

**PROGRESSIVE MASSACHUSETTS
2020 LEGISLATIVE
ENDORSEMENT QUESTIONNAIRE**

Date: 5/3/2020

Candidate: Brendan Roche

Office Sought: State Representative, 1st Bristol

Party: Democratic

Website: www.brendanroche.org

Twitter: @BrendanRocheMA

Facebook: www.facebook.com/BrendanRocheMA/

Instagram: @BrendanRocheMA

OVERVIEW

We view our questionnaire as an educational resource, for both candidates and voters, on progressive approaches to the issues. It provides candidates the opportunity to address a number of important issues beyond the surface talking points, which progressive voters find extremely valuable when making a decision.

Our Questionnaires starts with an "About You" section and ends with an opportunity for you to include additional remarks beyond what we asked.

The bulk of our questionnaire is focused on the issues outlined in our [Progressive Platform](#), which also inform our [Legislative Agenda](#). We are interested in your overall philosophy as well as your views on specific policy and legislation.

Each section features charts or graphs (with links to sources) that illustrate one or more facets of the issue under discussion.

We encourage you to expand your answers beyond "yes/no" in the additional comments space provided on the form, but please keep answers < 150 words.

Issue Subsections:

- A. Revenue and Taxation
- B. Jobs and the Economy
- C. Education
- D. Health Care
- E. Housing
- F. Racial and Social Justice
- G. Good Government and Strong Democracy
- H. Sustainable Infrastructure and Environmental Protection

*Our questionnaire is comprehensive and will take time to complete. Please develop your answers in a separate document before inputting them into the submission form.
(progressivemass.com/questionnaire)*

I. About You

1. Why are you running for office? And what would be your top 3 legislative priorities if elected?

BR: I am running for office because our state legislature is not doing enough and Massachusetts can be doing a lot better. We have fallen behind other states who just won democratic majorities in push progressive legislation. I believe we are looking too close at day to day issues and not thinking long term about how to deal with the challenges we have.

My 3 campaign priorities are Improving Public Transportation, Dealing with the challenges of climate change and make equitable and affordable education. I am also adding a list of necessary changes in a post Covid-19 world.

2. What prepares you to serve in this capacity?

BR: I have been active locally with political organizations and campaigns. I am a life long member of the community and see the challenges we are facing locally as well as statewide

3. What do you view as the biggest obstacles to passing progressive policy at the state level?

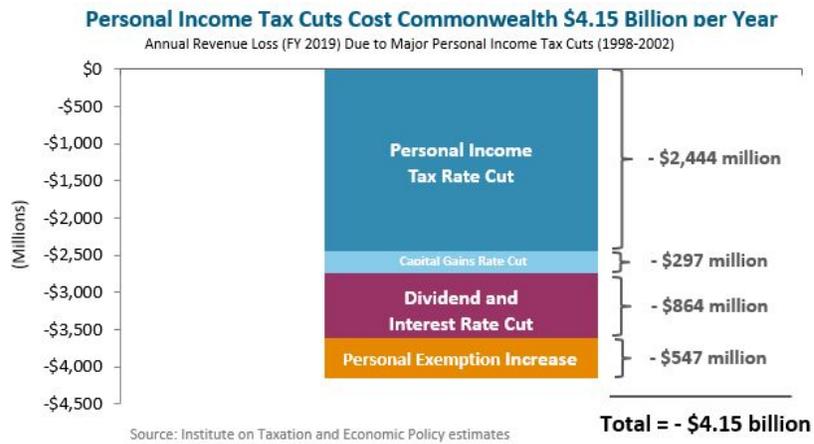

BR: I view the organization of the House of Representatives and many members currently in it as the barrier to passing legislation we need in Massachusetts.

II. The Issues

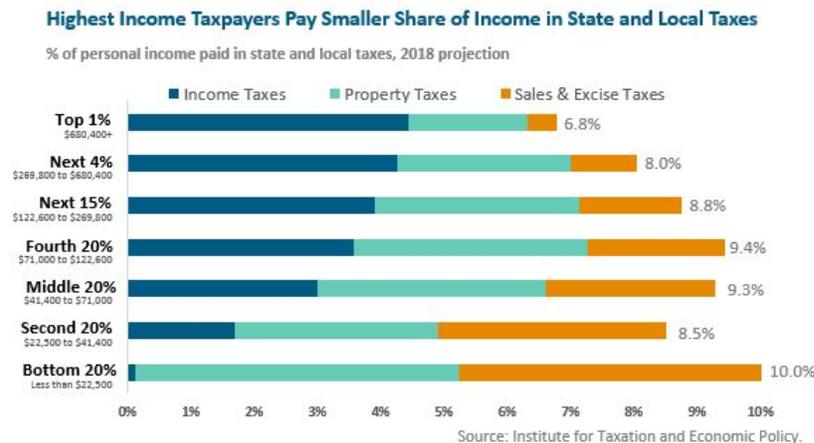

A. Revenue and Taxation

Between 1977 and 2016, Massachusetts [reduced state taxes](#) by more than all but two other states. Because of income tax cuts enacted between 1998 and 2002, Massachusetts loses over \$4 billion in tax revenue *each year*--\$4 billion that is not invested in our roads, bridges, schools, parks, and services, all of which have historically been part of why MA is a great place to live. Such cuts to the state income tax have meant increasing reliance on fees, as well as sales, gas, and property taxes, exacerbating the overall regressivity of the system. Regressive taxation strains low- and middle-income families, and reduced revenue collection curtails our ability to invest in vital infrastructure. It also restricts legislators' ability--and willingness--to pass new and visionary legislation, as there is a continual shortage of funds for existing priorities.

Declining revenues have meant drastic cuts, limiting our ability to invest in our communities and future economic stability.

Massachusetts state and local taxes are regressive.

