Principles of the Saskatchewan Green Party

The principles of the Saskatchewan Green Party are aligned with the principles of the Global Greens. The preamble for each of the six major headings is shown below:

Ecological Wisdom

We acknowledge that human beings are part of the natural world and we respect the specific values of all forms of life, including non-human species.

We acknowledge the wisdom of the indigenous peoples of the world, as custodians of the land and its resources.

We acknowledge that human society depends on the ecological resources of the planet, and must ensure the integrity of ecosystems and preserve biodiversity and the resilience of life supporting systems.

Social Justice

We assert that the key to social justice is the equitable distribution of social and natural resources, both locally and globally, to meet basic human needs unconditionally, and to ensure that all citizens have full opportunities for personal and social development.

We declare that there is no social justice without environmental justice, and no environmental justice without social justice.

Participatory Democracy

We strive for a democracy in which all citizens have the right to express their views, and are able to directly participate in the environmental, economic, social and political decisions which affect their lives; so that power and responsibility are concentrated in local and regional communities, and devolved only where essential to higher tiers of governance.

Nonviolence

We declare our commitment to nonviolence and strive for a culture of peace and cooperation between states, inside societies and between individuals, as the basis of global security.

We believe that security should not rest mainly on military strength but on cooperation, sound economic and social development, environmental safety, and respect for human rights.

Sustainability

We recognise the limited scope for the material expansion of human society within the biosphere, and the need to maintain biodiversity through sustainable use of renewable resources and responsible use of non-renewable resources.

We believe that to achieve sustainability, and in order to provide for the needs of present and future generations within the finite resources of the earth, continuing growth in global consumption, population and material inequity must be halted and reversed.

We recognise that sustainability will not be possible as long as poverty persists.

Respect for Diversity

We honour cultural, linguistic, ethnic, sexual, religious and spiritual diversity within the context of individual responsibility toward all beings.

We defend the right of all persons, without discrimination, to an environment supportive of their dignity, bodily health, and spiritual well-being

We promote the building of respectful, positive and responsible relationships across lines of division in the spirit of a multi-cultural society.
