

A weekly return commute by public transport from Forrestfield to Perth city takes over 8 hours each week, which amounts to an unpaid extra working day each week.

WIn a recent survey of public transport users, south-east region bus passengers reported the highest dissatisfaction rating (18%) of all users across Perth and also the highest dissatisfaction with their most recent journey (22%). The 'net promoter score' (the number of users who would recommend the service minus the number who wouldn't) dropped alarmingly in the past year from 50 to -8! The number of train journeys on the Armadale line declined a staggering 15%. The most common problems were with infrequency of service, crowding and security. *'Passenger Satisfaction Monitor 2016' Public Transport Authority*

Save Our Services has calculated travel times during peak morning and evening times based on the most common car and public transport routes and have summarised the information below.

Car routes from Forrestfield*

	Daily return	Weekly return	Annual return time**

*all return times based on estimated median travel times
**based on a 48 week working year

Bus Route 294 and Armadale line To/From the Perth CBD
Daily return journey: 1.85 hrs

Public transport costs:
Daily cost: \$ 7.82*
Weekly return journey: 9.25
Weekly cost: \$ 39.10*
*Applies the 15% add value discount fare.

Unfortunately, from 2013, the WA Government and other governments across Australia stopped collecting good peak road commute travel times for all capital cities. However, as the chart below shows for the years until then, the Perth peak time car commute speed got slower and slower.

These figures may differ from your experience - what's your travel story?
