

100% Renewable Energy

Annual Report 2012–2013

100% Renewable — who we are

100% Renewable is a community-initiated campaign working to move Australia towards a future powered entirely by clean, renewable energy.

Through a nationwide community organising program we empower local leaders to build community power, engage decision makers and win measures that boost the development of renewable energy in Australia.

Since our launch three years ago we have worked with over 100 community groups around the country and built a supporter base of nearly 20,000 people.

100% Renewable is non-partisan and has no affiliations with any political party.

2012–2013

In the 2012-2013 year the organisation's work was focussed on two primary areas - our ongoing campaign to see the Renewable Energy Target extended and expanded, and building a new national project to ensure the voices of Australia 2.5 million solar home owners are represented in major debates around the future of our energy system. We also continued to build skills of our local leaders through workshops and training, and supported other national campaigns on big solar and fossil fuel subsidies.

Letter from the Director

On a quiet day in April of this year, on a rooftop likely in a capital city outer suburb or a regional town, history was made. Largely unrecognised even by those participating in it, and under-reported in the mainstream media, it was a historic moment that represented a fundamental shift in the history of our energy generation.

This moment was the day that the millionth solar system was installed on an Australian rooftop. There is every chance that the system was on the roof of a retiree or young family, that they were low-middle income and quite possibly in Queensland where the number of solar homes has exploded to 300,000.

This moment represents a radical democratisation of our energy system, and one that is fundamentally challenging the dominance of the fossil fuel industry. Australians are literally taking back control of their energy generation, cutting their power bills and creating clean energy along the way.

That's why we were so excited to launch our new Solar Citizens project in May this year. Solar Citizens connects and gives voice to the 2.5 million people living in a solar home, and is working to counter the influence of the big power companies who are trying to stop the further rollout of solar across Australian rooftops. The project launched on Sunrise breakfast television, and has already had a number of early wins, most prominently forcing QLD Premier Campbell Newman to back down on a proposal to hit every QLD solar home with a new solar levy.

The launch of Solar Citizens followed on from a number of other big activities over the year. Summer Solar BBQs on the last weekend of summer saw hundreds of people visit solar homes to flip a snag and celebrate the solar success story. Colourful groups did salutes to the sun in front of MP offices, tossed around giant inflatable suns and fronted channel 9 news as part of a national 'Walk for Solar' day.

We continue to engage in the ongoing debate about the future of our Renewable Energy Target - conducting our own 'People's RET review' in parallel with the government review, and highlighting energy giant Origin's role in blocking renewable energy in Australia at their AGM.

2012-2013 also saw some major changes in staffing. We said some tearful goodbyes to Jen, Dean and Andrew who all made major contributions as volunteers (and our first ever staff) and have headed off to equally green pastures in other parts of the state, country or world! And we grew our team saying hello to new staff Taegen, Adrian, Geoff, Umme and Bec - bring their different backgrounds and experiences into our team.

I would like to take this opportunity to thanks those wonderful dedicated staff, as well of course to our trusty regional organisers - Janet, Sue C, Kirsten, Jamie, Jim, Sue M, Danae, Bernie, Karen and Philippa - and every person in local groups and the wider community who have taken part in this year's campaigns. Thanks also to all those who have contributed financially - whether large or small - and to all our friends and allies in working so hard to see a renewable powered future for Australia!

The global energy is revolution is well and truly underway at the moment, it's exciting to be along for the ride.

Yours for a renewable energy powered future,

A handwritten signature in black ink that reads "Lindsay Soutar". The signature is written in a cursive, flowing style.

Lindsay Soutar

across Australian
rooftops.”**

Campaign activities

Throughout the year the organisation engaged in a number of activities to advance key campaigns we are working on, namely - the fight for big solar and to Repower Port Augusta, the campaign to see the Renewable Energy Target extended and expanded, and the work to protect the future roll out of solar across Australian rooftops. We also contributed to other national campaigns organised by key allies.

The major tactics, activities and outcomes we organised or took part in are outlined below.