1. **Please explain your principles and proposals as relate to this issue, and what work you personally have done to advance them (legislation, community work, published writings, etc.).**

BR: I believe the more well off need to be taxed more so we can have a more equitable economy and a more progressive tax structure. I agree with passing the millionaire's tax and I hope we can work to pass a larger reform towards a more progressive tax.

2. **Corporate Tax Breaks.** Corporate tax breaks cost Massachusetts **more than \$1 billion in foregone revenue** each year. Companies can secure access to such tax breaks due to political connections whether or not the promised benefits ever materialize. **Which of the following accountability steps would you support?**

- a. Collecting and publicly disclosing information about the benefits to the state from any tax break?
- b. Repealing any tax break that does not provide the intended benefits in a cost-effective manner?
- c. Establishing sunset dates for all tax breaks so that they must come up for periodic review?

3. **Fair Share.** Would you support a constitutional amendment to increase the income tax on income over \$1 million by 4% (Fair Share Amendment, sometimes referred to as the "Millionaire's Tax")?

BR: YES.

4. **Progressive Revenue.** Massachusetts will not see new revenue from the Fair Share Amendment until 2023, but we have unmet needs now (and will still even with the Fair Share Amendment). Which policies would you support to make a more progressive tax code?
 - a. Raising the corporate minimum tax for larger companies? (The corporate minimum tax is currently only \$456.)
 - b. Imposing a tax on the portion of corporations' US profits that are shifted to offshore tax havens?
 - c. Raising the corporate tax rate from 8% to 9.5% (where it stood in 2009)?
 - d. Raising the tax on long-term capital gains from 5% to 8.95%, in line with states like New York and Vermont?
 - e. Levying a modest tax on university endowments greater than \$1 billion?

BR: I am unsure on the tax on university endowments. I am willing to listen more to how this would be done and what do university endowments get used for if at all.

B. Jobs and the Economy

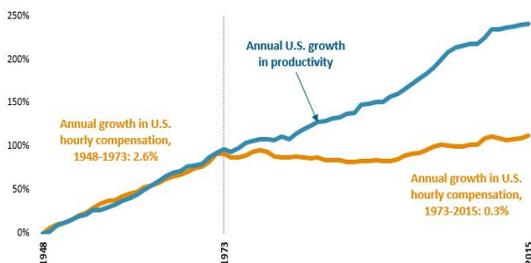

Massachusetts ranks as one of the top ten [most unequal states](#), as the gains from economic growth have disproportionately benefited the already well-off. Compounding this, we are one of the most expensive states in the country for [health care](#), [housing](#), and [child care](#), all of which strain wages. A strong economy depends on strong wages, as workers spend and help local economies thrive. Although the recently passed minimum wage increase will eventually lift the minimum wage to \$15 per hour, this is [still not a living wage](#) for many.

In recent decades, unions have been under attack. However, unions played -- and continue to play -- a pivotal role in creating a strong middle class. With weaker unions (or no unions at all) come weaker social and economic rights and an imbalanced economy.

Productivity has grown significantly since the 1970s, but it is not being reflected in higher wages.

A Large Gap Has Opened Between Wage and Productivity Growth Since 1973

Cumulative Change in U.S. Hourly Wages for Private-Sector Production/Non-Supervisory Workers and Net Productivity, 1948-2015

Source: Economic Policy Institute analysis of unpublished Total Economy Productivity data from Bureau of Labor Statistics' Labor Productivity and Costs program, wage data from the Bureau of Labor Statistics' Current Employment Statistics, Bureau of Labor Statistics' Employment Cost Trends data, and the Bureau of Economic Analysis' National Income and Product Accounts
Note: Wages are the inflation-adjusted average hourly compensation of private-sector production/nonsupervisory workers.

Wages for most MA workers have remained stagnant since the Great Recession.

Wages For Most MA Workers Have Stagnated Since Great Recession

Real Value of Hourly Wage for Selected Wage-Earning Groups in MA and U.S., 1979-2016 (2016\$)

Source: Economic Policy Institute analysis of Current Population Survey data (deflated using CPI-U-RS).

1. **Please explain your principles and proposals as relate to this issue, and what work you personally have done to advance them (legislation, community work, published writings, etc.).**

BR: I believe we need a fair wage for all workers and to work for more affordable housing. I believe unions are one of the strongest organizations for workers's rights and we would be worse off without them. We need to have one Fair Wage for all workers which means removing the sub-minimum wage for tipped workers.

2. **Fair Wages. Do you support eliminating the subminimum wage for tipped workers in support of one fair wage?**

BR: YES.

I believe this is essential because the workers are harmed economically, emotionally and sometimes physically due to working for tips. This will help more people out of poverty, especially women since they are more likely to have a tipped job. This also is problematic with unemployment benefits as this is the standard used to pay out and the tips are not included.

3. **Wage Theft. Do you support holding businesses responsible for the wage violations of their subcontractors when the work they do is substantially connected to the company's operations?**

BR: YES.

4. **Overtime. Would you support updating MA's state overtime law to restore overtime pay protections to low- and moderate-income salaried workers when they work more than 40 hours a week?**

BR: YES.

This was a very disappointing inclusion to the compromise bill earlier this term. People should be paid for their work and if they work more than 40 hours a week they should be given overtime pay. This harms families since people have to decide between wages or family time, and that should not be a choice someone has to make without compensation.

5. **Fair Scheduling. Many workers in the service sector face irregular working hours, making it difficult to plan for other life events. Do you support providing workers the right to 14 days advance notice of hours and the right to request specific hours without retaliation from the employer?**

BR: YES.

Fair scheduling is needed so people can plan daycare, family plans, events and other things. Without the ability to plan for their families needs while working, this harms everyone. This forces a decision between wages and family which is not fair to the worker.

6. **Unions. Since the 2010 election, a number of states have rolled back the collective bargaining rights of public workers as part of a well-funded, nationwide assault on unions, led by wealthy, conservative donors. Would you oppose any effort to roll back the collective bargaining rights of state or municipal employees?**

BR: YES.

Collective Bargaining is important for workers to get necessary benefits for the work they do.

