

# PLASTIC-FREE IDEAS FOR YOUR NEXT EVENT

Many plastics used at parties end up in landfill or as litter. From there, they can easily travel through the stormwater drains into our beautiful beaches, harming marine life such as turtles and dolphins. Here are some reusable and recyclable ideas for your next event.

## 1 Decorations

Paper and fabric decorations are great alternatives to balloons. They're beautiful, reusable/recyclable and won't pollute our beaches.

## 2 Tableware

Reusable, wood and paper products are great alternatives to plastic plates and cutlery.

## 3 Tablecloths

Paper tablecloths are a great alternative that can be lots of fun too! Why not keep some crayons on the table and allow your guests to decorate it!

## 4 Goody bags

Make party bags even more fun with paper bags! Children can decorate them as they wish and best of all, they are environmentally friendly!

If you would still like to have balloons at your event, we ask that they are not used in outdoor areas and that they are attached to a weight so they don't fly away and end up in the ocean. Please take them home with you at the end of the party.
