broken into five categories profiling PepsiCo’s organizational, political, economic, social and stakeholder structures.

1. Organizational Profile

Number of employees: 143,000

1.1 Operations

PepsiCo’s operations are broken into 4 main divisions:

**Frito-Lay North America** – Frito-Lay is one of the world’s largest snack food manufacturers. Frito-Lay and the Pepsi-Cola company merged to form PepsiCo in 1965. Frito-Lay North America (FLNA) manufactures, markets, sells and distributes snack products. Some of their brands include: Lay’s potato chips; Doritos; Cheetos; Tostitos; Fritos; Ruffles; Quaker Chewy granola bars; Rold Gold and SunChips. FLNA products are sold to independent distributors and retailers. In September 2004 Irene B. Rosenfeld was appointed Chair and Chief Executive Officer of Frito-Lay North America.

**PepsiCo Beverages North America** – PepsiCo Beverages North America (PBNA) manufactures or uses contract manufacturers, markets and sells beverage concentrates, fountain syrups and finished drinks under the brands Pepsi, Mountain Dew, Sierra Mist, Mug, SoBe, Gatorade, Tropicana Pure Premium, Dole, Tropicana Season’s Best, Tropicana Twister and Propel. PBNA also manufactures, markets and sells coffee and tea products through joint ventures with Lipton and Starbucks. The division licenses the Aquafina water brand to PBNA bottlers and markets this brand. PBNA sells concentrate and finished goods for some of these brands to bottlers licensed by the company. They also sell some products directly to independent distributors and retailers. Pepsi bottlers sell Pepsi brands as finished goods to independent distributors and retailers. In February 2003 Gary M. Rodkin was appointed Chairman and Chief Executive Officer of PepsiCo Beverages North America.

**PepsiCo International** – Through consolidated businesses and noncontrolled affiliates, PepsiCo International (PI) manufactures snacks and candy including Walkers in the United Kingdom, Sabritas, Gamesa and Alegro in Mexico and Smith’s in Australia. PI international also manufactures or uses contract manufacturers, markets and sells many Quaker brand snacks. In the beverage sector, PI manufactures, markets and sells beverage concentrates, fountain syrups and finished goods under the Pepsi, 7UP, Mirinda, Mountain Dew, Gatorade and Tropicana brands outside North America. The drinks brands are sold to Pepsi bottlers, independent distributors and retailers. In certain markets PI operates its own bottling plants and distribution facilities. Aquafina is also licensed to a few Pepsi bottlers. In February 2003 Michael D. White was appointed Chairman and Chief Executive Officer of PepsiCo International.

**Quaker Foods North America** – PepsiCo merged with Quaker, including Gatorade, in 2001. Quaker Foods North America (QFNA) manufactures or uses contract manufacturers, markets and sells cereals, rice, pasta and other products. Some of QFNA’s brands include Quaker Oatmeal, Cap’n Crunch and Life, Rice-A-Roni, Pasta Roni and Near East side dishes, Aunt Jemima mixes and syrups and Quaker grits. QFNA’s products are sold to independent distributors and retailers.

1.2 Main Customers

---

2 PepsiCo 2003 Annual Report
3 ibid
4 ibid
5 ibid
PepsiCo's customers are made up of franchise bottlers along with independent distributors and retailers. The company grants its bottlers exclusive contracts to sell and manufacture certain Pepsi-Cola beverage products. The bottling arrangements set the price the bottlers will pay for the concentrates as well dictate the manufacturing process. Pepsi-Cola bottlers bearing the company logo are generally not owned by PepsiCo, but are separate corporations. Even though PepsiCo does not own its bottling operations, they still wield power over the independent bottlers through bottling arrangements.

**Wal-Mart and Pepsi Bottling Group**

Sales to Wal-Mart Stores Inc. represented approximately 11% of PepsiCo's total net revenue and 14% of the company's North American gross revenue in 2004. Sales of concentrates and syrups to The Pepsi Bottling Group represented approximately 10% of the company's 2004 global revenue.6

### 1.3 Bottlers

For the location of every bottling location in the United States visit the following website and pick a state: [http://www.pepsiplace.com/index.cfm?option=bottlermap&group_picked=home](http://www.pepsiplace.com/index.cfm?option=bottlermap&group_picked=home)

**Pepsi Bottling Group:**

Approximately 10% of PepsiCo’s net revenue comes from the sale of concentrates and syrups to the Pepsi Bottling Group (PBG). At the end of 2004, PepsiCo owned approximately 46% of PBG’s operations.7

PBG operates 98 soft drink production facilities worldwide and sells and distributes Pepsi products in Canada, Spain, Greece, Russia, Turkey and all or a portion of 21 states in Mexico.

PBG has extensive links to PepsiCo. For example, prior to joining PBG in 1998, PBG Chief Executive Officer John T. Cahill worked for two years at PepsiCo as Senior Vice President and Treasurer. Between 1989 and 1997, Cahill moved between executive positions at PepsiCo, KFC (previously owned by PepsiCo) and Pepsi-Cola North America. Other links include PepsiCo’s Senior Vice President of Human Resources, Margaret D. Moore who currently sits on PBG’s board of Directors along with Clay G. Small, Senior Vice President and General Counsel of Frito-Lay, a subsidiary of PepsiCo.

**PepsiAmericas:**

At the end of 2004 PepsiCo owned approximately 41% of Pepsi Americas. As of August 2005 three PepsiCo executives served on PepsiAmericas Board of Directors, including: Senior Vice President, Finance Matthew M. McKenna; Chairman of the Board and Chief Executive Officer, PepsiAmericas, Inc., Robert Pohlad; and Vice President, Global Mergers & Acquisitions, Cynthia Swanson.