WALK FOR SOLAR

In August 2012 the AYCC and members of walked 325km from Port Augusta to Adelaide in a national Walk for Solar in support of Repowering Port Augusta with solar power. 100% Renewable organised SOLARdarity walks around the nation to make sure the message reached federal politicians and the public alike. Key outcomes included :

- 20 local SOLARdarity walks in a range of locations, including to Australia's highest point at Mt Kosciusko
- Over 700 people walkers
- Gatherings in the electorates of key ministers including Climate Minister Greg Combet, Health Minister Tanya Plibersek, Treasurer Wayne Swan, Energy Minister Martin Ferguson, Infrastructure Minister Anthony Albanese and Defence Minister Stephen Smith
- Each walk was lively and colourful with a range of activities including mini turbines in Adelaide, reflectives mirrors in Newcastle, inflatable suns in Cairns, and salutes to the sun in Marrickville
- The campaign to Repower Port Augusta continues today

ORIGIN AGM

Throughout 2012 the voice of energy giant Origin Energy was increasingly heard in the media arguing for a cut to the renewable energy target. Previously a big supporter of renewable energy Origin changed its tune following its massive investments in coal and gas plants.

100% Renewable teamed up with Sydney volunteers and Quit Coal to attend the AGM and deliver a clear message to shareholders, staff and the board, that the public wants Origin to 'build wind and solar, not coal and gas' and calling on them to change their position on the renewable energy target. This activity received national media coverage and a direct response from Origin chairman on the AGM floor.

PEOPLE'S RET REVIEW

In the second half of 2012 the independent Climate Change Authority conducted a review of the Renewable Energy Target. This was a legally mandated review and provided an opportunity for all the opponents of renewable energy to argue their case for a cut to the target. To ensure the Authority knew loud and clear that the public expected us to aim higher not go backwards 100% Renewable teamed up with the Australian Conservation Foundation to run a People's RET Review. This review saw:

- Over 5,000 people participated in an online review sharing their views on the future of the target
- The review found 93% want the 20% by 2020 target to be increased and that 91% of the 2480 customers of Origin Energy and Energy Australia who completed the survey would consider switching retailers to one that genuinely supported renewable energy.
- 10 volunteers handed out flyers outlining the results of the review at Climate Change Authority consultations in Sydney and Melbourne, reaching all of the participants in that process
- The activities contributed to a successful outcome with the final recommendation of the Authority indicating there should be no backward step on the target, as had been advocated by a number of influential energy companies

SUMMER SOLAR BBQ

Anyone walking around their local neighbourhood with their eyes open will have noticed the steady advance of solar onto local rooftops. But how many people realise the sheer size of the rooftop solar explosion across Australia? 100% Renewable set out to share the sizzling solar success story on the last weekend of Summer in February. We:

- Supported community volunteers to host a series of thirty Summer Solar BBQ events in suburbs and towns across the country. BBQs and get togethers were run in places as diverse as Rockhampton, Brisbane, Toowoomba, Dulwich Hill, Inverloch, and Bendigo.
- These events involved proud solar owners running tours of their solar installations, announced the number of solar homes in their areas and shared the 'Solar Era Dawns' graphic.
- Had at least two dozen politicians attend the BBQs or received certificates sharing data on the number of solar homes in their electorate
- Released an infographic sharing the news of the 1 million solar homes milestone being reached. This was shared 2596 times, and was seen by 467,649 people on facebook
- Released a new flyer with vital statistics about the solar revolution

END POLLUTER HANDOUTS

In the lead up to the Federal Budget in 2013 100% Renewable joined the alliance of groups coordinating the Paid to Pollute campaign calling for an end to fossil fuel subsidies. Key outcomes included:

- Coordinated actions at 10 Shell petrol stations around the country on May 3-4

taking the message that we should not be subsidising fossil fuels direct to Australian motorists.

- Approximately 40 community members took part in these actions, posing with huge signs next to price stands at the petrol stations. Photos from these actions were then shared on social media.
- The Paid to Pollute campaign had an impact with the Federal Government announcing cuts to some fossil fuel subsidies (changes to mining exploration deductions) amounting to \$1.1 billion over four years, in the 2013 Budget.

NEW ENGLAND ENERGY FUTURES

- In the key electorate of New England, we worked with two local organisers to develop the New England Energy Futures campaign, inspecting the future of energy production in New England and building on the community concern about renewables in the region.
- The campaign produced great connections with local groups and a great enthusiasm for solar, but it was sadly cut short because of Tony Windsor's decision not to stand for re-election.
- However, the two local organisers in New England are continuing to do work and build the campaign and their connections in the area.

ELECTION 2013

As at the beginning of July 2013, the 2013 Federal Election is dominating the political landscape. 100% Renewable will engage in the federal election space by working to demonstrate the popularity of renewable energy to sitting and incoming members of parliament, and encouraging voters to keep on renewable and solar in mind when going to the polling booths.

