YES, I support the Queensland Conservation Council in their proposal to Power Up Queensland with clean renewable energy and to make this the real sunshine state!

I support a safe and prosperous future for all Queenslanders and call on the Queensland Government to make a plan to replace coal fired power stations with clean renewable energy by 2030 to reduce our CO2 emissions by over 400million tonnes, create 11,000 jobs and give us the best possible chance of saving the Great Barrier Reef.