### 1.4 What Brands Are Associated With Pepsi?

Pepsi owns and distributes hundreds of different beverage and snack brands. Some of their biggest brands include Pepsi-Cola brands – Pepsi, Diet Pepsi, Mountain Dew, Aquafina – Frito-Lay brands, Quaker brands, Gatorade and Tropicana brands. Unlike the Coca-Cola Company,
Pepsi has moved beyond simply selling beverages and now owns and distributes snack foods and cereal.

Aquafina

One of Pepsi’s biggest scams is its marketing and sale of overpriced purified tap-water. Aquafina has been the top selling bottled water brand in North America since 2001. The water, as with Pepsi’s other beverages, comes from municipal water sources. It then goes through a 7-step purification treatment called hydro-7. PepsiCo’s marketing does not tell the public they are buying the purified tap-water, rather suggests they are drinking water from a mountain stream.

Pepsi’s complete list of brands:

Frito-Lay brands

Lay’s potato chips, Lays Kettle Cooked potato chips, Wavy Lay’s potato chips, Baked Lay’s potato crisps, Maui Style potato chips, Ruffles potato chips, Baked Ruffles potato crisps, Ruffles Flavor Rush potato chips, Doritos tortilla chips, Baked Doritos tortilla chips, 3D’s snacks, Tostitos tortilla chips, Baked Tostitos tortilla chips, Santitas tortilla chips, Fritos corn chips, Cheetos cheese flavored snacks, Rold Gold pretzels & snack mix, Furryuns onion flavored rings, Go Snacks, Sunchips multigrain snacks, Sabritones puffed wheat snacks, Cracker Jack candy coated popcorn, Chester’s popcorn, Grandma’s cookies, Munchos potato crisps, Smartfood popcorn, Bakerets fried pork skins, Oberto meat snacks, Rustler’s meat snacks, Churramuis fried corn strips, FritoLay nuts, Frito-Lay, Ruffles, Fritos and Tostitos dips & salsas Frito-Lay, Doritos and Cheetos snack crackers, Fritos, Tostitos, Ruffles and Doritos snack kits, Hickory Sticks, Hostess Potato, Lay’s Stax potato crisps, Doritos Rollitos, Lay’s Fries, Natural Lays, Natural Ruffles, Natural Cheetos, Natural Tostitos, Miss Vickie’s potato chips, Munchies snack mix

Debt to equity ratio

This ratio indicates how much the company is leveraged (in debt) by comparing what is owed to what is owned. A high debt to equity ratio could indicate that the company may be over-leveraged, and should look for ways to reduce its debt.

PepsiCo’s long-term debt: $2.39 billion
PepsiCo’s total shareholder equity: $27.98 billion
PepsiCo’s long term debt to equity ratio = .085

Industry comparison:
Long-term debt: $2.5 billion
Shareholder equity: $27.3 billion
Long term debt to equity ratio = .091

### 2.4 Tax avoidance

Companies like PepsiCo are always looking for ways to avoid paying taxes. One way to do this is to incorporate subsidiaries inside countries where the company pays little or no taxes. Countries like this are known as ‘tax havens’. Under US tax laws, if a US corporation incorporates a subsidiary in a foreign company it is considered a foreign citizen and is no longer considered a US resident. This means that PepsiCo does not have to pay US taxes on income from its foreign based subsidiaries if the money is retained and reinvested outside the United States. This income is taxable only if it returns to the United States.

An important aspect of US tax laws is that foreign incorporated subsidiaries can legally be controlled by its parent company headquarted in the United Sates. Companies like PepsiCo are therefore legally allowed to become incorporated in a low-tax country, obtain a mailing address and avoid paying taxes on foreign income. PepsiCo’s subsidiaries based in tax havens usually own plants or operations in other higher tax countries. Since the tax haven company is the legal owner of the operations in the other country, PepsiCo avoids paying taxable income on the operations. Of PepsiCo’s subsidiaries listed in the Appendix, 6 are situated in the Cayman Islands a country with very little corporate income tax. From 1997 to 2003, the number of PepsiCo subsidiaries located in tax havens rose from 14 to 29. In 2004, watchdog group Citizen Works ranked PepsiCo 15th among Fortune 500 companies with the most offshore tax-haven subsidiaries.16

### 2.5 Joint Ventures

**PepsiCo and Starbucks**

In 1994, Pepsi-Cola North America and Starbucks joined forces to create the North American Coffee Partnership (NACP). The NACP produces Bottled Frappuccino and Starbucks DoubleShot brands of bottled, ready to drink, coffee beverages. The joint venture holds a 90 percent share of the ready to drink coffee category and combines Starbucks coffee power with Pepsi’s bottling and distribution system.18

**PepsiCo and Unilever**

In 1993 PepsiCo and Unilever formed the Pepsi Lipton (Unilever acquired Lipton in 1971) Partnership for the ready-to-drink market in the United States and Canada. Ten years later the two corporations teamed up again to create the joint venture, Pepsi Lipton International. The goal of the joint venture is to tap into the growing international market for ready to drink teas. Unilever is the world’s largest tea producer.19

---

17 ibid
2.6 Advertising

PepsiCo spent $1.1 billion on advertising in 2002 compared to Coke’s $569 million.\textsuperscript{20} PepsiCo was ranked 21\textsuperscript{st} on Advertising Age’s top 100 leading advertising list for 2002. The company spends much more on advertising than its main competitor because of its large number of subsidiaries and long list of brands.

Pepsi’s advertising firms

Addis – This Berkley based ad firm added Pepsi as a client in May 2004. The firm will design advertisements for Pepsi-Cola. Other Addis clients include Dole and Nestlé Beverage Company.

