

PSHB 1912

Sec 10 Solar Module Recycling Program

Requires the Department of Ecology to make recommendations to the Legislature prior to October 31, 2016 for a program for recycling and decommissioning of solar modules and financing such activities, including consideration of how such a program may be modeled on an existing state electronic product recycling program financed through participation in the Washington Materials Management and Financing Authority. Restricts incentive payments to those systems for which a manufacturer has registered with the Department of Ecology as a participant in the solar module recycling program. Requires Ecology to establish and implement a registration process by December 1, 2015.

PSHB 1048

Sec 11 Solar Module Recycling Program

The full-blown law that was injected into SB 5939.

ESSB 5939

Sec 12 Solar Module Recycling Program

In the end, this bill was a bargaining chip, but it passed. It didn't take long for the details and funding of the new incentive program to take up everyone's bandwidth though, and the implications of Section 12 were only grasped by some.