Already solar briefers highlighting the benefits of solar and the number of solar voters in each electorate have been produced, and we are currently adding profiles to an online solar scorecard which will demonstrate where each candidate stands on renewable energy.

Solar Briefers

- 157 briefers, one for every state, territory and electorate in the country have been produced.
- These detail the uptake of solar in the area, including the number of solar homes, savings on electricity bills, carbon emissions saved and much.
- The briefers are being mailed to all sitting politicians and newly elected politicians post the Federal Election to highlight the importance and rapid growth of solar in the area.

Solar Scorecard

- The Solar Scorecard profiled federal election candidates and their stances on key renewables issues, such as building big solar, funding community energy and others.
- In total, 653 candidates and politicians are featured on the site.
- All parties and politicians have been emailed asking them to take the solar survey
- In coming weeks these responses will be compiled, and the scorecard promoted in communities, particularly targeting key marginal electorates

ROOFTOP**

SOLAR CITIZENS

One of the key focuses this year was on the launch of Solar Citizens, our new community campaign fighting for the rights of solar owners and everyone who wants to go solar one day.

Solar Citizens officially launched in May of 2013 and has been actively working to grow our members and show the strength of solar in our communities. As of July 2013, just two months after launch, over 13,000 people had joined Solar Citizens. They were mainly activated through the campaigns noted below.

Stop Queensland solar discrimination:

- The Queensland Competition Authority's made a proposal to move solar power owners onto a different electricity charging system, thus costing them \$200 more each year than other electricity users.
- 4,207 concerned added their name to our "Stop Queensland Solar Discrimination" petition.
- Solar Citizens wrote to Campbell Newman and the Energy Minister asking for the logic behind penalising solar, which received a response from Newman and was released to the media.
- After an email call to action from Solar Citizens, 700 comments were added to a story in the Courier Mail which detailed Newman's intentions to penalise solar.
- Solar Citizens were also urged to contact their local politicians and Newman himself, resulting in numerous email and phone communications.
- To keep the issues alive and ensure Premier Campbell Newman knew he couldn't discriminate against solar, 181 Solar Citizens in Queensland donated to run a quarter page ad in the Courier Mail.
- The ad ran in the mid-page spread on the "State of Origin" in the Courier Mail, one of the newspaper's most read issues and spreads.
- Two days after the ad ran, Campbell Newman went on 4BC radio in Queensland to say "A deal is a deal... we will not fiddle with that. If they've qualified, if they're part of the scheme, they will get their 44 cents. The other commitment I make this afternoon is that we won't be imposing some special tax or levy on those people with a panel."

Save Solar Tasmania:

- This ongoing campaign is in conjunction with on the ground partners, Save Solar Tasmania.
- The campaign asked the Tasmanian State Government to legislate a fair price for solar before privatising electricity retailing.
- With Save Solar Tasmania, we provided a submission to the Government and media responses about the issue.
- Over 1,300 Tasmanian solar lovers signed the petition, and the Tasmanian Government backed down on the feed-in tariff in response to this strong petition and quick media response.

“Solar Citizens officially launched in May of 2013 and has been actively working to grow our members and show the strength of solar in our communities. As of July 2013, just two months after launch, over 13,000 people had joined Solar Citizens.”

Fair Price for ACT Solar:

- In conjunction with SolarShare Canberra, we launched a petition to ACT Government ministers asking them to ensure a fair price for ACT solar.

Industry Liason:

- Solar Citizens has worked hard to establish a strong working relationship with companies and organisations across the solar sector
- We have participated at the Solar Expo in Melbourne and in August will attend Clean Energy Week

TRAINING & MENTORING PROGRAM

100% Renewable continues to prioritise building the skills and confidence of the community volunteers we work with. Capacity development activities undertaken in 2012-13 included:

- Three tactics workshops, with approx 20 people at each, building skills in campaign strategy and tactic development
- Mentoring for 3 local leaders starting up new initiatives in their community - Dan Spencer and Lisa Lumsden from the Repower Port Augusta campaign, and Janet Dearden who started up a new Sunshine Coast Solar Citizens group
- Strategy workshops and intensive support for local organisers in the New England electorate
- Phone based media training with local leaders in key electorates
- Training and support provided for volunteers involved in all campaign tactics outlined above.

MEDIA AND SOCIAL MEDIA

The 100% campaign maintained regular presence in mainstream and social media, and the launch and work of Solar Citizens provided additional coverage of the campaign and work.