BBDO – This New York based ad firm has counted Pepsi as a client since 1960. It is responsible for the Pepsi Generation ad campaign. BBDO also counts Frito-Lay as one of its clients. Other BBDO clients include Bayer, Fedex and General Electric.

Pepsi and iTunes

In late 2003, Apple computers and Pepsi-Cola North America announced a promotion that would legally give Pepsi consumers 100 million free songs from Apple’s iTunes Music Store, a digital music download provider. The promotion initiative randomly places specific codes in 20 ounce and 1 litre bottles of Pepsi, Diet Pepsi, and Sierra Mist. Winning codes will be redeemable for a free song from the iTunes music store.\textsuperscript{21} The promotion is another example of PepsiCo’s goal of capturing young hip customers.

Marketing to Teenagers

In an attempt to attract teenagers to their products, PepsiCo has opened three Pepsi Zone lounges in California, Florida and Illinois. The lounges feature couches, plasma TV screens, video games and computer stations. Everything is free except for the lounge’s vending machines which carry carbonated and non-carbonated Pepsi products. PepsiCo will evaluate the effectiveness of attracting young customers before deciding on an expansion plan.\textsuperscript{22}

False Advertising

In June 2005, PepsiCo agreed to end its claims that Tropicana orange juice reduces the risk of heart disease and strokes. The move came after the United States Federal Trade Commission (FTC) said there was no scientific evidence to support the statement. Advertisements pushing Tropicana’s Healthy Heart brand claimed that drinking two to three cups of the juice a day would lower blood pressure within six to eight weeks. PepsiCo is now prohibited from making similar claims unless they are supported by “competent and reliable scientific evidence.”\textsuperscript{23}

Product Placement

Paying to have their products appear in movies or television shows is nothing new for companies like PepsiCo. However, when PepsiCo products popped up in one of California Governor Arnold Schwarzenegger’s political commercials, product placement reached new limits. In May 2005, a television commercial promoting Schwarzenegger’s ballot agenda, featured the Governor in a cafeteria talking to Californians with snack food items spread around the table. Labels for PepsiCo products including Diet Pepsi, Sobe, Cheetos, Ruffles and Sun Chips were all clearly visible along with Arrowhead water, a Nestlé product.\textsuperscript{24} PepsiCo donated $20,000 to Governor

\textsuperscript{20} 100 Leading National Advertisers, Advertising Age, June 23, 2003
\textsuperscript{22} Goodison, D., “Pepsi Zone fun lounges target teens at malls”, The Boston Herald, August 10, 2005
\textsuperscript{23} “PepsiCo to drop Tropicana ad claims”, Financial Times, June 3, 2005
\textsuperscript{24} “Branding campaign finance”, Los Angeles Times, June 3, 2005
Schwarzenegger’s California Recovery Team during the 2003-2004 election period. In contrast to the Governor’s promotion of PepsiCo products in March 2005 he proposed a ban on all junk food in schools. Pepsi was also promoted in Schwarzenegger’s movie Terminator 2.

Advertising in schools

Channel One – Since 1990, this 12-minute daily news show has been beamed to schools across the United States and is now featured in more than 12,000 schools with more than 8 million kids. Schools that agree to show the program are specifically wired and loaned a television for each classroom. Every telecast includes a 2 minute commercial for products ranging from athletic shoes to soda pop. It is because of the direct advertising to children – and questionable quality – that Channel One has been at the centre of the controversy over advertising in schools. Pepsi and Gatorade are some of Channel One’s core advertisers.

<table>
<thead>
<tr>
<th>Health Issues</th>
</tr>
</thead>
<tbody>
<tr>
<td>Soft drinks have been consistently linked to obesity and other health problems. Over the past 25 years annual soft drink consumption in the US has risen rapidly. The National Soft Drink Association says that in 2003 Americans consumed over 196.8 litres (52 gallons) of soft drinks per year. A 1998 study published by the Center for Science in the Public Interest showed that the consumption of regular and diet soft drinks by 12 to 19 year olds had reached 28 Ounces, or 828 ml per day. Considering that one 360 ml can of soda contains 40 grams (or ten teaspoons) of sugar, its no wonder that soft drinks are the largest source of refined sugars in the diets of Americans. Large amounts of sugar translate into large numbers of calories meaning that soft drinks consumption represents 5.6% of all the calories consumed in the United States. For children, drinking this much soda means that the essential nutrients provided by other beverages, like milk, are missing from daily diets.</td>
</tr>
</tbody>
</table>

High levels of sugar, calories and the absence of more nutritious beverages lead to various health problems such as obesity, tooth decay and osteoporosis. Corporations like PepsiCo who aggressively market their products, especially in schools via exclusivity contracts, are implicated in the creation and increase of these health concerns.

Exclusivity Contracts “Schools are struggling to meet costs and budgets are being voted down, so they’re looking for new sources of revenue. And us, we always look for ways to connect with teenagers.” Pepsi Spokesman David DeCecca

One of Pepsi’s dirtiest marketing tricks is to lure cash-strapped school boards and Universities across North America into exclusive contracts where nothing but Pepsi products can be sold. Pepsi offers large sums of money to school districts and Universities for the exclusive rights to sell their products. While the agreements provide Pepsi with a captive group of consumers, it also provides the company with constant advertising through the proliferation of their brand in hallways, on scoreboards and in other prominent displays. Pepsi’s goal of getting kids hooked on their products through exclusivity contracts has been criticized for commercializing schools and providing children with easy access to unhealthy products. The public outcries have spawned a number of campaigns aimed at eliminating the sale of soft drinks in schools. Though some school boards – San Francisco, Chicago – have succeeded in banning the sale of soft drinks in schools, most of the criticism and action is based on health issues on not the commercialization of schools. It is important to note that while the sale of soft drinks may be banned, the sale of

28 ibid
29 ibid
31 “Chicago Public Schools ban carbonated drinks from school vending machines”, Associated Press, April 21, 2004
other Pepsi products, such as fruit drinks and water is still allowed thus sustaining the company's presence is schools.

