Your Jandakot Electorate Jobs and Skills Report 2015

SAVE OUR SERVICES
.COM.AU

UNIONSWA
www.unionswa.com.au

In 2010 the Barnett Liberal-National Party Government began a program of public sector staff and funding cuts, as well as the sale of public assets and privatisation of services.

At the same time the population of WA was growing rapidly, housing affordability getting worse, and costs of living rising.

UnionsWA, with the support of public sector unions, has created the **Save Our Services** campaign to raise awareness about and address these issues.

Save Our Services is committed to a clearer, stronger role for the public sector, by ensuring that there are skilled and more secure jobs in the future. The need for investment in our people, services and infrastructure is very great.

A message from Meredith Hammat

Job security is a concern for many. Whether searching for that first job after finishing school, returning to work after parenting or looking for a new or exciting job - the state of our local job market and the opportunities for training are important.

This report provides a summary of key local job market data - which jobs and which industries are growing, and the typical costs for local courses by main study areas at TAFE.

The aim is to provide you with a summary of up-to-date information on our changing job market and demand for skills. A range of links and other useful resources are also provided for those who need more detail.

Western Australia has been very lucky in recent times. Record demand for our natural resources, particularly from China, provided a once-in-a-generation opportunity for growth and jobs. As China's economic growth has slowed, demand for our natural resources has eased and the mining boom is now coming to an end.

This boom and bust cycle means that for individuals and families there is a greater need to be aware of and respond to change. This report attempts to help with that.

In the same way, governments and communities need to decide what kind of economic future, job and skill opportunities we want in the future.

The mining boom meant more royalty revenue for the state government, but was this money spent on the right priorities? The state government has borrowed heavily and is now looking to privatisation, cutbacks and higher fees and charges to repay this debt.

Government has cut more than \$200 million from our schools, which has seen many programs cancelled or rolled back. Cuts to TAFE and training have seen some course fees increase by more than 500 per cent, and TAFE enrolments plummet.

Higher costs and labour shortages made it tough for non-mining businesses to survive during the recent boom, with many businesses unable to compete for resources, forced to close their doors. The WA economy has lost some of the diversity that is crucial for creating lasting jobs and opportunities into the future.

The result of this is rising unemployment, with young Western Australians affected the most.

As the peak union body, UnionsWA wants to make sure that working people have access to proper occupational health and safety standards and fair pay. The union movement believes jobs, especially skilled jobs, create opportunities for all and it remains at the core of what we do.

Save Our Services is a community campaign seeking to ensure we have better services for all and a public sector that can help to improve jobs and skills. We both provide community members with good information as well as opportunities to work together.

Meredith Hammat
Secretary, **UnionsWA**
Spokesperson, **Save Our Services**

Methodology

A range of sources have been drawn upon to construct this report.

For labour or workforce data the most commonly used source has been data from the Australian Bureau of Statistics (ABS). The ABS uses surveys to provide estimates. When using local or regional data the survey sample sizes are small and can vary from month to month and require qualification. To give greater confidence in the figures provided here, raw data has been analysed to generate 'trend' figures. That is, for example, for figures provided for October 2015 the number given is the average figure for the year to October, 2015 not the raw estimate for October alone.

The most recently available data at the time of publication (November 2015) have been used. For Industry and Occupation estimates in Figures 1, 2 and 3, ABS data from August 2015 have been used. For employment and unemployment estimates presented in Figures 4, 5 and 6, the latest data used is for October 2015.

For Australian and WA employment data the ABS provides its own trend figures which have been used where available. Where the ABS does *not* provide trend figures, such as for regional employment data, we have used 12 month rolling average method to derive a 'trend'. Occasionally ABS trend figures are compared with our moving average figures, however where possible we have tried to compare like for like.

For labour force figures presented in Figures 1, 2 and 3 as well as Table 3, raw data are available [here](#), from the ABS 'Labour Force, Australia, Detailed, Quarterly, August 2015 (Cat. 6291.0.55.003)' were used.

