

TRY A TEMPORARY TRANSPORTATION PROJECT: IDEA WORKSHOP

MARCH 8, 2-4PM

NOACA's newest program will help communities demonstrate how projects **could** look. This "infrastructure demonstration library" will include supplies such as paint, delineators, tape, cones and planter boxes to build "popup" infrastructure like separated bike lanes, traffic circles, pedestrian islands and more!

Does your community have a resurfacing project, a gap in your biking network, or a safety issue for bikes or pedestrians? Want to learn how this resource can help plan, engage the community, or get feedback?

Come to NOACA's **Idea Workshop** and hear how we can help you implement that plan, or get your community ready! Bring your team of planners, designers, engineers, community groups or school officials to the FREE workshop and we may choose YOUR community for a project this summer!

To attend, register at: noaca.eventbrite.com
