# Open Letter to Federal Politicians

**Australians want fair dinkum, clean and reliable renewable energy**.

We have some of the best solar and wind resources in the world, so making the switch to a 100% renewable Australia—and beyond!—is not only possible, it's a no-brainer.

This election, we are calling on *all* sides of politics to keep the renewables boom going by committing to:

1. **Mandate solar on all new homes;**
2. **A 5GW renewable storage target by 2025, including a rebate for 100,000 households to install batteries;**
3. **Solar for 500,000 renters.**