7. **Mandatory Arbitration. Would you support legislation to prohibit the use of mandatory arbitration provisions in employment contracts, i.e., requirements that an employee forfeit the right to sue the employer for discrimination, nonpayment of wages, or other illegal conduct?**

BR: YES.

This puts all of the burden on the employee for the employer's actions which is not fair. We need to be able to have employees' complaints removed from the power structure built by the business and have a fair hearing on their complaints.

C. Education

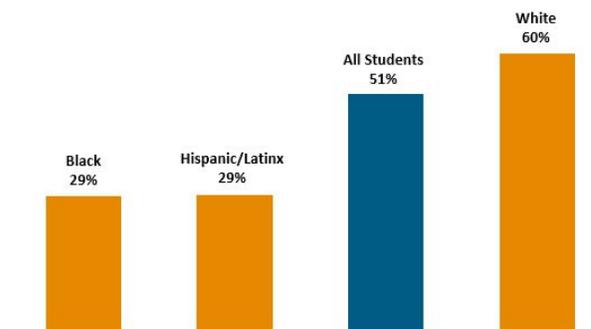

The promise of public education has always been as a gateway to opportunity and mobility for all, regardless of economic circumstances, a cornerstone of the American dream for all residents. Although our public education system gets high marks overall, it remains one of the [most unequal](#) in the country. Powerful corporate interests are promoting false solutions and working to undermine public schools, teachers, and unions. These groups invest millions of dollars to promote the expansion of privately run charter schools, which siphon money from our public K-12 districts while largely excluding students with the greatest needs. Costly, mandated standardized test results are used to label schools as “failing” and justify these privatization schemes.

Most of the [fastest-growing occupations](#) require education beyond a high school diploma, but Massachusetts has been disinvesting from public higher education for the past two decades. This has led to higher tuition costs, putting students at risk of long-term debt or making higher education out of reach for them entirely.

Massachusetts has significant achievement gaps reflective of resource gaps.

Massachusetts Has Significant Achievement Gaps for Youth of Color in 4th Grade Reading

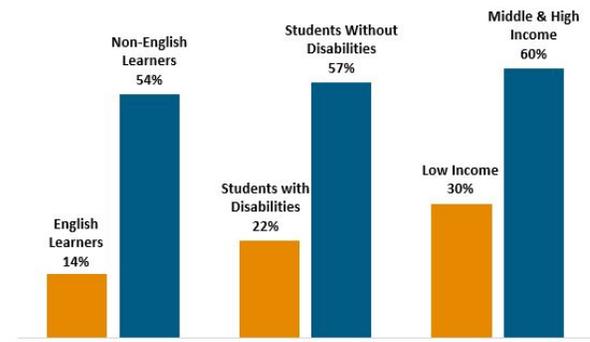

Share of MA 4th Graders Proficient on the 2017 NAEP Reading Exam, by Student Race, all students

Source: National Center for Education Statistics, 2017

Massachusetts Has Significant Achievement Gaps for Disadvantaged Youth in 4th Grade Reading

Share of Mass. 4th Graders Proficient on the 2017 NAEP Reading Exam, by Student Category

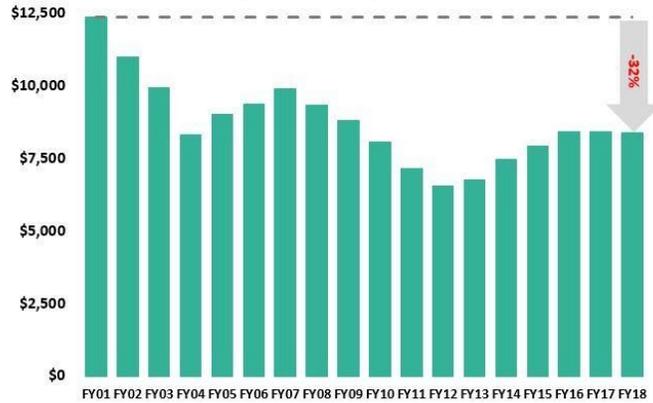

Source: National Center for Education Statistics, 2017

Massachusetts has been disinvesting from higher education and shifting the cost burden onto students.

Per Student, MA Has Cut Higher Ed Funding by 32 Percent Since FY 2001

State spending on higher education per resident student, FY 2001-2018 (2018\$)

Note: FY 2007 total is adjusted downwards to account for the fact that significant funding during this year was for capital investments that supported activity during other fiscal years.

- 1. Please explain your principles and proposals as relate to this issue, and what work you personally have done to advance them (legislation, community work, published writings, etc.).**

BR: We need to fully fund our promises to school funding, we need to make college more affordable, and we need to promote technical schools as alternatives that can provide a great education and great path to various job opportunities.

- 2. Universal Pre-K. Do you support creating universal, free Pre-K, accessible to any resident of Massachusetts, integrated into the public school system?**

BR: YES.

Yes, I agree that this is the best way to have universal pre-K. Since we already have the public school system set up, it will be a lot easier to incorporate.

- 3. Equitable Funding. In 2019, Massachusetts updated its 25-year-old education funding formula and committed to \$1.5 billion more in investment in public schools. How will you make sure the state follows through with this promise?**

BR: We should pass the Fair Share Amendment and we need to find other possible revenue sources at least for the short term to fill the gap on implementation. Maybe some way to get money back from charter and private schools.

- 4. Standardized Testing. Do you support a three-year moratorium on the high-stakes uses of standardized testing? (High-stakes" uses include high school graduation, teacher evaluation, and assigning ratings to schools.)**

BR: YES.

Yes this is causing more problems, with high anxiety for students and hurting creativity in the classroom.

- 5. Charter Schools. In 2016, MA voters overwhelmingly rejected a ballot initiative to lift the cap on charter schools given the millions of dollars it would have siphoned away from public school districts.**

- a. Do you support keeping the cap on charter schools? **YES.**
- b. Would you support legislation to bring greater accountability to charter schools by requiring them to adhere to the same disclosure and disciplinary standards as public school districts? **YES.**

BR: Charter schools pull away too much from public schools without the oversight and fair application process. Charter schools should be accountable to the school committees of the districts of the children in their school. It is public money so we should be able to track how it is used.

