

# ROSIE RIVETERS

## What is Rosie Riveters?

Rosie Riveters' mission is to provide a fun space for girls ages 4-14 to imagine, create, and play while developing their skills in science, technology, engineering, and mathematics. Our organization is built on the premise that innovation is cultivated where experimentation is encouraged; that failure is not in conflict with success, but a necessary and crucial part of it. Our goal is to equip girls with this mentality and empower them to be strong, confident, and competent in STEM fields.

To correspond with Women's History Month, Rosie Riveters will launch a pilot program starting in March 2016. Through hands on STEM projects—vetted by educators and experts in the respective fields—our hope is not only to encourage girls to participate in STEM, but to keep them engaged through mentorship programs and network building. We invite you to join us on our journey as we seek to help girls develop the "confidence to try," thus arming them with tools they can use to succeed.

---

*Let's teach girls to delete the words 'I can't' from their vocabulary and inspire them to be confident enough to try. Because although they may not always get it right, they will always learn.*
