## REPORT

To: Chairs, Joint Committee on Transportation  
Chair, House Committee on Ways and Means  
Chair, Senate Committee on Ways and Means  
House Clerk's Office  
Senate Clerk's Office

From: Beverly A. Scott, Ph. D, General Manager and Rail & Transit  
Administrator

Date: August 30, 2013

Subject: Report on MBTA Sponsorship Agreements  
(As required by Section 79 of Chapter 46 of the Acts of 2013)

---

Pursuant to section 79 of chapter 46 of the Acts of 2013 ("An Act Relative to Transportation Finance"), the following is a report on MBTA Sponsorship Agreements.

## **MBTA Sponsorship Program - Introduction**

The MBTA has a long history of success in seeking out corporate underwriting of key MBTA services and programs in order to alleviate the annual fiscal burdens placed on the state taxpayer and MBTA customer base to pay for such programs. Over the last several years, the MBTA has initiated sponsorships (or partnerships) to generate additional non-fare revenue, enhance customer experience, support new infrastructure, or for cost avoidance. As examples, the Authority entered into wallscape display licenses whereby advertisers would sell ads on prominent station or facility facades, while portraying a public transportation message. In 2004, the MBTA was faced with a Title VI requirement of installing several additional bus shelters in underserved communities. With this looming multi-million dollar capital expenditure, the Authority initiated a sponsorship program whereby a private vendor would manufacture, install, and maintain over 200 new shelters, all at no cost to the MBTA. This was possible through the placement of advertisements on the shelters.

Additionally, in 2007, the MBTA contracted with AT&T to install wifi service on all commuter rail coaches at no cost to the Authority. In exchange, AT&T was allowed to place decals of their corporate logo on the exterior of all commuter rail trains. Finally, efforts to link stations with corporate or institutional stakeholders in the region have been initiated including a significant contribution (\$15,000,000) from Mass General Hospital to fund a complete reconstruction of Charles Station. In 1997, Citizens Bank entered into a five-year contract with the MBTA relative to State Street Station. The MBTA currently views corporate sponsorship programs as valuable public-private partnerships that can generate limited amounts of non-fare revenue. It recognizes that such sponsorships are an emerging trend for transportation properties throughout the country. However, as the revenue portion of this report details, the MBTA holds a realistic expectation on the capacity of such sponsorship revenues to significantly impact and reduce the cost of core transportation infrastructure projects.

It should be noted that pursuant to section 127 of chapter 240 of the Acts of 1989, the MBTA reports annually to the Legislature on its efforts to maximize non-transportation revenues – revenue that does not result from state or local taxes, state or authority bonds, federal or state transportation assistance and fares. The MBTA has existing advertising contracts with Clear Channel & Titan which generate approximately \$15 million in annual revenues and those revenues are discussed within the aforementioned annual report. Thus, the primary scope of this report will be to discuss other revenue generating sponsorship agreements, partnerships and concepts that do not currently fall within the scope of our annual report.

**I. Historical Evolution of Revenue from Current Sponsorship Programs**

A 9-year look-back at the historical evolution of revenue from sponsorships yields the following:

	<u>Cemusa</u>	<u>Clear Channel</u>	<u>Van Wagner</u>	<u>Total</u>
FY06	\$ 16,333	NA	NA	\$ 16,333
FY07	\$ 77,742	NA	NA	\$ 77,742
FY08	\$ 292,276	NA	NA	\$ 292,276
FY09	\$ 345,944	\$ 100,200	\$1,181,000	\$ 1,627,144
FY10	\$ 413,985	\$ 100,200	\$ 795,000 <sup>(1)</sup>	\$ 1,309,185
FY11	\$ 426,927	\$ 65,100	\$ 795,000	\$ 1,287,027
FY12	\$ 463,208	\$ 65,100	\$ 795,000	\$ 1,323,308
FY13	\$ 253,362 <sup>(2)</sup>	NA	\$ 795,000	\$ 1,048,362
FY14*	\$ 250,000	NA	\$ 795,000	\$ 1,045,000
Shelters <sup>(3)</sup>	\$2,844,000	NA	NA	NA
<b>Total</b>	<b>\$5,383,777</b>	<b>\$ 330,600</b>	<b>\$ 5,156,000</b>	<b>\$10,870,377</b>

**\*Projected revenue for FY14**

(1) Due to a federal audit of outdoor advertising, Van Wagner was required to remove locations resulting in a decrease in revenue.