The raw ABS data used for Australian industry was sourced from 'Table 04. Employed persons by Industry division of main job (ANZSIC) - Trend, Seasonally adjusted, and Original' and, for Australian Occupation data, 'Table 07. Employed persons by Occupation major group of main job (ANZSCO) and Sex', for WA industry 'Table 05. Employed persons by State, Territory and Industry division of main job (ANZSIC)' and 'Table 16. Labour force status for 15-24 year olds by State, Territory and Educational attendance (full-time)' have been used and WA occupation data I am using 'RQ2 - Employed persons by Labour market region (ASGS), Occupation major group (ANZSCO) and Sex, Annual averages of the preceding four quarters, Year to August 1999 onwards' was used for industry figures. For Regional industry data 'RQ1 - Employed persons by Industry division of main job (ANZSIC), Labour market region (ASGS) and Sex, Annual averages of the preceding four quarters, Year to August 1999 onwards' were used and for Regional Occupation data 'RQ2 - Employed persons by Labour market region (ASGS), Occupation major group (ANZSCO) and Sex, Annual averages of the preceding four quarters, Year to August 1999 onwards'

For data presented in Figures 4, 5 and 6 is drawn from ABS data for October 2015 was sourced from 'Table 8. Labour force status by Sex, Western Australia - Trend, Seasonally adjusted and Original' 6202.0 - Labour Force, Australia, Oct 2015, available [here](#).

For Regional employment data use was made of the ABS source 'RM1 - Labour force status by Age, Labour market region (ASGS) and Sex, October 1998 onwards' from 6291.0.55.001 - Labour Force, Australia, Detailed - Electronic Delivery, October 2015, available [here](#).

Figures regarding TAFE fees (Tables 1 and 2) are drawn from the publicly provided fee schedules for relevant TAFE Institutes in 2015 sourced from the relevant web sites. However, data used in Figures 7 and 8 compare average fees between 2013 and 2015. As the number courses often reduced significantly or changed over those years, only courses that were offered in both 2013 and 2015 are averaged for those tables. Source documents for these are available [here](#) and the calculations used from those are available upon request.

Figures provided for the reduction in funding for TAFE Institute in 2014 are sourced from Delivery and Performance Agreements Between the VET (WA) MINISTERIAL CORPORATION (Department of Training and Workforce Development) and relevant TAFE Institutions, including Central Institute of Technology, Polytechnic West, West Coast Institute and Challenger Institute provided in answers to questions on notice in the WA Parliament (see link [here](#).)

Figure 9 provides details of funding cuts for local High School cuts between 2013 and 2015. These figures and the methods used to calculate there are detailed [here](#).

Authors and Research

This report has been published by Save Our Services. Research contributions were made by Dr Tim Dymond, Philip O'Donoghue and Nadia Nelson. Data entry was quality assured through review by Roanna Beach. The report was written by Meredith Hammat, Philip O'Donoghue and Nadia Nelson.

Overview

This report provides details of the local job market and job training opportunities for those who live in the Jandakot area and surrounding suburbs and particularly in the Perth South West (SW) suburbs, including inner-Perth and extending to include Mandurah. Reports for WA as a whole and labour markets regions within metropolitan Perth are available [here](#).

Job prospects, and what individuals may do to improve these, vary depending on one's strengths. You may be eligible for support from employment services. The attitudes of employers can greatly affect who gets a job and who does not. Sometimes recruitment decisions are made unfairly or even unlawfully. It is important to know your rights. If you are treated unfairly it may benefit you and others in the future if you take steps to protect your rights.

There are a number of resources online and elsewhere that can assist and many of these are detailed in the resources section at the end of this report.

Key information on levels of study, study areas and TAFE fees are also provided to give you an idea of job training options. The closest TAFE institute is the Challenger TAFE group. Although further away, figures for the Central Institute of Technology with campuses near the city are also provided, in part because it presents a further range of study areas. Some figures are also provided for high schools in the area.

How to use this report

One document can't meet the information needs about jobs and skills for everyone. However, anyone seeking work or thinking about training will benefit from doing some homework. Here is a guide to what you may find most useful and where else further information may help more.