The following is a list of exclusivity contracts that Pepsi has with schools in Canada and the US. This list is not exhaustive.

Canada

According to a survey conducted by the Ontario Secondary School Teachers’ Federation, 205 out of 425 schools that responded to the survey had exclusive contracts with soft-drink companies. Of those 205 schools 65 had contracts with Pepsi and 115 with Coke. Some of the schools with contracts with Pepsi include:

Ontario

- London, Thames Valley District School Board – Five year $2.5 million exclusivity contract signed in 2000.
- Toronto, York Region District School Board – Five year $3.7 million exclusivity contract.
- Hamilton-Wentworth District School Board – The Hamilton Wentworth District School Board has an exclusivity contract with Pepsi.

United States

Arkansas

California

- Alameda School District – Five year $100,000 exclusivity contract signed in 2003.
- Riverside Unified middle and high schools – Five year $1 million partially exclusive contract signed in 2003.
- Simi Valley District – Santa Susana High School signed a 5-year exclusivity contract with Pepsi in 2003.
- Bay Area – San Mateo Union High School District, Alameda Unified School District, Mill Valley and Petaluma school districts have all signed exclusive contracts with Pepsi.

Colorado

- Jefferson County Schools – Seven year $1.75 million exclusivity contract signed in 2003.

Florida

- Duval County Schools – Five year $13.5 million exclusivity contract signed in 2000.
- Hillsborough County Schools – Twelve year $50 million exclusivity contract signed in 2003.

44 Associated Press, “Duval Schools agree to Pepsi plan; Coke is out”, September 20, 2000
- Pasco County School Board – Ten year $5.7 million exclusivity contract signed in 1998.46
- St. Johns County School District – Five year, $2.3 million exclusivity contract signed in July 2005.47
- University of Florida – Ten year, $27 million exclusivity contract signed in May 2005.48

**Georgia**
- Marietta School District – Seven year, $1.7 million exclusivity contract signed in 2000.49

**Illinois**
- District 125 – Illinois school district 125 has an exclusivity contract with Pepsi.50

**Kansas**
- North Kansas City School District – Ten year, $2.7 million exclusivity contract, signed fall of 2004.51
- Park Hill School District – Ten year, $1.6 million exclusivity contract, signed in June 2005.52
- Topeka Unified School District 501– Ten year, $3.5 million exclusivity contract, signed in 2004.53

**Minnesota**
- Mankato State University – Ten year, $6.8 million exclusivity contract, signed in 1998.54

**Missouri**
- De Soto School District – Five year, $75,000 exclusivity contract, signed in 2003.55
- Southern Illinois University – Nine year, $5.3 million exclusivity contract, signed in 2002.56

**Nevada**
- University of Nevada, Reno – Six year, $2 million exclusivity contract, signed in 2002.57

**New Mexico**
- University of New Mexico – Eight year, $8 million exclusivity contract, signed in 2002.58
- Albuquerque Public Schools – Seven year $1.2 million exclusivity contract, signed in 2000.59

**New York**
- Syracuse School Board – Ten year $5 million exclusivity contract signed in 2000.60

**North Carolina**
- Winston-Salem/Forsyth County School Board – Five year $4.8 million exclusivity contract signed in 2000.61

**Ohio**
- Pepsi has exclusive contracts with 41 school districts in Cuyahoga, Geauga, Lorain, Lake, Portage, Summit and Medina counties.62

**Oklahoma**
- Tulsa School Board – Five year $7.5 million exclusivity contract signed in 2003.63
- Broken Arrow School District – Ten year, $5.6 million exclusivity contract signed in 1999.64

  - Northside School District – Ten year $14 million exclusivity contract signed in 1998.72

Virginia
- Virginia Beach School District – Five year $7 million exclusivity contract signed in 2001.73

Sporting Events

Like other major beverage companies, Pepsi-Cola sponsors major sporting events around the world. In one example, Pepsi gained exclusive rights to sell its products at the 2003 cricket world cup in South Africa. Only Pepsi products were to be consumed at the event. People were only allowed to bring to the grounds a half litre of unbranded water in a soft plastic bottle. Cricket matches usually take an entire day thus forcing spectators to purchase Pepsi in order to avoid dehydration.74

Pepsi is the exclusive soft drink of United Airlines and the National Football League.
3. Political Profile

3.1 Political Connections

David R. Andrews, PepsiCo’s Senior Vice President, Government Affairs – From 1997 to 2000 Andrews served as the legal adviser to the US Department of State and former Secretary of State Madeleine Albright.\(^75\)

Thomas Foley, member of PepsiCo’s Health and Wellness Advisory Board – Foley served as Majority leader of the House of Representatives from 1987 until 1989 when he was elected as the speaker of the House. After his tenure as Speaker of the House, Foley served as ambassador to Japan from 1997 until 2001. Other political postings include House majority whip from 1981 until 1987 and member of Congress from 1965 until 1994. Foley now works for the Coca-Cola Company’s law firm Akin, Gump, Strauss, Hauer & Feld.\(^76\)

James Hunt, member of PepsiCo’s Health and Wellness Advisory Board – Hunt is a former Governor of the State of North Carolina (1997-2001).