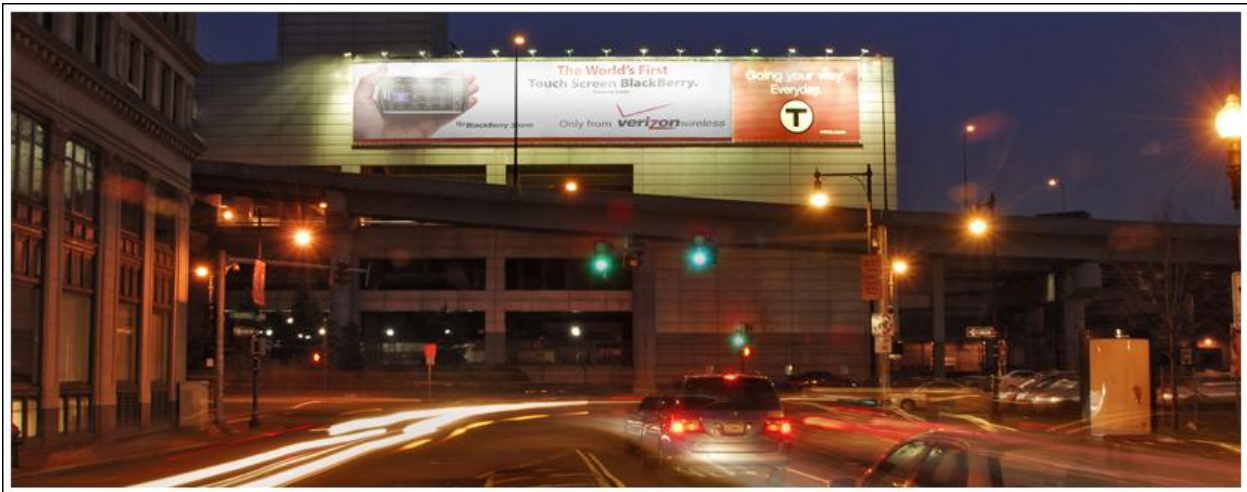

(2) The MBTA instituted a ban on the advertising of alcohol on MBTA property which resulted in a decrease of revenue.

(3) The value to the MBTA of the Cemusa shelter locations (237) valued at \$12,000 per shelter.

## II. Description of Current Sponsorships

### Wallscapes

The MBTA has entered into agreements to allow sponsorship wallscapes on authority owned property. Each wallscape shall consist of two messages. Approximately twenty-five percent (25%) of the space for a message promotes the use of public transportation in general or the MBTA site in particular; the remaining seventy-five percent (75%) may promote the Licensee's name, product and/or services, or be used for third-party advertising

The MBTA currently has a license (executed on September 1, 2008) with Van Wagner Communications to allow sponsorship wallscapes at three locations in Boston - the South Station Bus Terminal (pictured above), the Massachusetts Avenue Vent Shaft, and the Courthouse Silver Line Station. The agreement with Van Wagner runs through August, 2014 and will generate approximately \$795,000 in annual non-fare revenue to the MBTA.

Past sponsorship wallscape locations, under a license with Clear Channel (originally executed on September 1, 2008), included the Back Bay Station vent in Boston and Alewife Station in Cambridge. The agreement with Clear Channel for those locations previously generated from \$65,000 to \$100,200 annually and terminated in 2012.

As a result of the findings in a 2011 Federal Highway audit of outdoor advertising in the Commonwealth, the MBTA has an agreement with the MassDot Office of Outdoor Advertising (OOA) that upon expiration of the Van Wagner agreement (Aug, 2014), the wallscapes will become subject to all OOA permit requirements. If permits are not granted by the OOA, current and future revenues from wallscapes are at risk. Based upon the above referenced audit, the OOA considers wallscapes as outdoor advertising, notwithstanding any component of MBTA or

public transportation message. The MBTA will be closely monitoring the possible extension of OOA requirements to wallsapes due to the potential revenue implications involved.

### **III. Bus Shelters**

In November, 2004 the MBTA entered into a contract with CEMUSA who has provided 197 new bus shelters, with an additional 40 shelters planned to be constructed, to assist the MBTA in providing clean, accessible, weather proof shelters to its customers at no cost to the authority. The total construction and maintenance cost associated with the 237 shelters involved is approximately \$2.8 million (see revenue chart) – a cost that was fully avoided by the MBTA as a direct benefit of the CEMUSA contract. Bus shelter locations under this agreement are installed in Cambridge, Chelsea, Everett, Lynn, Boston, Brookline, Newton, Somerville, Waltham, Watertown, Quincy, Revere, and Salem (a complete list of the locations is attached in the report addendum). The contractor is responsible for cleaning and maintaining the shelters and pays a percentage of advertising revenues to the MBTA. The contract is through November, 2014 with two remaining five year options to extend. The contract currently generates approximately \$250,000 annually in revenue to the MBTA, in addition to the authority's aforementioned cost avoidance of building, cleaning and maintaining the bus shelters.

### **IV. Attempts to Increase and Promote Sponsorship Opportunities**

#### **Commuter Rail WiFi Sponsorship**

In 2013, the MBTA issued a Request for Proposals for the sponsorship of the Commuter Rail WiFi system. The current WiFi service on the commuter rail system is outdated and runs at a significant cost to the MBTA. The RFP sought proposers who would sponsor and provide high quality WiFi service to MBTA patrons throughout the commuter rail and ferry system and selected commuter rail stations at no cost to the MBTA or MBTA patrons. Benefits in this sponsorship program include signage on commuter rail trains (exterior wraps and interior plaques), stations, maps, and collateral material. In addition, there would be a link on the MBTA

website. The provider would also have access to the MBTA rights of way for its telecom\wireless purposes.

The MBTA received one proposal to the RFP which was considered non-responsive. The feedback from the telecom industry was that the infrastructure costs to implement the program made the project financially unfeasible. The MBTA is currently working with telecom providers to structure an RFP which allows an economically feasible program which may include upfront costs for infrastructure to the MBTA and premium service to allow streaming to the users.

## Brighton Landing Station

The MBTA is negotiating an agreement with the developers of the Boston Landing, a 1,450,000 square foot development anchored by the New Balance World Headquarters, for the design and construction of a new commuter rail station in the Brighton neighborhood of Boston. The developer has agreed to pay 100% of the design and construction costs, estimated to be between \$14 - \$16 million. The developer has also agreed to pay all maintenance costs associated with the station for an initial period of ten years. The new commuter rail station will allow the developer to mitigate traffic impacts and promote public transportation to project. The MBTA has agreed to provide daily commuter service to the station along with naming the new station “Brighton Landing”.

**Comprehensive Inventory of MBTA Bus Shelters Funded Through CEMUSA Agreement**