In total, over 50 media hits were achieved. This includes mainstream coverage in the print Australian Financial Review, West Australian and Brisbane Times, television coverage on Sunrise, online coverage in The Guardian and substantial radio coverage through 4BC, 6PR, ABC local radio and other commercial operators. Local media covered the release of the solar briefers, detailing the uptake of solar in that electorate. And industry outlets, such as RenewEconomy, Energy Matters and Climate Spectator, feature regular stories about Solar Citizens and 100% Renewable campaign activities.

The most substantial media coverage for this time period was received through the launch of Solar Citizens, the "Keep Queensland the Sunshine State" campaign and the release of the local briefers.

The campaign also maintained and grew its presence in social media throughout the year. The launch of Solar Citizens led to the creation of a Solar Citizens Facebook and Twitter pages, with the 100% Facebook community still growing alongside.

In total, 100% boasts over 7,400 Facebook followers. 100%'s most viral post, a photo of Abbott's letter to the CEFC telling them to stop their work, reached over 107,000 people and was shared over 5,000 times. The Solar Citizens social media is a slowly building community. Since the launch in May, over 2,400 solar owners and lovers have been a part of our Facebook community.

Snapshots of our community

JANET DEARDEN, REGIONAL ORGANISER, SUNSHINE COAST

"I installed solar on my house in Townsville four years ago. It was a big investment, but I did it because I wanted to do my part to help ensure a clean, sustainable future for all Australians. And, because of this investment, I didn't have to pay electricity bills anymore. What a massive win - no more electricity bills and the good feeling of knowing I'm helping reduce dirty carbon emissions!

When I moved to the Sunshine Coast last year, I was lucky to move into a house that already had panels on the rooftop. My average electricity bill is \$0 dollars. But, this is not just about me and my bills. I know many of my friends and family are struggling with ever increasing electricity costs, and I want to make sure every family in our community has the same benefits I do - the real rewards of reduced bills and helping to create a clean energy future. It's good for our entire community, and I want to help our Sunny Coast really harness the sunshine."

Janet's passion for solar is so great that it led to the formation of Sunshine Coast Solar Citizens - the first Solar Citizens group in the country!

STAFF

Lindsay Soutar, *National Director*

Lindsay was inspired to start the 100% Renewable campaign after a meeting with her local federal MP, Anthony 'Albo' Albanese in 2009. Albo challenged her to organise a movement such that "people on each street corner, wherever [he went] would be calling for him to do more." Lindsay decided to take up the challenge. Lindsay lives in Newtown, Sydney with her partner, a small patch of garden and a gorgeous gum tree out the back. In 2011 Lindsay was named the Environment Minister's Young Environmentalist of the Year.

Dean Brigfoot, *Community Organising Coordinator*

Dean lives in Castlemaine, and as well as working with 100% is an active member of the Mount Alexander Sustainability Group. He has three young boys, Ronan, Jack and Callum. Dean is part of this campaign because he thinks it's the right thing to do. "We are telling a positive story, a can do story, that gives hope for the future and links up people in community groups right across Australia. Dean finished up his role with 100% in March 2013.

Andrew Bray, *Communications Coordinator*

Andrew lives in Ballarat and is the Communications Coordinator for 100% Renewable and dad of three young kids – Emily, Rosie & Miles. A growing sense that Australia was not facing up to the carbon-constrained world we were helping create led him to put aside his work as a musician and computer programmer and take up environmental campaigning. Andrew worked with 100% from 2011, finishing his role in March 2013 to take up a position with the newly established Victorian Wind Alliance. We wish him well in that important work.

Jenny Curtis, *Organiser, Sydney*

Jenny is a mother of three primary aged children living in Sydney. Her love of the Australian bush, together with a rising concern for the state of the planet has led her to consider how individuals can be part of the solution. She became involved in community organising on climate change over 4 years ago and is an active member of "Climate Change Balmain-Rozelle". In 2012 she worked with the campaign in an organising role, contributing to the delivery of key campaign tactics. In 2013 after working with the organisation from the beginning she has taken a step back from the to have a well earned break hanging with the kids and taking on other paid work.

Taegen Edwards, *Community Organising Manager*

Taegen has spent the last few years working with Yarra Climate Action Now in Melbourne. She has been very involved in their recent work on developing a locally owned community solar farm, amongst many other Victorian based activities. Taegen will pick up Dean's mantle in keeping the grassroots community volunteer network we work with well integrated, informed, well trained and active.