Richard Nixon, former President of the United States – Before entering politics Nixon worked as a lawyer for Pepsi-Cola.\(^77\)

Pepsi and Allende
Former PepsiCo CEO David Kendall, had close ties to Richard Nixon. In September 1970, Kendall phoned Nixon to plead for the protection of PepsiCo’s interests in Chile after the election of Salvadore Allende. Kendall arranged to have the owner of Pepsi’s Chilean bottling operations meet with National Security Advisor Henry Kissinger on September 15. Hours later Nixon called, CIA chief Richard Helms and ordered the CIA to prevent Allende’s inauguration. Kendall feared that PepsiCo’s facilities in the country would be nationalized if Allende was inaugurated.\(^77\) PepsiCo’s direct connection with President Nixon played a hand in the October 1970 plot against President-elect Allende.

Larry Thompson, PepsiCo Vice President and General Counsel – Thompson served as Deputy Attorney General under John Ashcroft from 2001 until August 2003. In 2002, Attorney General John Ashcroft named Thompson to lead the National Security Coordination Council. Also in 2002, President Bush named Thompson to head the Corporate Fraud Task Force. He led the Justice Department’s ongoing Enron investigationand was responsible for corporate fraud investigations. Thompson is closely tied to Supreme Court Justice Clarence Thomas, testifying on his behalf during Thomas’ controversial 1991 confirmation hearings.

3.2 Government and Industry Associations

PepsiCo is a member of the following powerful business and industry associations.

**US Council for International Business** [www.uscib.org](http://www.uscib.org) – The USCIB advocates for US corporations with the goal of influencing "laws, rules and policies that may undermine U.S. competitiveness, wherever they may be". The USCIB is the U.S. wing of the International Chamber of Commerce, and was the key corporate lobby group in the push for the failed Multinational Agreement of Investment (MAI). They are also heavily involved in the current pro-liberalization lobby regarding negotiations on the Free Trade Area of the Americas and the World Trade Organization. David Wright, Vice President of Government Affairs at PepsiCo, sits on the USCIB’s Executive Board.

---

\(^75\) PepsiCo 2003 Annual Report  
\(^76\) United States Embassy, Japan, website, [http://japan.usembassy.gov/e/foley/tfoley-bio.html](http://japan.usembassy.gov/e/foley/tfoley-bio.html)  
The USCIB, the World Health Organization and Sugar

In early 2003, the USCIB joined food industry groups and the Sugar Association (the main industry association representing big US sugar producers) wrote to US health secretary Tommy Thompson asking him to push for the withdrawal of a World Health Organization report on healthy eating. The report sets guidelines which say that sugar should only account for 10% of a healthy diet and that soft drink consumption has contributed to the obesity epidemic. Sugar industry associations threatened to use their lobbying power to get the United States Government to withdraw its $406 million funding of the WHO if the report was not withdrawn. The National Soft Drink Association said the reports guidelines for sugar were “too restrictive” and “not based on the best available science.”

USA-Engage http://www.usaengage.org – PepsiCo is a member of USA-Engage, a broad-based organization representing individuals and corporations who view the US’ unilateral economic sanctions imposed on various countries as damaging to the US economy. USA-Engage directly targets US sanctions restricting US companies from investing. The organization does not make distinctions between different government sanctions and how they may negatively impact local populations. They view sanctions strictly as barriers to profit for US corporations. USA-Engage is supported by powerful lobby groups, including The Wexler Group, who have successfully combated new sanctions efforts in the White House and Congress.

National Foreign Trade Council www.nftc.org – PepsiCo is a member of the NFTC’s Board of Directors. The NFTC is an organization that advocates for the international and public policy priorities of its business members.

National Soft Drink Association www.nsda.org – The Association serves as a liaison between the industry, government and the public, and represents the industry in legislative and regulatory matters. PepsiCo is well represented at the NSDA’s with no less than six representatives on their Executive Board and Board of Directors. John T. Cahill, Chair and CEO of The Pepsi Bottling Group, Inc. is chairman of NSDA. PepsiCo owns 45% of the PBG. The following Pepsi executives are on the NSDA’s Board of Directors: Dawn Hudson, President Pepsi-Cola North America; Craig W. Moore, President Pepsi-Cola Bottling Company; Robert C. Pohlad, Chief Executive Officer of PepsiAmericas, Inc.; and Richard C. Poillon President & Chief Executive Officer of Pepsi Bottling Ventures LLC. An NSD poster provided to school teachers in the United States promotes their members’ products as: “refreshing sources of needed liquids and energy, soft drinks represent a positive addition to a well-balanced diet... These same three sugars also occur naturally, for example, in fruits... In your body it makes no difference whether it makes no difference whether the sugar is from a soft drink or a peach.” Donald R. Knauss, President and Chief Operating Officer of Coca-Cola North America is also on the NSDA’s board of directors.

Grocery Manufacturers of America http://www.gmabrands.com/ – The Grocery Manufacturers of America is a powerful lobby group that represents the interests of food manufacturers in the United States. Both PepsiCo and the Pepsi Bottling Group Inc. are members of the GMA.

3.3 Corporate Welfare

Overseas Private Investment Corporation (OPIC): OPIC provides low-cost financing and insurance to U.S. companies investing in foreign markets. Pepsi has been the recipient of millions of dollars in corporate welfare from OPIC. For example, in 1998 OPIC provided Pepsi-Cola

82 Danaher, K., “50 Years is Enough: the case against the World Bank and the International Monetary Fund”, Boston: South End Press, 1994
General Bottlers with $50 million in political risk insurance for the company’s planned expansion into Russia. Pepsi-Cola General Bottlers is owned by PepsiAmericas which is 40% owned by PepsiCo.

