

ENERGY EFFICIENCY at WORK

Energy efficiency is using less energy to provide the same level of energy service. Our workplaces represent a huge opportunity for us to take small steps to reduce our impacts on the environment. The following tips will help you become more energy efficient and also save your organization money. [Share your success story here!](#)

Schedule a Commercial Energy Audit and implement energy conservation measures.

Small Businesses, join the COSE Energy Choice Program. COSE members have access to [programs to maximize energy savings.](#)

Join the [Cleveland 2030 District](#), a collaborative working to create a groundbreaking high performance building district in downtown Cleveland and University Circle.

Purchase ENERGY STAR equipment. Buying [Energy Star Equipment](#) helps you save money without sacrificing performance
