To: Dan Scaysbrook &lt;dan@solarcitizens.org.au&gt;

Dear Dan

Our apologies for the delay in providing you with feedback on Solar Citizen's Federal Election 2016 Policy Priorities. Here it is:

*Will your party commit to a goal of 100% renewable power (electricity only) by 2030?*

The Nick Xenophon Team supports the solar-thermal plant at Port Augusta. We want to investigate feasibility of this goal, particularly with emerging battery storage technologies.

*Will your party commit to holding regular national clean energy reverse auctions from 2017?*

The Nick Xenophon team are supportive of investigating feasibility of reverse auctions.

*Will your party commit to establishing or coordinating a national feed-in tariff recognising the contribution solar households make to the grid?*

Yes.

*Will your party commit to establishing a federally funded Community Powerhouses program in the next term of government?*

Yes.

*Will your party commit to protecting and expanding the CEFC and ARENA?*

Yes.

Kind regards

Skye
