

#1 Job Killer in Your District: US TRADE DEFICIT

A Solvable Problem

Trade Deficits Kill Jobs and Growth

There is no record of any other country in history that has run 42 years of consecutive trade deficits

Every billion dollars of net imports costs 6,000 American jobs. So last year's \$566 billion deficit equates to 3.4 million jobs lost

Net Exports Create

- Millions of jobs
- Sustainable economic growth
- Surges in tax revenue
- Increased manufacturing base

Free and Fair Trade Should:

Result in balanced trade. Clinton/Bush/Obama trade has enabled mercantilism, imbalances and job destruction.

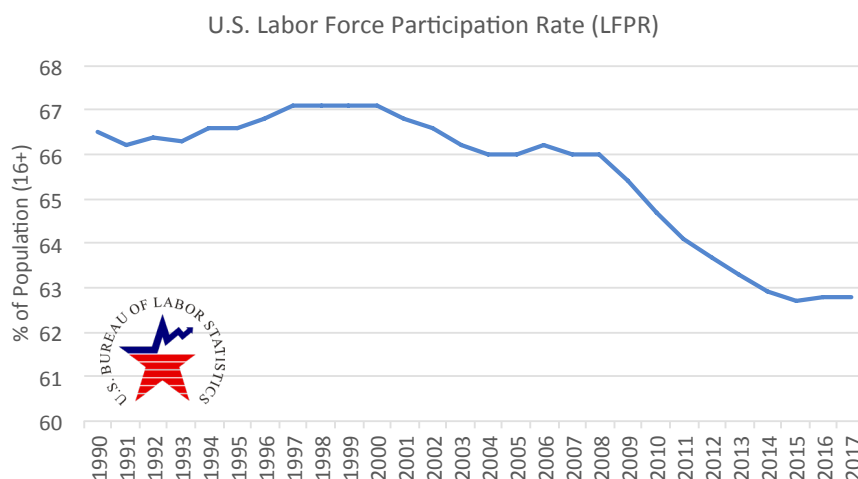

Our Manufacturing

and agricultural supply chains are the economic power! Jobs, innovation, value add, wealth creation, tax revenue.

REMEDY: Congress should establish a national goal to eliminate the trade deficit

Labor Force Participation Rate in Decline:

- The US is the only G7 nation with a DECLINE in LFP since 1998 (Ages 15-64)
- Declined 5% in the last 20 years from 67% in 1998 to 62% in 2018
- Over 8 million people dropped out of the labor force since 1998

A Drag on Growth

#1

GDP
Losses
2.9%

Subtracted 2.9% or \$556 billion from size of America's economy.

#2

Multiplier
Effects
5x

We lost up to 5 times more additional revenue due to multiplier effects from production we did not have because of the trade deficit.

#3

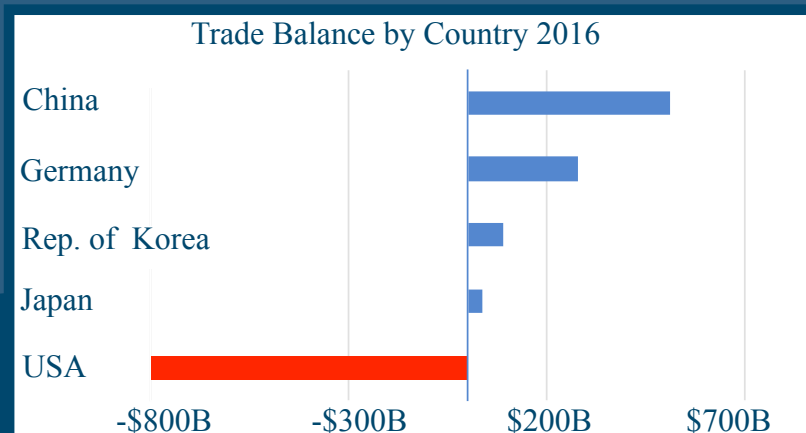

Employment
Losses
5M

Nearly 5 million manufacturing jobs have been lost since 2000. Millions more were lost in industries supporting manufacturing.

#4

Exporting
Growth

Surplus countries grow at the expense of deficit countries like the US.