**International Finance Corporation (IFC):** Pepsi and its bottlers have received millions of dollars from the IFC to ‘help’ finance the company’s expansion in the South. In one case the IFC is provided a Russian bottling operation and Pepsi with loans to begin bottling Pepsi products. The Russian company will act as the exclusive Pepsi bottler for Central and Eastern Russia. The IFC is a member of the World Bank Group and states that it “promotes sustainable private sector investment in developing countries as a way to reduce poverty and improve people’s lives.”

### 3.4 Political Donations

As is the case with most large corporations in the United States, PepsiCo, along with its subsidiaries and joint-ventures, donates large sums of money to candidates during election campaigns. While PepsiCo does not invest the millions that some other corporate giants do, the money they donate through their Political Action Committees (PACs) and soft money donations will go to congressional and senatorial candidates who work towards policies that will be favourable to their agenda.

An example of strategic donations can be seen in the number of donations PepsiCo made in the 2002 election cycle to members of the Senate Committee on Agriculture, Nutrition and Forestry. Among other things, the Committee examines food programs for the needy to assure their availability and nutrition value, as well as encouraging a balanced diet among the general population, and most importantly ensuring that food is safely grown, prepared and delivered. 10 out of 21 Senators on this committee received a donation from PepsiCo during the 2002 election cycle. Donations to these senatorial candidates totaled $34,500.

During the 2004 election cycle, PepsiCo’s Political Action Committee (PAC) contributed $254,826 to congressional and senatorial candidates. Thirty six percent of this total went to Democratic candidates while 63 percent went to Republican candidates.

During the 2002 election cycle, PepsiCo made $907,600 in Soft Money donations, 13% to Democrats and 87% to Republicans.

---

85 International Finance Corporation Website, http://www.ifc.org/about
87 Political Action Committees (PAC) are political committees organized for the purpose of raising and spending money to elect and defeat candidates, most PACs represent business, labor or ideological interests.
88 Soft money encompasses any contributions not regulated by federal election laws and is considered by many to be a political loophole. The exemption was made to encourage “party-building” activities which benefit the political parties in general, but not specific candidates. In reality however, the loophole has emerged as the parties’ primary means of raising tens of millions of dollars from wealthy contributors during the fall presidential campaigns, when direct contributions to candidates are prohibited.
89 Center for Responsive Politics
90 Ibid
Other strategic donations include $6,000 from PepsiCo’s PAC since 2000 to Florida Republican Ric Keller who tabled a bill banning lawsuits against junk food companies that was passed in the House of Representatives in 2004. Keller commented that “the food industry is under attack and in the cross hairs of the same trial lawyers who went after big tobacco”.91

In January 2005 PepsiCo donated $100,000 for US President George Bush’s inauguration celebrations.92

[Source: Center for Responsive Politics]

**3.5 Lobby efforts**

According to the Center for Responsive Politics, PepsiCo spent $1.34 million on lobbyists in 2000.93 PepsiCo hires lobby firms and employs their own in-house lobbyists in order to influence policy makers in Washington.

**Republican National Convention** – PepsiCo spent more than $125,000 for a three-hour reception and New York’s Metropolitan Museum in honour of Senate Majority Leader Bill Frist during the Republican National Convention in September 2004. Responding to questions about the company’s large donation, PepsiCo’s vice president of government affairs Galen Reeser said, “Sen. Frist is an honorable legislator with a good heart, and we are proud to support him.”94 PepsiCo’s investment at the RNC also buys them connections in the Federal Government so they will be remembered in their time of need.

4. Social Profile

PepsiCo is not concerned with putting people before profit. The following examples of the PepsiCo’s business dealings in Burma and India along with an overview of their labour and environmental track records provide good examples of they are strictly concerned with making as much money as possible without considering the social and environmental impacts.

4.1 India

PepsiCo’s operations in India are increasingly coming under fire for water takings and the presence of pesticides in their drinks. While The Coca-Cola Company has received most of the criticism in India over the past few years, local residents and activists are beginning to target Pepsi for equally egregious violations. The following list documents a few of Pepsi’s recent problems in India.

March 2005 – Thousand of people demanding the closure of Coke and Pepsi factories in the Palakkad district formed a human chain between Pepsi’s bottling plant in Kanjikode and Coke’s operation in Plachimada. Protesters included political leaders, students, environmentalists and community members.95

January 2005 – Activists from several organizations along with thousands of citizens and school children formed a human chain demanding the closure of a Pepsi bottling plant in Mandideep (Bhopal).96

December 2004 – Both Coke and Pepsi were ordered by India’s Supreme Court to label their products stating the amount of pesticide residues in their soft drinks. The court ruled that consumers had a right to know what they were drinking. Both Coke and Pepsi had challenged the order saying that their products in India were as safe as anywhere else in the world.

October 2004 – PepsiCo was forced to pull an advertisement after child labour activists said the commercial depicted child labour. The ad showed a boy carrying a tray of Pepsi bottles to cricket players on the playing field. The Andhra Pradesh High Court issued an order banning the advertisement saying that no television commercial should be televised “depicting or glorifying child labour.”97

January 2004 – In January 2004 the Indian parliament banned the sale of Coke as well as Pepsi products in its cafeteria after tests found high concentrations of pesticides and insecticides, including lindane, DDT, malathion and chlorpyrifos, in the colas, making them unfit for consumption.98 Some test samples showed toxin levels 30 times the standard allowed by the European Union. The conflict began in August 2003 when an independent environmental group, the Centre for Science and the Environment, found that pesticide residue in the drinks were 11 and 30 times higher than the level permitted by the European Union.99

4.2 Labour Track Record “Given the interest in worker rights in Coca Cola production facilities around the world we should not forget the PepsiCo appears to be denying these rights

95 “Thousands form Human Chain for Closure of soft drink units”, The Hindu, March 30, 2005
96 “Human chain formed against Pepsi, Coke”, Hindustan Times, January 20, 2005
97 “Pepsi ad ‘Glorifying’ child labour off air”, The Economic Times, October 9, 2004
as much if not more systematically in many of its facilities around the world”. Ron Oswald, IUF General Secretary.

