

Solar Glossary for Kids

This fun glossary of solar terms will help build your understanding of solar energy and how it works!

Words to learn	Description	Image
Photons	Quantums of light; from the sun that hit the solar panel	
Electrons	Quantums of electricity; produced after sun's rays hit the solar panel	
Solar panel	Uses photons to make electricity	
Grid	Connected wires that carry electricity to everything	
"EV"	Vehicle that uses electricity for power	
Electric meter	Measures watts of electricity	
Battery	Stores electric energy to use later	
Silicon	An elemental material used in the making of solar panels	

Thanks to Solar Washington volunteer Craig Olson for his help in crafting this worksheet! Produced by Solar Washington. Visit Solar Washington at www.solarwa.org. Solar Washington is a 501c3 nonprofit organization which provides educational resources highlighting the benefits and uses of solar energy in Washington.
