

We call on all Australian political parties to commit to the necessary and achievable goal of **100% renewable power by 2030** and to adopt the following policies that will help get us there:

- Build big solar using national reverse auctions
- Create a national fair price for solar
- Fund community owned power
- Protect and expand the Clean Energy Finance Corporation (CEFC) and the Australian Renewable Energy Agency (ARENA)

First Name	Surname	Email	Phone	Postcode	Are you a solar owner? (Y/N)	Are you a solar worker? (Y/N)	Do you want to volunteer? (Y/N)

Thanks for signing our petition. We'll keep you up to date on the Vote 1 Solar campaign via email.
