

Our Taxi Industry Deserves Better

The Shooters Fishers and Farmers Party fully supports the Taxi Owners Small Business Association (TOSBA), and every other small business that has been gutted by this Government's bad decisions.

We believe that everyone in New South Wales – including small business owners and operators – deserve fair and equitable treatment.

The hard-working, law-abiding small business taxi owners and their drivers perform an important role in this State at all levels to our travelling public.

They have been unfairly treated and discriminated against through bureaucratic treachery as well as the inaction and total disregard of this Government. This has had disastrous financial, mental and physical consequences for taxi owners and their family members. They deserve fair compensation.

The New South Wales Taxi Council has lost all credibility as a legitimate representative of the taxi industry, given their inability to stand up to the Baird and Berejiklian Government's agenda.

Unlike other representatives, the Shooters Fishers and Farmers Party doesn't just pay lip service, we act on what we deliver.

The Shooters Fishers and Farmers Party is the political voice of TOSBA in the New South Wales Parliament. If we hold the balance of power after the next State election, we will demand immediate payment for compensation owed to taxi owners, drivers, and operators.

We will work with the Taxi Owners Small Business Association, and the family and friends of the industry, to put an end to the injustice and heartbreak caused by this Government's ill-informed attempt at reform.

Furthermore, we believe that TOSBA should be the only voice in the industry tasked with assessing hardship and compensation packages, as well as ensuring fair treatment across the industry.

Until justice for this industry is restored, the Shooters Fishers and Farmers Party will continue to advocate for fair compensation and will hold to account those in government and others who wrongly purport to represent the taxi industry.