In the **Your Local Job Market** section:

- There's an overview of which industries and occupations are growing or otherwise across the South West Perth suburbs. This will be of most interests to those who have not yet committed to work in a particular industry or occupation.
- Unemployment and youth unemployment data is also provided. This gives a sense of how competitive the job market is at present.
- Overall this data can give you an indication of whether or not your search for work might extend beyond your local labour market or if further training is likely to help.

Preparation might lead you to want more information or specific assistance. So the **Guide to Resources** at the end of this report includes a summary of and links to employment and career guidance services, as well as links to agencies that can help if you believe you have been treated unfairly at work or in your search for work.

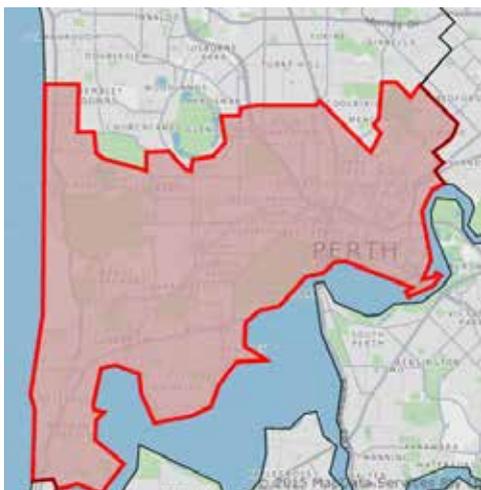

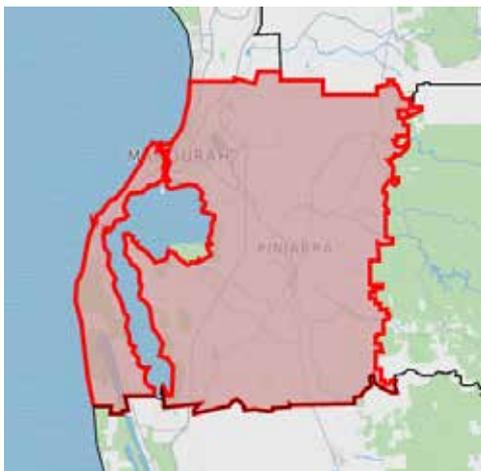

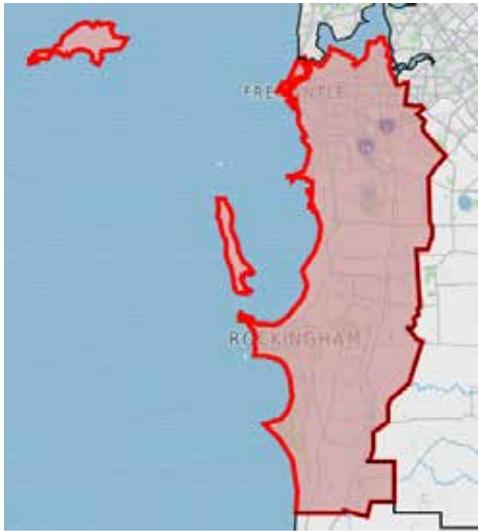

In **Local Opportunities for Skills** section:

- Key information is provided about the average cost of TAFE course fees by level and type of study.
- This will be of most use if you have concluded that further study may help in a job market where skills are increasingly important.
- Typical costs for study are given, but these may vary according to specific courses needed.
- Recent increases for course fees are provided - many courses take a while to complete so you may need to plan to cover these as well as debt or future fee increases.

The **Guide to Resources** towards the end of this report includes a summary of and links to reports about the likelihood of completing courses and student satisfaction survey findings.

Your Local Job Market

The key data presented here is for SW Perth, includes the suburbs of inner-Perth, the coastal strip towards and including Mandurah. These are outlined in the three maps below.

Across this SW Perth suburban region there are 243,308 people in full time jobs and 109,383 in part time jobs in October 2015.

KEY FINDINGS

Professionals are the single largest category and the one that is growing. **Trades workers** (rising) and **managers** (steady) are also significant in terms of jobs, as are **clerical and administrative** jobs.

