Show your

for health care  
providers!

## ***STOP THE CUTS***

\_\_\_\_\_ Use your voice to ensure safe, \_\_\_\_\_  
quality, public health care

Saskatchewan's Health Care Providers are more than doctors and nurses. They're the people who do lab testing, sanitize surgical instruments, fix heating systems, cook meals, ensure secure, safe and clean health environments, examine X-rays, and provide hands-on care to people in need.

Providing health care is not an easy job - it takes compassion, skill, and persistence. Health Care Providers are working in a fast-paced environment while faced with unsafe staffing levels. Recruitment and retention challenges continue to grow. And now, the government is suggesting they take a **3.5% rollback**.

## ***HOW WILL THIS AFFECT YOUR COMMUNITY?***

If rollbacks are imposed, it will be even more difficult to keep our health care providers who currently provide care in an over-stressed work environment. It will negatively impact our ability to recruit.

Rollbacks not only impacts the provision of quality, timely care, it impacts the well-being of our families and our local economies. Local businesses will be affected by decreased spending due to cuts.