6. **Sex Education. Do you support requiring public schools that teach sexual health education to provide age-appropriate, medically accurate information that is inclusive of all sexual orientations and gender identities and includes the effective use of contraception?**

BR: YES.

This is long overdue.

7. **Higher Education Access. Do you support granting in-state tuition and financial aid to undocumented students?**

BR: YES.

Most undocumented students were brought here for a better life from parents and have been members of their local communities. They should get the benefits as any other resident.

8. **Debt-Free College. Do you support making tuition (and mandatory curriculum fees) free at public colleges and universities?**

BR: YES.

Yes, we need to cut down on student debt, which can tie down people for decades and harm their long term family benefits. This doesn't remove all costs but any decrease is better than nothing.

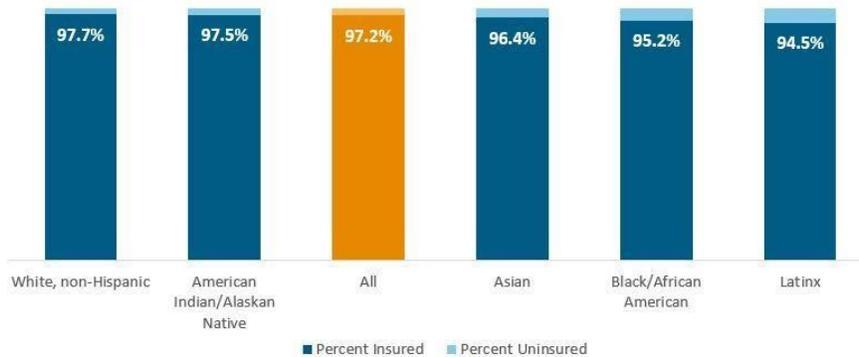

D. Health Care

Massachusetts has led the way in providing near universal health insurance coverage, with [97% of the state](#) having health insurance. But until that is 100%, we haven't reached truly universal coverage or tackled critical barriers to accessing care. Disparities in insurance coverage and health care access continue to exist along income, racial, and education lines. Premiums continue to rise, and high deductibles mean that many do not get the health care they need -- or suffer from long-lasting debt if they do. We still spend an oversized portion of public and private money on health care, but without necessarily achieving better health outcomes.

We have yet to achieve truly universal coverage, with continued disparities along racial lines.

Barriers to health insurance coverage remain for some

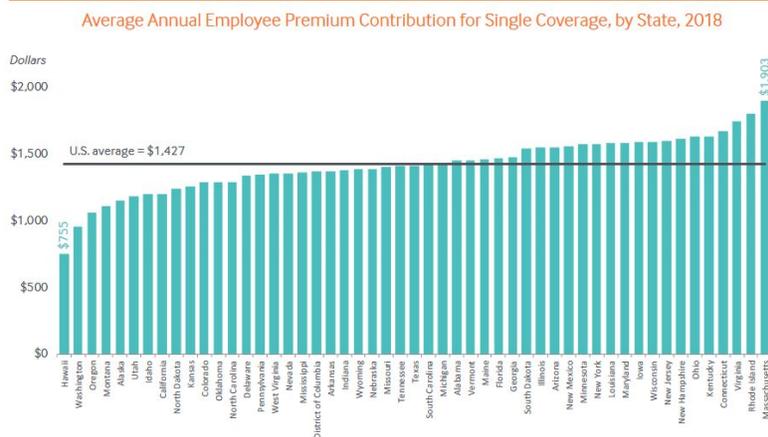

Percent with health insurance in Massachusetts, by race, 2017.

Source: U.S. Census Bureau American Community Survey.

*Note: Use particular caution when considering the American Indian/Alaskan Native data, because of small sample sizes. This chart does not include Native Hawaiian/Pacific Islander because the sample was too small and therefore was not included in the Census Bureau's data.

MA has the highest health insurance premiums in the US.

Note: Employee premium contributions are for insurance policies offered by private-sector employers in the U.S.
Data: Medical Expenditure Panel Survey--Insurance Component (MEPS-IC), 2018.

1. **Please explain your principles and proposals as relate to this issue, and what work you personally have done to advance them (legislation, community work, published writings, etc.).**

BR: I believe we need to move towards a Medicare for All/Single payer system. Too many people are falling through the cracks and have thousands of dollars in unexpected healthcare costs not covered by insurance. We need to disconnect health insurance from employment so when people lose jobs they do not lose their healthcare. It will also allow entrepreneurs to begin working on their dreams without the worry of providing healthcare to their family or workers.

2. **Single Payer. Do you support enacting a single payer health care system in Massachusetts, which would guarantee health insurance as a right?**

BR: YES.

Healthcare is a human right.

3. **Reproductive Rights. In Massachusetts, women under eighteen seeking an abortion must obtain parental consent or judicial authorization. This can lead to young women going out of state, or risking their lives and health with illegal or self-induced abortion. Would you support repealing this restriction?**

BR: YES.

4. **Harm Reduction. An essential part of addressing the opioid crisis, safe consumption sites allow medical professionals to respond to overdoses and engage participants in medical and behavioral health services. Would you support the legalization of SCSs?**

BR: YES.

Yes, I would like more information to follow up, but I like the concept and want to know more. This is an addiction and needs to be treated that way. Not as a crime.

