Councillor wants to look at bike subway 'revenue tools' later this year

Mayor pledges to support some Scarborough subway debates

Tory ready for the Scarborough Safe injection site debate lands at City urged to probe potential LED deal in other cities around the world, he added.

"The (costs for) services that lower-income families use have been going up, yet user fees for transit and recreational services have gone up. Councilors "just don't realize" there's a fairness gap in who has had to pay more over the years for city services.

They realized that when a city reaches a certain size — about 2 million, 2.5 million — you cannot rely just on the property tax," Forman stressed.

"They realized that when a city reaches a certain size — about 2 million, 2.5 million — you cannot rely just on the property tax," Forman stressed.

He said that he had heard from a number of residents about the problem.

The pair suggested that three taxes the city could impose within the next six months — including a parking levy of $1.50 per spot each day at malls and other locations — could bring in $535 million annually.