Rebecca Garden, *Training and Development Manager*

Bec has spent the last ten years of her life working in unions and organising environments - including most recently as lead organiser on the Big Steps campaign, winning new pay for early childcare educators with United Voice. Bec works with Taegen to build our organising capacity and support more volunteer effort around the country.

Adrian Brown, *Organisational Development Manager*

Adrian will be drawing on his extensive experience in community sector fundraising roles to build on the existing resource base of the organisation. Passionate about renewable energy and tackling the world's tough problems, Adrian will bring his enthusiastic spirit, endless optimism, and willingness to take on a challenge to his new role.

Geoff Evans, Campaign Manager

Geoff has decades of experience working in social justice and environmental organisation roles and is looking forward to connecting with Solar Citizens across Australia, recruiting them to the online community, generating offline action and making sure the voice and interests of all Australia's current and future solar owners are well heard.

Umme Sarah Hoque, Communications & Media Manager

Umme Sarah has been working in communications and media for non-profits and NGOs for nearly ten years, spending the past few years fighting for social justice in the union movement. She is looking forward to building and strengthening communications and media for 100% and the many exciting campaigns and work that we're doing!

REGIONAL ORGANISERS

Kirsten Kennedy, Organiser - Brisbane

Kirsten is a Brisbane based climate campaigner working in a volunteer role with residents, schools and community groups to live more sustainably. As a founding member of the Pine Rivers Climate Action Network, Kirsten has been actively involved in community projects since 2007 to reduce carbon emissions at a local level.

Sue Cooke, Organiser - Brisbane

Sue is a health professional and mother of two twenty-somethings. David Suzuki inspired her to much study, and years of involvement in the 'healthy and sustainable schools' movement. Sue is a founding member of St Johns Wood Sustainability, a climate action and sustainability community group in an inner Brisbane suburb. Sue has recently begun teaching at university on the impacts of climate change on public health.

Jamie David, Organiser - Far North Queensland

Jamie is an English as a Second Language teacher who has also worked for many years as a musician and songwriter. He volunteers with the Cairns and Far North Environment Centre and Beyond Zero Emissions presenters group.

Jim Rees, Organiser - Regional Nsw South Wales

Jim is a Community Environment Educator, Sustainable Schools facilitator, Horticulture and Construction Skills Trainer. He lives in Wagga and joined the 100% Renewables team at the end of 2009. Jim has worked on sustainability issues for many years but joined 100% Renewable as it was the first real community organising he has seen on climate issues.

Karen Corr, Organiser - Central and Northern Victoria

Karen is a passionate environmentalist, social entrepreneur and mother of 2 beautiful little boys. Karen became involved with the 100% Renewables Campaign during her time as President of the Bendigo Sustainability Group. Karen has a background in environmental engineering and a passion for creating and implementing change through community initiatives. Her latest venture is creating a social enterprise called Make a Change which provides fun, skill sharing, creative programs for changemakers.

Philippa Rowland, Organiser - South Australia

Currently living in Adelaide, Philippa remains an Executive Officer of Clean Energy for Eternity (CEFE), a community group that has inspired practical community action on climate change across south eastern NSW and two Sydney suburbs. Her belief that transition to bring renewable energy up to scale requires major investment led Philippa to work on Australia's first community solar farm project for several years and she retains a keen interest in community owned solutions. In her previous life as an agricultural scientist, Philippa worked on sustainability and risk management for over twenty years, within both Federal government and community groups.

**Danae Bosler, Organiser – Melbourne**

Having worked as a researcher, educator and organiser in the union movement, Danae brings considerable experience to the role of regional organiser. She has volunteered for The Climate Project and Union Climate Connectors, and is currently doing postgraduate study at Melbourne University.

**Sue McKinnon, Organiser – Sydney**

Sue, also profiled below, is a member of the board and regional organiser for Sydney.

BOARD**Nicky Ison, Chair**

Nicky Ison has been involved in the 100% Renewable campaign since its inception and today contributes to the Campaign as the convener of the Steering Committee. Nicky works as a Research Consultant on climate change and energy at the Institute for Sustainable Futures at UTS Sydney. As a co-director of the Community Power Agency she is also deeply passionate about empowering communities to take control of their own energy future through locally owned community renewable energy projects.