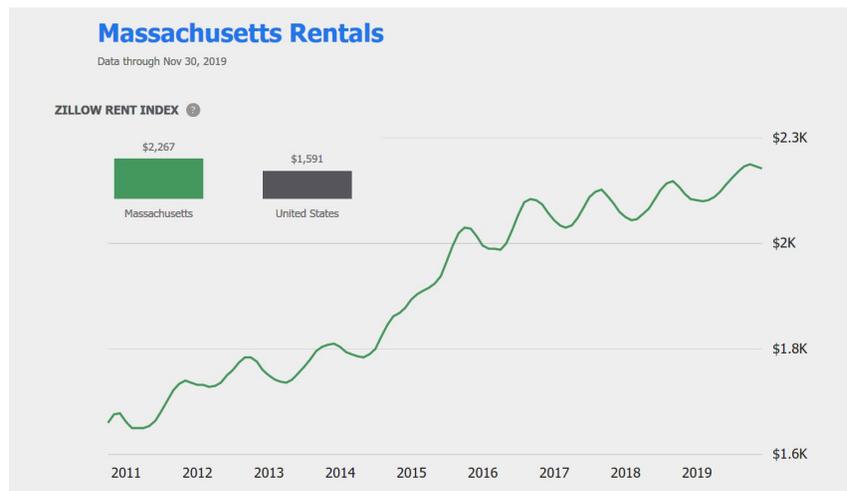

5. **Pandemic Response. How would you evaluate the state's response to the Covid-19 pandemic?**

BR: Slow. We were faster than most places in U.S. but we could have been better and still be better. I believe we have not passed good enough legislation to address all of the challenges we have seen come out of the pandemic. We need to help people with government checks, we need to improve access to voting with universal vote by mail and various other things.

E. Housing

Massachusetts has a lot to offer, but that does little if people can't afford to live here. The [US News & World Report's annual state rankings](#) put Massachusetts at #41 in housing affordability (and #43 in cost of living). A worker earning minimum wage in Massachusetts would have to work [91 hours a week](#) to afford a modest one-bedroom rental home at market rate (and 113 hours for a modest two-bedroom). Over the last ten years, the need for affordable housing has increased, while funds for affordable housing have decreased at both federal and state levels. This is unsustainable. It has led to expanding economic inequality, increased homelessness, and damage to our economy, as talented workers often leave the state for less expensive regions.

Monthly median rents have gone up by more than one-third since 2010, outpacing income growth.

(source: zillow.com)

- 1. Please explain your principles and proposals as relate to this issue, and what work you personally have done to advance them (legislation, community work, published writings, etc.).**

BR: We need to provide more affordable housing for young people and families to move into after education, and for elderly so they can downsize from their empty nest homes while living in the same communities. We can do a better job with local zoning laws to improve conditions around the state. I recently worked on the Master Plan in Mansfield that has plans to address these issues locally.

- 2. Funding. Would you support legislation that would allow cities and towns to impose a fee on real estate transfers to generate revenue for affordable housing, with the ability to create local exemptions as appropriate?**

BR: YES.

This is a creative idea that I learned about for the master plan.

- 3. Tenant Protections. Do you support passing enabling legislation to provide municipalities with the authority to implement rent-stabilizing regulations, just cause eviction protections, stronger condominium conversion and foreclosure protections, anti-displacement zones, and options to help tenants manage the upfront costs of leasing an apartment?**

BR: YES.

Yes, we need stronger tenant protections, so landlords do not kick out renters for selling to big real estate developers.

4. **Zoning Reform/Housing Production. Do you support requiring cities and towns to allow multifamily housing to be built as of right within 1 mile of transit stations?**

BR: YES.

Transit Oriented Development is a great policy to improve housing and public transportation access. With an architecture and design background and working on the Master plan, this is a priority of mine with housing proposals.

5. **Eviction Sealing. Today, when a tenant exercises their legal rights in housing court, it creates a permanent record. Eviction records create lasting stigma, are error prone and impair access to stable housing. Would you support legislation to seal eviction records so that both tenant and landlord could move on with their lives after three years?**

BR: YES.

If there is a dispute and it is out of the ordinary for either of them, it should not be used against them for access to other housing.

F. Racial and Social Justice

Massachusetts must continue to strive to be a state that welcomes and embraces all of its residents and combats prejudice and discrimination of all kinds.

Mass incarceration in Massachusetts has proven socially and economically destructive, breaking apart communities across the state. From 2011 to 2016, [spending on prisons](#) grew faster than any other part of the Massachusetts budget, while funding for necessary services languished. The average cost per year to house an inmate in the Massachusetts Department of Corrections is [more than \\$60,000](#), money that could be better reinvested into the communities that have suffered from decades of misguided and racially discriminatory “tough on crime” policies. To achieve “justice for all,” we need a judicial system that does not disproportionately target communities of color and the poor and that does not criminalize public health issues such as addiction. The April 2018 criminal justice reform bill made strides forward, but there is more work to do.

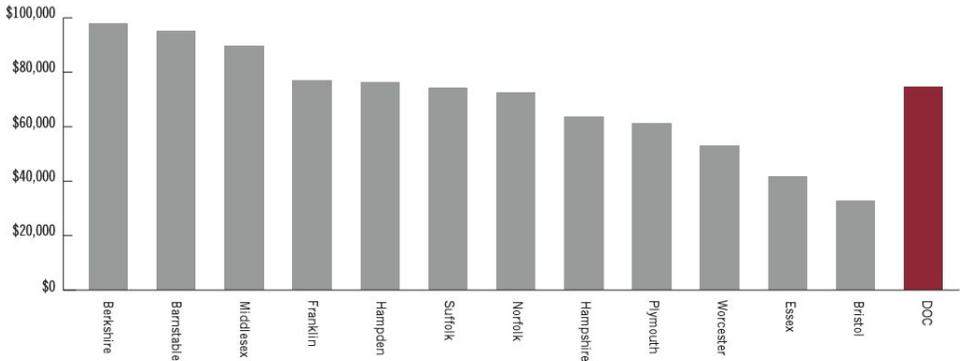

Immigrants make up 16% of Massachusetts’s population; however, demagoguery against, or indifference to, immigrant populations has historically been a mainstay of Massachusetts politics. As the Trump administration in Washington ramps up a xenophobic mass deportation agenda, it is important for states like Massachusetts to take leadership in protecting and advancing the rights of our immigrant communities and making clear that all are welcome.

