Dear Professor Spurrier,

I am writing to you on behalf of all South Australians who do not reside in close proximity to green open space and or are located in remote areas.

Could the Transition Committee immediately consider expanding the 2.5km exercise travel radius to 10km so people can exercise at our National Parks and nearby open space?

As you can appreciate, not everyone is fortunate enough to be located close to open space, parks and reserves, so I am asking the Transition Committee to please consider changing the current COVID-19 Directions to accommodate these groups of people.

Lockdowns have a dramatic impact on our community's mental health. The ability to be able to exercise outdoors around other people (social distanced) is essential for our well-being.

Thank you for formulating the Bubble Buddy and Intimate Partner arrangements to support those living on their own.

I appreciate your attention to this matter.

Yours sincerely
