## **Young Growth Carpentry & Construction Workshop Application**

Application deadline: **July 1, 2013**

Submit by email to [info@sitkawild.org](mailto:info@sitkawild.org) or fax to: 907-747-6105 or drop off at Sitka Conservation Society office.

The Sitka Conservation Society (SCS) is offering scholarships for area high school and early college students to participate in a carpentry and construction workshop. The Workshop will take place from July 15 – August 15, 2013 at the Allen Auditorium. Participants will be paired with visiting Yale University students and work under the direction of local builder, Pete Weiland. This course is being sponsored by SCS through the Community Capacity and Land Stewardship (CCLS) program of the National Forest Foundation.

Applicants should have an interest in local and sustainable uses of Tongass wood products as well as an interest in applying the skills they learn locally. A number of basic procedures and techniques will be described and practiced.