PepsiCo and its affiliated bottlers around the world have a poor labour track record. While many campaigns surrounding The Coca-Cola Company’s labour track record, PepsiCo has been able to go about its business outside of the spotlight. Unlike its main competitor where there is a relatively high presence of unions, PepsiCo has effectively avoided or resisted unions. This has left many PepsiCo workers unorganized and voiceless, leaving the stories of abuse untold and the company’s practices unchallenged. The following list provides a sample of PepsiCo’s labour abuses and the strike actions taken against the company and its affiliated bottlers in the past 5 years.

Argentina

In early 2002, in the wake of Argentina’s economic crisis, 52 temporary workers were fired from one of PepsiCo’s potato chip factories in Buenos Aires Province. When the workers refused to leave the factory PepsiCo brought in security guards who used force in an attempt to remove the fired workers who are not part of the union. Permanent workers, who are part of a union, quickly organized actions to resist the mass firing. In response, the company deployed armed security guards to patrol the factory. Other security guards have spied on workers in the lunchroom, while the police tailed unionists’ cars in order to intimidate and divide the permanent and temporary workers. The struggle for the rights of temporary workers continues.

Barbados

The Barbados Workers’ Union (BWU) took action against Pepsi over the company’s refusal to recognize the union and the firing of four employees. The union accused the company of anti-worker and anti-union sentiment and of disrespecting Barbadians. Port workers joined that action by slowing down the handling of Pepsi products. The dispute ended after the company finally recognized the union.

Burma

In January 1997 PepsiCo announced that it would no longer do business in Burma. PepsiCo entered Burma in 1991 only three years after the military took control of the government. The company stayed while other companies like Levi Strauss were leaving due to the country’s poor human rights situation and use of slave labour. In 1996, in a New York Times article, PepsiCo’s spokesperson at the time, Elaine Franklin, said that PepsiCo was in Burma for the long haul. In April 1996, only months after the New Times article was published, PepsiCo announced that it would sell its bottling plant in Burma citing pressure from a student-led boycott and shareholders who wanted PepsiCo out of the country. It wasn’t until January 1997, however, that PepsiCo withdrew its operations from the country. The student-led boycott of PepsiCo and its products had expanded to over 100 campuses across North America and had a powerful hand in forcing PepsiCo out of Burma.

Guatemala

100 “PepsiCo: Union-Busting, Trashing Rights...and Buying Danone”, International Union of Food, Agricultureal, Hotel, Restaurant, Catering, Tobacco and Allied Workers’ Associations (IUF) press release, July 21, 2005, http://www.iuf.org/cgi-bin/editorials/db.cgi?db=default&ww=1&uid=default&ID=422&view_records=1&en=1
104 Matthews, J., “Pepsi to sell Burma plant, citing protests”, The Washington Post, April 24, 1996
Sixty six union workers at PepsiCo's Guatemala operations in La Mariposa, were fired in 2002 and replaced by non-union sub-contracted workers with lower wages and benefits. Thirty of the 66 continue to struggle for reinstatement of their jobs and refuse to accept severance payments from PepsiCo. The labour struggle at the La Mariposa plant goes back to 2000 when the previous collective agreement expired. Rather than renewing the agreement, management used bribes and intimidation to induce members to leave the union. In the end, the 66 union members were fired. The company has refused to implement orders from two different courts to reinstate the workers.

India

In 2000 workers at a Pepsi bottling plant in Kanpur India, changed unions from the right leaning Bharatiya Mazdoor Sangh (BMS), who had secured wages just above the paltry minimum wage, to the leftist Centre of Indian Trade Unions (CITU). One month later the plant management fired the union President and its Joint Secretary for an alleged sabotage. Both were nowhere near the area where the alleged sabotage took place. Workers at the factory demanded an inquiry. They eventually became tired of the management’s inaction and threatened a one-day strike. In response the management locked out the workers.

Poland

In late December 2004 eight women were dismissed from PepsiCo’s Frito-Lay plant near Warsaw after talking amongst themselves about sexual harassment at the plant. For two years women working on the night shift at the plant were allegedly sexually harassed under threat of dismissal. After the women began discussing the harassment, the night shift supervisor and the human resources manager called upon the eight women to resign with compensation or be fired. The workers’ union representative was not at work that day. A few days later, the women filed a report of sexual harassment with the Labour Court. Soon after the charges were filed representatives from the union representing the plant workers met with the women’s employer hoping to persuade the company to investigate the allegations and reinstate the women. The company refused.

Three of the women claim that they have been victims of sexual harassment while the remaining five substantiate their claims. Two lawsuits have been filed, one under labour law and another under criminal law. After the cases were filed the supervisor allegedly involved in the harassment was arrested. He however continues to draw his salary from the company and receives legal counsel for his defence.

The International Union of Food, Agricultural, Hotel, Restaurant, Catering, Tobacco and Allied Workers’ Associations (IUF), maintains that by refraining from taking the necessary measures to protect its employees from sexual harassment, PepsiCo is in breach of both European and Polish law.

As of September, 2005 the case has yet to be resolved.