Significant racial disparities exist in incarceration in Massachusetts.

Imprisonment by Race/Ethnicity (2014)	
White imprisonment rate (per 100,000)	81
Black imprisonment rate (per 100,000)	605
Hispanic imprisonment rate (per 100,000)	351
Racial/Ethnic Disparity in Imprisonment (2014)	
Black : white ratio	7.5
Hispanic : white ratio	4.3
Juveniles in Custody (2015)	
Juvenile custody rate (per 100,000)	66
White custody rate (per 100,000)	22
Black custody rate (per 100,000)	222
Latino custody rate (per 100,000)	172
American Indian custody rate (per 100,000)	0
Asian custody rate (per 100,000)	7

Massachusetts spends large (and growing) sums per inmate -- while still not providing for basic needs.

Figure 4: Estimated expenditure per inmate, FY 2019

Source: MassINC's analysis of Department of Correction Weekly Count Sheets, April 2018, and average House and SWM FY 2019 budget proposals (adjusted upward based on final expenditures, FY 2011 to FY 2018)

1. **Please explain your principles and proposals as relate to this issue, and what work you personally have done to advance them (legislation, community work, published writings, etc.).**

BR: We need to decrease the number of inmates and provide better resources within correctional facilities to prevent recidivism. We need to also recognize the rights of our immigrant populations, as they make our communities better. We should not discriminate just because they are not born here. We are a nation of immigrants who came here to achieve better lives and we need to provide that to all immigrants today like we have in the past.

One thing not addressed below is the awful Sheriff Hodgson in Bristol County, who I will do everything I can to be removed from office or voted out.

2. **Police Accountability. Do you support the establishment of an independent review board for police shootings in the Commonwealth?**

BR: YES.

We need to hold poor police officers accountable, so that we can remove them. We need to help decrease the tension between communities and police and this is one step in the right direction

3. **Sentencing Reform. The 2018 criminal justice reform bill was an important first step in reducing mass incarceration. However, in our "liberal" state, incarceration rates remain much higher than they are in other countries, and sentencing laws can be even more punitive than those in states viewed as conservative. Which of the following reforms would you support?**

- a. Eliminating mandatory minimums for opioid-related offenses?
- b. Raising the age of criminal majority from 18 to 21, in line with research that shows that young offenders served by a juvenile system are much less likely to reoffend and more likely to successfully transition to adulthood?
- c. Decriminalizing consensual sexual activity between adolescents, by creating an exception to the statutory rape law for youth close in age?
- d. Eliminating the sentence of life without parole, which is costly and has been shown to be racist in its application?

BR: I agree with all, but especially life without parole, because everyone should be given an opportunity to change and possibly receive parole.

4. **Solitary Confinement. In Massachusetts, prisoners can be sentenced to 10 years of solitary confinement—per infraction. The UN defines holding someone in solitary confinement for more than 15 days as torture. Do you support limiting the use of solitary to no more than 15 consecutive days?**

BR: YES.

Solitary Confinement is a destructive practice that is harmful and inhumane. Any step towards eliminating it is good.

5. **Prison Visitation. Maintaining connections with friends and family outside prisons is one of the most important factors in ensuring successful reentry. In March 2018, the DOC severely limited the ability of prisoners to receive visits and the rights of family and friends to visit their loved ones in prison. ([Read more on this here.](#)) Do you favor ending these restrictions?**

BR: YES.

All financial restrictions should be removed for prison visitation and communication.

6. **Prison Profiteering. While Massachusetts does not have private prisons, the DOC**

invites private companies to profit off of the families of prisoners by price gouging inmates who have no alternatives but to buy from the sole providers of goods in prisons. Do support ending the price gouging of inmates for necessary items and requiring DOC to adequately supply inmates with the basic requirements necessary for life to keep in contact with their families and maintain good health and hygiene?

BR: YES.

All financial costs on inmates are terrible and should be removed. Communication with the outside world by phone or computer are key to an inmate reconnecting with society following release

7. **Safe Communities Act. Do you support the Safe Communities Act, which limits local and state police collaboration with federal immigration agents, bars law enforcement and court personnel from inquiring about immigration status, and ensures due process protections?**

BR: YES.

Immigrants are members of our communities and we should not rip apart families and communities because of a broken immigration system that we can't fix as a state.

8. **Work and Family Mobility Act. Do you support removing immigration status as a barrier to applying for a license or learner's permit?**

BR: YES.

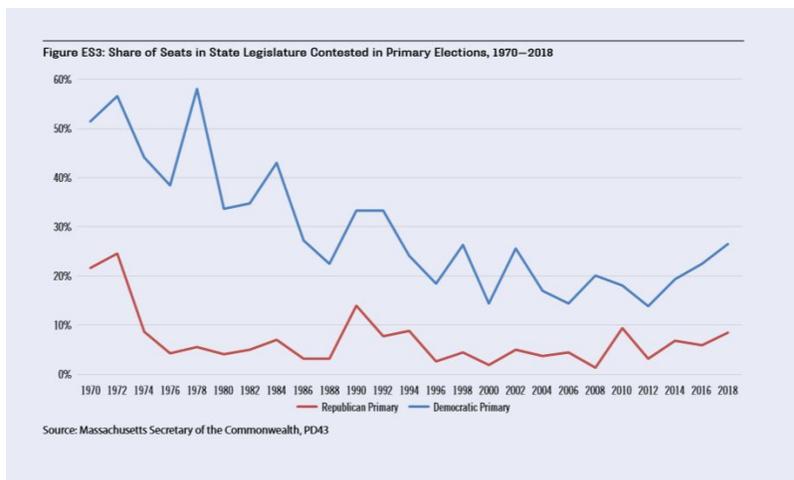

We need to allow immigrants to provide for their families and having a license is critical. Allowing them to go through the proper training and testing will make the roads safer for everyone

