Economic Fears
Similar to other states, Pennsylvania saw a ratcheting up of its economic fear -- registering 15 points in May, a sharp increase. Six of 10 Pennsylvanians now feel the economy is heading in the wrong direction, with double-digit increases in every subgroup.

President's Numbers Improve
President Trump's job approval and image ratings improved slightly in May. While still polarized, more Pennsylvanians approve of the job Trump is doing than disapprove (52.3% approve/45.7% disapprove). And by a very slim margin, more view him favorably than unfavorably (49.3% fav/48.7% unfav).

Issues Agenda: Pandemic & the Economy
Economic concerns increased in Pennsylvania, as jobs/the economy rank a close second (44.0%) as the most important issue, behind coronavirus (45.2%).
KEY FINDINGS

Crisis Handling: Approve
Just over half of Pennsylvania voters still approve of the President’s handling of the pandemic. Unchanged from last month, 51.8% approve and 46.2% disapprove. Polarization still exists, with independents dissatisfied by 17%.

Most Voters Worried About Getting Coronavirus
72% of Pennsylvania voters indicate they are either somewhat or very worried that they, or someone close to them, will contract coronavirus. Concern crosses age brackets and all regions.

Back to Work: Divided
Pennsylvania voters are divided on maintaining stay-at-home restrictions or going back to work. 51.5% think it’s time to get back to work, while 48.5% believe it’s too early to lift stay-at-home orders. Subgroups most committed to getting back to work include men, Republicans, and rural voters.

Opening the Economy: Divided
Voters were asked if they’d re-open the economy -- even if that meant more people would get coronavirus -- or continue shelter-in-place restrictions -- even if that meant severe job losses and economic disruption. Overall, 50.2% of Pennsylvania voters would re-open the economy, while 49.8% would continue the shutdown.
Presidential Ballot Test: Trump Winning by 4.7%

Last month, the presidential race in Pennsylvania was a dead heat. This month, Trump moved ahead, picking up support from seniors, independents, college-educated voters, and voters in urban and suburban communities.

45.5% Biden / 50.2% Trump
Current Mood
Economic fears rose sharply, while overall mood also took turn for the worse.

Double digit wrong-track increases for all demographic subgroups.