United States

Minnesota – Four hundred workers went on strike at a Pepsi Bottling Group plant in Minneapolis in June 2000 over wages, pension plans, job security and affordable health insurance. As in other strike situations, Pepsi employed scab labour to maintain plant operations. After 12 weeks on the picket lines, the union agreed to a contract with favourable language.110

Missouri – In February 2001, 200 bargaining unit members went on strike at two Kansas City area PepsiAmericas bottling operations. The workers struck after Pepsi's final offer on matters involving contract language on insurance benefits and wages was deemed unacceptable. Pepsi brought in managers from operations in surrounding states to continue production.111 By April of the same year, the strike had not been resolved and Pepsi began hiring permanent replacements, an action that clearly shows their unwillingness to negotiate with organized labour.112

New Jersey

• In August 2005, approximately 300 loaders, truck drivers, and other members of Teamsters Local 830 in Pennsauken, New Jersey, went on strike over health care issues. The issue surrounds Harold Honickman, the owner of the plant, who asked each worker to pay more than $100 a month for health care coverage. The President of Local 830 commented on the Honickman's request saying that “It's outrageous that the owner of this company would ask our hardworking members to shell out money for health care...The company is claiming it has an economic need, but Honickman is one of the wealthiest people in the United States.”113 Honickman owns a number of Pepsi bottling and delivery plants in Southern New Jersey. He was also on the 2004 Forbes wealthiest Americans list. On September 16 the workers ratified a new four-year contract. The union was able to fight off the company’s attempt to force workers to pay for health care coverage.114

• About 700 drivers, stock clerks, warehouse workers, sales representatives, vending machine repairers and production personnel struck at four Pepsi Bottling Group facilities in Piscataway, Moonachie, Asbury Park and Hanover in June 2001. The workers went on strike over salaries, overtime pay for commission based workers and workshift issues.115 Workers agreed to a new contract after 7 weeks on the picket lines while Pepsi continued to run operations with managers and replacement workers. No real gains were made for the workers.116

• In March 2003, Pepsi Bottling Group settled more than eight years of litigation agreeing to pay more than $25 million to workers for overtime they had worked. The case began in 1995 when the State Labour Department fined Pepsi for failing to pay overtime to its customer service representatives at 5 New Jersey facilities. The workers fought Pepsi all the way to the Supreme Court and finally prevailed.117

Texas – In November 2002 close to 70 workers at the Pepsi Bottling Group’s (PBG) Austin voted to join Teamsters Local 657. The workers voted to unionize when PBG suddenly changed the pay scale from an hourly rate to a commission system which resulted in a pay cut. When the employees sat down with the company to agree on a contract, PBG refused to negotiate. The

115 The Associated Press, “Pepsi workers picket at four bottling facilities”, June 2, 2001
workers say that management has skipped scheduled meetings and consistently refused to offer anything beyond a contract the union has repeatedly found unacceptable. It is believed that the company is trying to slow down the process until the workers become frustrated with the union and vote to decertify. Workers claim that PBG has withheld pay increases received by nonunion employees at other PBG locations in order to discourage the unionized workers. While PBG claims that they have been bargaining in good faith, the National Labor Relations Board (NRLB), designed to arbitrate labour disputes between unions and management, has filed five complaints against PBG in Austin. A complaint filed by the NRLB indicates that the union’s charges of bargaining in bad faith hold water. Regardless of the NRLB’s actions, PBG continues to claim innocence. As of September, 2005, there is no update on the situation.

Plant closures

PepsiCo announced in September 2004 that it would be closing four facilities across the United States. The company announced that it would be closing 4 Frito-Lay plants located in Allen Park, Michigan, Council Bluffs, Iowa, Beaverton, Oregon and Visalia, California. The closures will result in the elimination of approximately 780 jobs. The day after the move was announced, the Mayor of Allen Park, Marcy DeGiuli-Galka called the closure a “devastating loss of both jobs and tax base at a time of already high unemployment...This impact will send shock waves not only through Allen Park, but also through Downriver and the state of Michigan.”

4.3 Environmental Track Record

Recycling

Pepsi has been the target of environmental groups over its poor track record in using recycled plastic for its beverages. The GrassRoots Recycling Network and the Container Recycling Institute said in 2002 that Pepsi, along with Coke, are “responsible for a dramatic increase in packaging waste over the last ten years” and that the two companies are “trashing America.” Industry statistics show that waste from aluminum cans, plastic and glass bottles in the United States doubled between 1992 and 2000. Pepsi as well as Coke have a history of opposing bottle bills – a deposit law that places deposits ranging from 2.5 to 10 cents on beverage cans and bottles – through their extensive lobbying machinery. Pepsi opposes a national bottle bill because they believe production costs will rise leading to a price increase for customers. Deposit systems already in place in 10 US states have achieved recycling rates over 70%. In addition to their opposition to bottle bills, the company has fought environmental investment groups who want to increase the company’s use of recycling. Pepsi contacted the Securities and Exchange Commission in December 2000 requesting that the investors’ resolution be thrown out before shareholders could vote on the matter.

In 1990 Pepsi committed to using 25% recycled material in its plastic bottles, but quickly decided that this level would be too costly for the company. In the wake of Coke’s announcement that they were using 10% recycled plastic in their bottles in 2002, Pepsi again committed to using recycled material, this time 10%. Recycling advocacy groups however, are apprehensive about Pepsi’s commitment.

5.2 Suppliers

Some of PepsiCo’s suppliers include:

- **Rexam** – Aluminum cans and PET bottles.
- **Plastipak Packaging In.** – This US company supply’s Pepsi with plastic packaging, including pet bottles.
- **Crown Cork and Seal** – Supply’s Pepsi with aluminum cans.
- **Southern Gardens Citrus** – Supply’s Tropicana with not-from-concentrate and concentrated orange juice.
- **Walther L., and Sons, Inc.** – This Michigan family farm supply’s Frito-Lay with its potatoes.