The largest employing industries in the region, and with significant growth, are the **health and social assistance** and **professional, scientific and technical services** industries.

Employment in other industries spread fairly evenly. There has been significant growth in the **accommodation and food**. **Retail** industry employment has fallen significantly.

Much more likely than WA as a whole to work in **health and social assistance** or **professional, scientific and technical services** industries.

The overall rate of **unemployment** in the South West of Perth is slightly lower than for WA as a whole while youth unemployment is equally high.

Figure 1 shows the number of people employed in key occupations in 2013 and 2015. Professionals are the single largest category and the one that is growing. Trades workers (rising) and managers (steady) are also significant in terms of jobs, as are clerical and administrative jobs in South West Perth. Smaller occupations include community and personal service work (rising), sales (small decline), driver and machine operator jobs, as well as those of labourers both of which are stable in number.

Figure 1: Occupations, SW Perth, 2013 & 2015

Figure 2 compares the proportion in occupations in SW Perth with WA for 2015. SW Perth has a significantly higher proportion of professionals and trades workers than the rest of WA, about the same proportion of managers, community and personal workers, driver/operators and labourers. There are relatively few employed in sales and clerical and administrative jobs.

Figure 2: Occupations, SW Perth & WA, 2015

Figure 3 shows the change in the number of jobs by industry for SW Perth over the past two years. The largest employing industries in the region, also with significant growth, are the health and social assistance and professional, scientific and technical services industries. Employment in other industries spread fairly evenly. There has been significant growth in accommodation and food industry employment. Employment in the construction industry has grown slightly. Retail industry employment has fallen significantly. Employment has only slightly declined in the education and training and mining industries.

Figure 3: Employment by seven largest industries, SW Perth, 2013 & 2015

Figure 4 compares employment in industries for SW Perth with WA as a whole. This gives an indication of those industries that are more or less important.

Compared with WA, people living in SW Perth are much more likely to work in health and social assistance or professional, scientific and technical services industries. Those in the SW Perth are slightly less likely to work in the construction or retail industries, but slightly more likely to work in the accommodation and food industry. Employment rates in the education and training and mining industries is the same as for WA as a whole.

Figure 4: Rate (%) employment by seven largest industries, SW Perth & WA, 2015

Unemployment can be used as an indicator of competition for jobs. In SW Perth there were 21,333 people unemployed in October 2015, representing 5.7% of all those who are in employment or seeking employment. Among those unemployed there are 6,525 aged between 15 and 24 years.

Figure 5 shows that over the past two years in the SW Perth suburban corridor overall unemployment and youth unemployment have risen sharply.