**Jo Lewis, Treasurer**

Jo is a retired small business owner and an Interior Designer and lives on the Far South Coast of New South Wales. She is on the board of the Sapphire Coast Producers Association — South East Producers executive, and a member of local environment group Clean Energy for Eternity.

**Jim Rees**

Jim is a Community Environment Educator, Sustainable Schools facilitator, Horticulture and Construction Skills Trainer. He lives in Wagga and joined the 100% Renewables team at the end of 2009. Jim has worked on sustainability issues for many years but joined 100% Renewable as it was the first real community organising he has seen on climate issues.

**Erland Howden**

Erland is a member of his local climate action group, Katoomba Area Climate Action Now in the Blue Mountains west of Sydney. They are coordinating a project to start a community-owned renewable energy project in the region. Professionally, Erland is a climate and energy campaigner with Greenpeace Australia Pacific, where he works mainly on the transition away from coal with a focus on outreach and community engagement. Previously, Erland worked as climate campaigner at the Nature Conservation Council of NSW, where he coordinated the popular Walk Against Warming event in 2006 and 2008.

**Mike Collins**

Mike is an active member of Climate Action Newcastle, and has been involved in various community-building projects in Newcastle. He has a particular interest in the application of appropriate renewable energy technologies in a community development context. Mike is a Mechanical Engineer working in Solar Thermal Energy research.

**Bec Wilson**

Rebecca Wilson is Director of Learning and Development at Change.org, where she leads on campaign innovation and learning for teams across 20 countries. Previously, Rebecca spent eight years as an advisor to the independent Lord Mayor of Sydney, Clover Moore, broken by a stints as Campaigns Director for GetUp in 2010, and for Obama for America in South Carolina and Ohio in 2008. When she left Clover's office in early 2012 she was Policy Manager.

**Sue McKinnon**

First connecting with the organisation after attending the Big Solar Bootcamp in February 2012, Sue McKinnon joined the board in early 2013. Sue brings her background in organisational finance and accounting - as well a common sense practicality and passion for empowering community action - to her role on the board. Sue lives in Sutherland Shire with her family, is active with the Sutherland Climate Action Network and is a proud solar panel owner.

Partners and supporters

100% Renewable is supported in our work by strong partnerships with peer organisations, contributions of time from hundreds of individuals and generous financial support coming from a broad range of individuals and foundations.

We would like to thank the McKinnon Foundation, Ann and Bruce McGregor, Brian and Diana Snape, the Diversicon Foundation, Mullum Trust, Bruce and Sue Cooke and Bill Meyers for donations they have made to the community campaign work of the last year.

The first edition of the Solar Briefers series was made possible with funding generously provided by the European Commission and one other generous donor.

The launch of Solar Citizens was made possible by contributions from the NGO sector and the solar industry. We would like to thank the Climate Collaboration, the Clean Energy Council, and the companies that provided start up financial support and assistance with recruitment to the Solar Citizens community. Many industry partners large and small have also helped us to get the word out about this new community for solar stakeholders. Thanks to all involved.

Special thanks also goes out to Nigel Morris of Solar Business Services, Warwick Johnston of Sunwiz and Andrew Richards of Pacific Hydro for their essential industry insights and contributions of time, energy and strategic advice, all of which were key to the successful launch of the Solar Citizens project.

Hundreds of individuals have made small contributions to help us do our work in this last year. From the dozens of monthly donors to others who have contributed to support specific campaign activities, each and every contribution is greatly appreciated. Every donation, no matter the size is greatly appreciated by the team here at 100% and we will always hold ourselves accountable to getting the most from every single dollar.

The 100% Community Campaign has been supported by many allied organisations - Australian Youth Climate Coalition, GetUp!, WWF, Australian Conservation Foundation, Greenpeace, Environment Victoria, Mount Alexander Sustainability Group, Ballarat Renewable Energy and Zero Emissions, Beyond Zero Emissions, Climate Action Network Australia, Centre for Australian Progress, Alternative Technology Association, Australian PV Association and Australian Solar Council. Whether it be in-kind contributions, strategic collaboration, partnership on specific events or other collaborations, 100% owes significant thanks to all of our partners.

Similarly, there are many who have contributed time and energy to 100% community organising in this last year. These community campaigns are strong because they are fuelled by the combined efforts of hundreds of individuals and dozens of community groups. We would like to recognise the efforts of every individual who was involved in the combined work of 100% organising across Australia during this last year. Whether it be one hour, one day or considerably greater contributions, our campaigns win because of these efforts. Thanks to all.
