

Name: _____

Class: _____

This is your own action plan to help protect coral reefs.

In your plan, please list all the activities you think you could do around your home and at school that could help save the environment.

Your activities might look at ways to save electricity, use less water, or produce less litter. Let your imagination think of all the possibilities!

By following your action plan, you will have a big impact on helping to save coral reefs and the environment. The coral, algae and fish living on coral reefs will thank you for protecting their home.

PLEDGE/ PROMISE:

I promise to do my best to fulfil these environmental activities so that coral reefs and the natural environment are kept beautiful and healthy for me, my family, my friends and future generations to enjoy.