Figure 5: Rate (%) unemployment, total & youth (15-24), SW Perth, 2013 & 2015

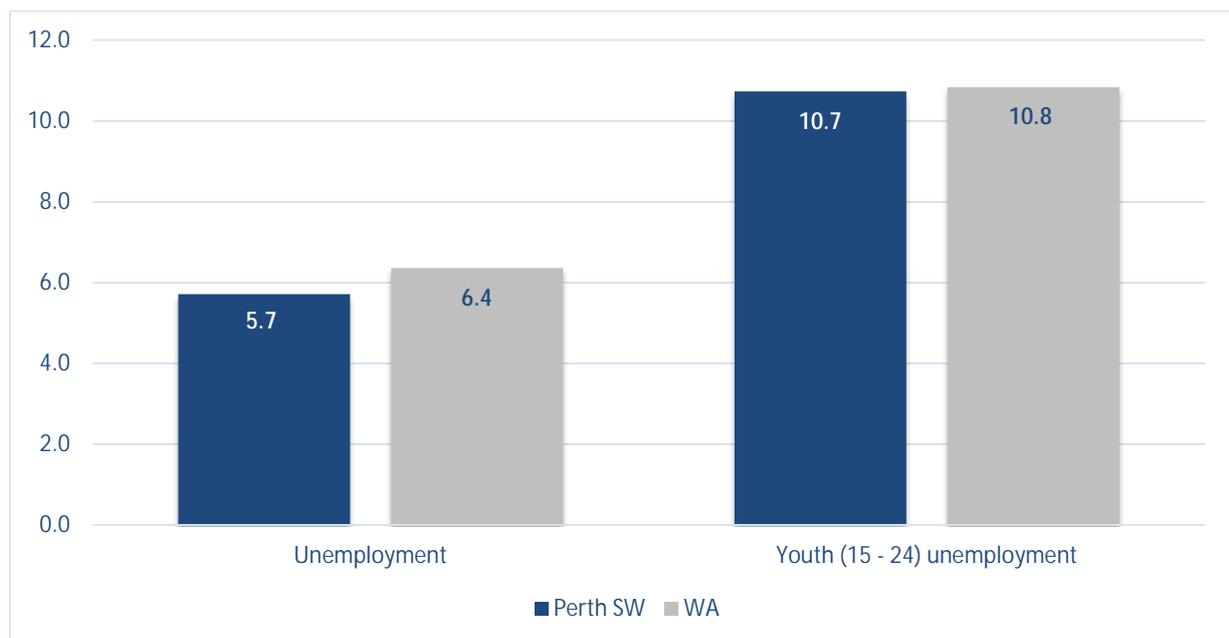

Figure 6 compares the rate of general unemployment and youth unemployment rate between the Perth South West and WA as a whole. The rate of unemployment in the South West of Perth is slightly lower than for WA as a whole while youth unemployment is equally high.

Figure 6: Rate (%) unemployment, total and youth (15-24), SW Perth & WA, 2015

Local Opportunities for Skills

Professional and skilled jobs are a large and growing part of the employment across SW Perth.

Challenger TAFE is the largest job training provider locally, with most campuses very near Jandakot and surrounding suburbs.

The cost of job training can affect individual and family decisions about training. **Table 1** presents a summary of average fee costs by level of study and area of study at Challenger TAFE in 2015.

Fees for Certificate II course generally range between \$1,600 to \$3,000 each.

Fees tend to increase with qualification levels and there is significant spread depending on the study areas.

At the Diploma level of study, average course fees begin to differ - from a low of around \$3,500 up to \$10,400.

Foundation studies are courses often taken in preparation for other more advance and certified studies. Certificates I-II provide basic vocational skills and knowledge. Certificates III-IV replace the previous system of trade certificates and provide advanced skills and knowledge. Courses at Diploma and Advanced Diploma level take between one to three years to complete, and are considered equivalent to one to two years of university degree level study.

Table 1: Average fees by qualification level & study area, Challenger Institute, 2015

Study area	Cert II	Cert III	Cert IV	Diploma	Advanced Diploma
Accommodation & Food Services	\$2,167	\$3,085	\$4,754	\$8,009	\$10,564
Administrative & Support Services	n/a	\$2,298	\$1,943	\$4,466	n/a
Agriculture, Forestry & Fishing	\$3,091	\$3,091	n/a	\$3,640	n/a
Arts & Recreation	\$2,917	\$3,487	\$3,032	n/a	n/a
Construction	\$1,718	\$3,161	\$2,946	\$4,200	n/a
Education & Training	\$1,682	\$3,564	n/a	\$10,415	n/a
Health & Social Services	n/a	\$2,786	\$3,406	\$7,853	n/a
Professional, Scientific & Technical Services	\$1,969	\$2,327	\$2,998	\$4,988	n/a
Retail Trade	\$2,227	\$3,952	\$3,453	n/a	n/a
Transport, Postal & Warehousing	n/a	\$2,816	n/a	\$7,567	\$6,174

Table 2 provides average fees by study area in 2015 for Central Institute of Technology. While Central Institute of Technology is further from Jandakot and surrounding suburbs, access by road or train is feasible for many and, taken together with Challenger Institute of Technology, a wider array of study areas and levels of study can be seen.