G. Good Government and Strong Democracy

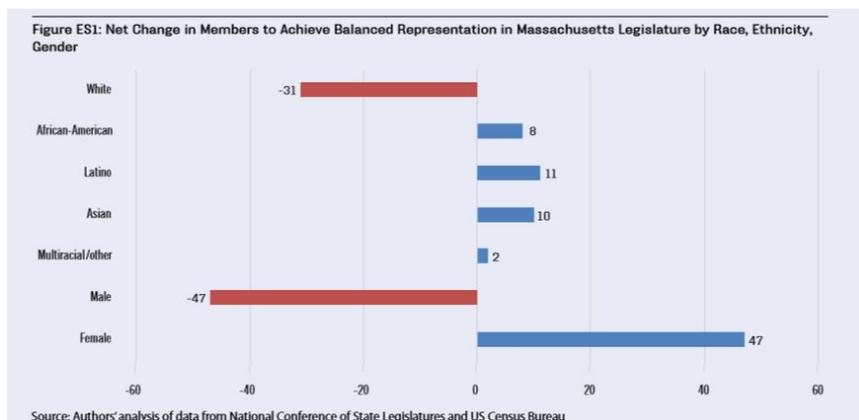

A strong democracy depends on a transparent and representative government and an engaged public. Too often, however, we see centralized, unaccountable power and barriers to participation. An undemocratic, centralized power structure on Beacon Hill makes it easier for lobbyists to target the top and undermine the system. Despite recent reforms, a weak public records system stymies government accountability: MA is one of only two states where all three branches of state government claim to be exempt. A strong democracy requires an engaged electorate, but voter turnout in midterm elections, and especially local elections, remains low. Although election modernization legislation in 2014 and 2018 helped bring much-needed reforms, we still lag behind states in New England and around the country in making voting accessible (Maine, for instance, has allowed for Election Day Registration since the 1970s).

A centralized power system, a skewed campaign finance system, and restrictive voting laws together help create a situation in which our elections are the [least competitive in the country](#).

Our elections have grown less competitive over the past four decades.

Our legislature is not reflective of the population as a whole.

1. **Please explain your principles and proposals as relate to this issue, and what work you personally have done to advance them (legislation, community work, published writings, etc.).**

BR: We need to have a more public and open government. Voting access is one of my strongest issues that I care most about. I believe we need universal vote by mail (especially now), Election Day Registration, lower barriers to running for office especially in the state legislature. NH may have a lot of turnover in the their state legislature but I think that helps more people be active within their communities. We need to have better public records laws and access to our lawmakers.

2. **Public Records Law. Massachusetts is one of only two states where the Governor's Office, the Legislature, and the Judiciary claim full exemption from the public records laws. Would you support eliminating this exemption?**

BR: YES.

3. **Legislative Transparency -- Part I. The Massachusetts Legislature lacks many basic transparency measures found in other state legislatures around the country. Would you vote in favor of making the following items available online...?**

- a. All committee votes, whether taken by electronic poll or formal roll call?
- b. All written testimony submitted for or against bills?
- c. Reader-friendly summaries of bills currently in or reported out of committee?

BR: All of the above agree with, but especially with a change to bill summaries, because the current ones are terrible and confusing.

4. **Legislative Transparency -- Part II. Legislators only vote to change the rules at the start of the legislative session, but all legislators can model transparency on their own throughout the session. Would you commit to doing the following...?**

- a. Standing for a recorded vote when a colleague asks for one on any amendment which you have co-sponsored?
- b. Making your committee votes available online on your website?

BR: I am not absolutely familiar with committee procedures, but I would do everything I could to make my record public on the issues.

5. **State House Culture. Do you support the creation an independent commission to investigate and report on complaints of workplace and sexual harassment in the Massachusetts Legislature?**

BR: YES.

We need to separate the process of investigating workplace and sexual harassment so all employees are safe from retribution and can have a fair process.

6. **Public Campaign Financing. Our campaign finance system favors incumbency and discriminates against potential candidates who do not have a ready pool of wealthy donors. Do you support the creation of a robust public financing system for state elections?**

BR: YES.

We need to allow for more people to run for office because that will improve our accountability on members of government.

7. **Removing Barriers to Running. The cost of child care can prove prohibitive to working mothers or fathers seeking to run for office. Would you support legislation to explicitly allow working parents running for office to use campaign funds to pay**

for child care?

BR: YES.

This will help a wider expansion of voices from different communities in the State House.

8. **Voting Access.** Which of the following policies to increase voter participation do you support?

a. Election Day Registration?

b. The expansion of early voting to municipal elections and primaries?

c. No-fault absentee voting?

d. Ending the disenfranchisement of prisoners serving with felony convictions (Their right to vote was taken away by ballot twenty years ago)?

9. **Ranked Choice Voting.** Do you support the 2020 ballot initiative to adopt ranked choice voting for state, county, and (non-presidential) federal elections?

BR: YES.

We need this now, especially living in CD-4

10. **Election Integrity.** Do you support requiring **risk-limiting audits** of election results, in which a statistically significant percentage of ballots are hand counted to ensure that the reported winner was the actual winner, preserving the integrity of elections from foreign interference, technological glitches, or simple human error?

BR: YES.

We should not be afraid to audit our election processes to make sure they work and are done correctly. I believe our paper ballot system is currently the safest and easiest and we can review our process to find ways of improvement.

