

RENEWABLE ENERGY at HOME

Advanced and Renewable Energy Works in Northeast Ohio. Energy use and production is one of the largest sources of carbon emissions in the U.S., as well as one of the most costly expenses for households. Participate in the actions below and [share your success story here!](#)

Purchase Renewable Energy through [community aggregation](#) if you're a First Energy Customer. The City of Cleveland's community aggregation program provides residential and small commercial CEI customers the opportunity to save money on their electric bills and to power their home with a percentage of renewable energy.

Purchase Solar for your home by joining [Solarize Cleveland](#) or a solar co-op. Solarize Cleveland provides an instant, free solar analysis of your home that shows how much you can save on your electric bill by going solar.