Table 2: Average fees by qualification level & study area, Central Institute, 2015

Study area	Cert III	Cert IV	Diploma	Advanced Diploma
Administrative & Support Services	\$2,755	n/a	\$4,653	\$4,383
Arts & Recreation	\$3,037	\$3,517	n/a	n/a
Construction		\$3,903	\$6,766	n/a
Education & Training	\$2,532	\$3,494	\$2,673	n/a
Health & Social Services	\$2,003	\$2,244	\$7,497	n/a
Information, Media & Telecommunications	\$2,831	\$3,907	\$6,558	n/a
Mining	\$5,058	n/a	n/a	n/a
Professional, Scientific & Technical Services	\$2,757	\$4,158	\$6,600	n/a
Retail Trade	n/a	\$4,617	\$3,720	n/a

TAFE training course fees have increased greatly in just the past few years. Further increases are certain, however fees for 2016 were not available at the time of this publication.

An indication of fee increases are provided for average fee increases at Challenger TAFE (Figure 7 for level of study and Table 3 for study area) and for Central Institute of Technology (Figure 8 and Table 4) between 2013 and 2015.

Figure 7: Average fees by qualification level, Challenger Institute, 2013 & 2015

Table 3: Average fees and percentage increases by study area, Challenger TAFE 2015

	2013	2015	% increase
Accommodation & Food Services	\$1,134	\$5,716	504%
Administrative & Support Services	\$957	\$2,902	303%
Agriculture, Forestry & Fishing	\$1,141	\$3,101	272%
Arts & Recreation	\$1,344	\$3,145	234%
Construction	\$972	\$3,006	309%
Education & Training	\$962	\$5,220	542%
Health & Social Services	\$1,212	\$4,682	386%
Professional, Scientific & Technical Services	\$846	\$3,907	462%
Retail Trade	\$843	\$3,210	381%
Transport, Postal & Warehousing	\$2,534	\$5,519	218%

Figure 8: Average fees by qualification level, Central Institute of Technology, 2013 & 2015

Table 4: Average fees and percentage increases by study area, Central Institute, 2013 & 2015

Study Area	2013	2015	% increase
Administrative & Support Services	\$1,017	\$3,930	386%
Arts & Recreation	\$772	\$3,277	425%
Construction	\$1,241	\$5,335	430%
Education & Training	\$621	\$2,900	467%
Health & Social Services	\$899	\$3,463	385%
Information, Media & Telecommunications	\$1,579	\$4,432	281%
Mining	\$1,241	\$5,058	408%
Professional, Scientific & Technical Services	\$1,287	\$3,784	294%
Retail Trade	\$931	\$4,169	448%

As can be seen TAFE course fees have risen sharply in recent years. At the same time the Federal Government has introduced a system of loans called VET FEE HELP (see link [here](#)).

It is important to note that these loans attract interest meaning the total cost of study will be higher if such a loan is taken.

Significantly, TAFE fee increases have also taken place as TAFE Institutes have had their funding cut by the WA Government. In 2014 Challenger Institute lost \$3.05 million and Central Institute of Technology had its funding from the WA Government cut by \$4.8 million.

Local high schools in electorate of Jandakot, Atwell College, Lakeland Senior High School and Leeming Senior High School have experienced real per student cuts in funding which are detailed in **Figure 9**. Full details of these are available [here](#).

Figure 9: Average real per student funding changes to Jandakot area high schools, 2013 & 2015

Next steps

The search for work and decisions about training are important, but rarely easy. This is especially so in a changing job market where there are more people seeking employment than there are opportunities.

Many decisions by individuals, businesses and government influence what and how many jobs are available.

As the resources boom has faded, jobs in WA have declined. Obviously this is largely the result of international market forces.

How governments ensure access to training and the skills in our community, the extent to which temporary overseas labour is used or the supports given to industry and on what terms, are matters that can shape the future of jobs in WA.

[Save Our Services](#) is a community campaign seeking to inform and involve West Australians in the decisions of government that affect our lives.

We don't claim to have all the answers. We do think that an active and strong public sector engaged in the task of building skills and jobs can and should be part of the solution to the economic challenges we face.

This is an invitation to you to join us in a community conversation about our future for skills and jobs by signing on to our campaign [here](#).
