

List of North American LNG Export Projects

This list of North American LNG export projects was compiled from lists of proposed, under-construction, or completed LNG export projects from the [U.S. Federal Energy Regulatory Commission \(FERC\)](#) (as of 5 January 2017), the [U.S. Department of Energy \(DOE\)](#) (as of 1 February 2017), the [Canada National Energy Board \(NEB\)](#) (as of 14 February 2017), the [British Columbia LNG page](#) (as of 1 February 2017), and the [Nova Scotia LNG page](#) (as of 1 February 2017).

Excluded were projects that withdrew their applications, projects that were rejected/terminated by one of the three agencies and that have not reapplied or stated an intent to reapply, projects only requesting export authorization from an existing terminal, projects only shipping LNG to North American industrial consumers such as mining facilities, and projects that have been publicly shelved/halted with no explicit statement found by our researchers that implies a definite intent to restart development.

BCFD (billion cubic feet per day) figures are sourced from the following sources in this order, using the first available number: [U.S. Federal Energy Regulatory Commission \(FERC\)](#), [U.S. Department of Energy \(DOE\)](#), [Canada National Energy Board \(NEB\)](#), [LNG in BC](#), [Nova Scotia's LNG Opportunity](#).