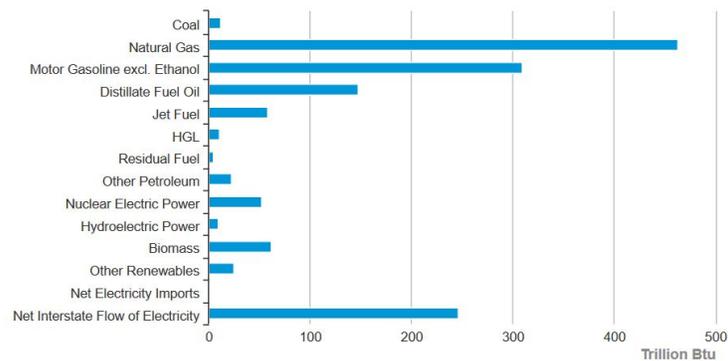

H. Sustainable Infrastructure and Environmental Protection

As a coastal state, Massachusetts will be hit particularly hard by climate change, but we are not responding with the necessary urgency. In order to avoid catastrophic climate change, global carbon emissions need to be [halved by 2030](#) and brought to net zero by 2050. In 2016, the Massachusetts Supreme Judicial Court ruled that the state has failed to meet its legal obligation to set and enforce annual limits on greenhouse gas emissions as outlined in the 2008 Global Warming Solutions Act. Setting and reaching these goals will require the decarbonization of our state economy and a transition away from fossil fuels toward clean, renewable sources of energy. In light of congressional gridlock at the federal level, state government must take a role in incentivizing reduced carbon usage and assisting in coordination between agencies and moving forward local government understanding of looming climate threats.

Public transit must play a role in decarbonizing our transportation system, as well as advancing complementary goals of equity and inclusion. However, Massachusetts politicians have lost their understanding of public transit as a public good that benefits all residents and businesses in Massachusetts, not just those who use it in their daily lives. The greatest evidence of this is their neglect of the MBTA: its debt has grown to nearly [\\$5 billion](#), and it would need [more than \\$10 billion](#) to bring infrastructure and equipment up to a state of good repair. Regional Transit Authorities that serve communities, including Gateway Cities across the state, face enormous capital needs as well.

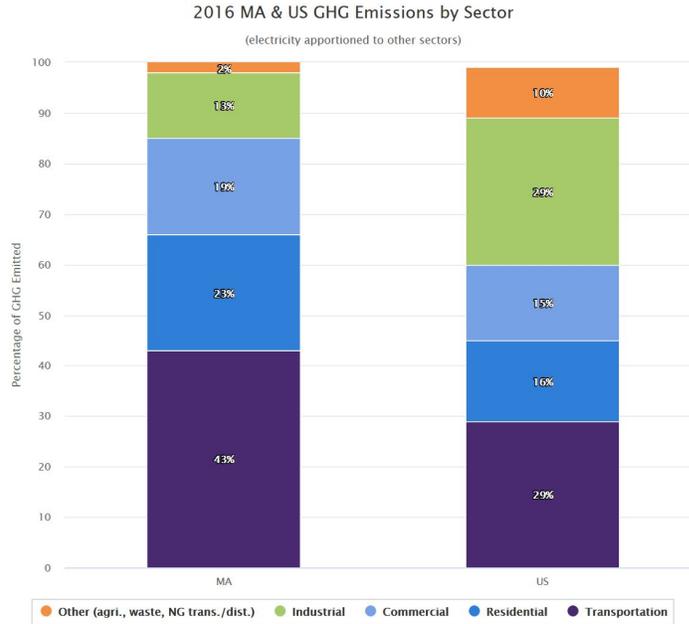

Despite recent progress, Massachusetts is still overwhelmingly dependent on fossil fuels.

Massachusetts Energy Consumption Estimates, 2017

 Source: Energy Information Administration, State Energy Data System

Transportation is currently the largest contributor to greenhouse gas emissions in MA.

- 1. Please explain your principles and proposals as relate to this issue, and what work you personally have done to advance them (legislation, community work, published writings, etc.).**

BR: These are my campaign priorities, public transportation and climate change. A better, cleaner public transportation system is better for our commuters and our environment. We need to electrify MBTA and better use of our regional transit authorities. We also need to pass the road to the green new deal legislation for 100% renewable energy by 2045, equitable carbon pricing and environmental justice. We also need to pass better building codes on top of our stretch code including net-zero options and making the currently policy clear to understand for homeowners, contractors and architects. I can go on for a lot so please follow up if necessary.

- 2. Waste Reduction. Would you support a statewide ban on single-use shopping bags and a requirement that alternatives be more sustainable?**

BR: YES.

We have already passed this in Mansfield and is easy to do statewide.

- 3. Solar Energy. Do you support increasing equitable access to solar power by removing caps on solar generation and restoring compensation for low-income and community solar?**

BR: YES.

We can't get where we need to be with current restrictions.

- 4. Renewable Energy. Do you support a target of 100% renewable energy economy-wide by 2045 and 100% renewable electricity by 2035?**

BR: YES.

5. **Environmental Justice. Successive gubernatorial administrations have made verbal commitments to environmental justice (EJ), and Governor Deval Patrick issued an Executive Order on Environmental Justice in 2014 which has not been implemented. Would you support efforts to codify EJ into law?**

BR: YES.

We need this so the people most harmed by pollution and climate change are not left behind when creating solutions to stop climate change and pollution

6. **Fossil Fuel Infrastructure. Do you oppose the expansion of gas pipelines in the state?**

BR: YES.

7. **Carbon Pricing. Do you support imposing a fee on carbon emissions and using some of the revenue to invest in green infrastructure, especially in frontline communities?**

BR: YES.

This is probably the toughest but most important step in the climate legislation.

8. **Public Transportation. Will you oppose any fare increases to the MBTA or regional transit authorities and work toward the goal of fare-free public transit?**

BR: YES.

We absolutely should not increase fares with the current problems we have with infrastructure. I agree in the goal of fare-free transit, I hope it is not too far away.

9. **Regional Transportation Funding. The unavailability of state funds for infrastructure spending has meant the deterioration of regional transportation systems. Do you support allowing municipalities to place a question on the ballot to raise revenue for local and regional transportation projects?**

BR: YES.

This can help with more locally focused projects that can benefit communities.

III. ADDITIONAL COMMENTS

Limit answer to 150 words or fewer.

Use this space to add any other issues important to your vision for Massachusetts or any other matter you think progressive voters should know about your candidacy.

BR: I believe we need to make broadband internet universal across MA and consider it similar to a public utility.
