

Meet Our Team:

BRITTANY

Brittany Greer // Co-Founder

Welcome to Rosie Riveters, I am so excited for you to join us on our journey to empower girls with the "confidence to try" and enrich their lives through the wondrous world of STEM. A little about me: I am the mother to an amazing, strong-willed, funny, sweet, and adventurous two year old little girl who serves as my inspiration for this organization. My little bookworm and I read A LOT, and can frequently be found at the library reading, exploring, and attending storytime. So when the idea for Rosie Riveters was formed the library felt like a natural fit. They are an incredible resource for communities and serve as a neutral zone where girls can come and explore their STEM potential and build their confidence.

In addition to being a mother, I am also the owner and operator of my own strategic communications consultancy with experience in the political, digital, and non-profit sectors. A lover of science and tech, I am constantly inspired by the amazing innovations being made everyday and hope to inspire girls to use their skills in STEM to change the world.

CASEY

Casey Huerta // Co-Founder

As a child, my dream was to become an educator. I knew at a young age that my passion was helping and serving others. Growing up I had a strong interest in music, science, reading, math, and art. Early on, I learned how important it was to develop a well-rounded education. I graduated with a degree in Graphic Design and after working for several years in the field, I had the confidence to admit that it wasn't my passion and decided to pursue another dream of mine. I moved to Chicago with no idea what kind of adventure I was about to embark on. There, I worked as a Manager in food service at two local start-up companies. My time spent in Chicago was eye-opening. While I was there, I learned a lot about myself; I also learned a lot about diversity, inequality, and privilege. I recognized that I was missing an opportunity to make a difference in the lives of others and needed to make a change and gained the confidence to try to seek a career that would allow me to serve others. After four life changing years in Chicago, I moved back home to Texas. I am happy and fulfilled to be a part of a program that focuses on education and mentorship of young girls!

Thank you for joining us while we encourage girls to be confident and courageous while exploring and learning new skills in science, technology, engineering, and math while embracing individuality, creativity, and diversity!
