RESEARCH NOTE 19

THE NON-COURSES REPORT 2007

The TaxPayers' Alliance has compiled Britain's first ever list of university "non-courses" – university degrees that lend the respectability of scholarly qualifications to non-academic subjects – and calculated their annual cost to students and taxpayers.

The huge expansion in student numbers in recent years, encouraged by the Government's 50 per cent higher education target, has resulted in a proliferation of different degree courses on offer. Unfortunately, a number of these new courses are of dubious academic merit, offering training better learned on-the-job. In the worst cases, they offer neither intellectual stimulation nor any improvement in employment prospects.

The cost of these "non-courses" falls on two groups: **students**, who are diverted from useful training and work experience by the lure of a degree; and **taxpayers**, who still pay for most of the cost of educating every student, despite university tuition fees.

The key findings of this report are:

- "Non-courses" are **costing taxpayers over £40 million a year**.
- If the £40 million cost of "non-courses" was spent on other undergraduates, it could cut their fees by **£104**, or pay for **a pint of beer a week for each student**.
- There are **401 "non-courses"** across Britain in the 2007-08 academic year.
- **89 different institutions** offer one or more "non-courses".
- The institution with the greatest number of "non-courses" on offer is the **University of Derby**, which offers **41 "non-courses"**.
- In our judgement, top of the list for "non-courses" is **"Outdoor Adventure with Philosophy"** at **Marjon College** in Plymouth.

Comment from the TaxPayers' Alliance

Peter Cuthbertson, author of the report, said:

"Political priorities have led to a never ending drive to increase the number of students in university. As a result, there has been a massive expansion of 'non-courses' of little or no academic merit. The Government has failed in its pledge to abolish 'Mickey Mouse' degrees. If 'non-courses' were abolished, all the other students could save over £100 on their tuition fees or buy an extra pint of beer a week."

Corin Taylor, Research Director at the TaxPayers' Alliance, said:

"Non-courses' are university degrees that lend the respectability of scholarly qualifications to non-academic subjects. They offer training better learned on-the-job and in the worst cases do not even provide intellectual stimulation or any improvement in employment prospects."

Further Details

The Appendix to this research note contains further details of the "non-courses". Three tables detail:

- The **top 25 "non-courses"** together with details of each one.
- The **full list of institutions**, and the number of "non-courses" per institution.
- The **full list of "non-courses"**.

The "Non-Courses"

In January 2003, the then Higher Education Minister Margaret Hodge acknowledged the problem of dubious university degrees and promised that what she dubbed "Mickey Mouse courses" would vanish once the government's proposed reforms were passed.¹ The reforms went ahead, but more than four years later, the TaxPayers' Alliance has found that many still exist.

Of some things it is best said that you know it when you see it. For most people, a "non-course" – a university degree that lends the respectability of scholarly qualifications to a non-academic subject – is one of those things.

¹ "Mickey Mouse' degrees to vanish", Liz Lightfoot, *The Daily Telegraph*, 14 January 2003, at <http://www.telegraph.co.uk/news/main.jhtml?xml=/news/2003/01/14/ndegre14.xml>

- On its web site, Marjon College in Plymouth describes its three year BA (Hons) degree in **"Outdoor Adventure with Philosophy"** with these words:

"Challenge & Risk are fundamental elements that provide us with Adventure. These challenges can be physical, emotional or intellectual (heart and hand and head). The power of the outdoors is that the adventure is holistic and greater than the sum of the parts. The aim of the programme is to develop in students a broad based knowledge and critical understanding of outdoor adventure. We aim to encourage an enthusiasm for outdoor learning. We aim to send people out who have knowledge, skills and ability to enter the industry if they chose to, people who will have developed a mix of technical skills, interpersonal skills and academic knowledge to underpin their work. These skills will be gained through an experiential learning approach to education, this includes; personal practical performance, fieldwork and placement opportunities. We hope to challenge, enthuse and motivate our students to want to explore more.....about themselves, about others, about learning through a framework of outdoor adventure."

"... This year concentrates on outdoor adventure processes at a personal level. Outdoor adventure is examined through its underpinning philosophy, historical antecedents, significant influences, environmental and sustainable aspects and current trends. You will also evaluate its role in personal and social development. Major students will also gain practical skills in land and water-based sports."

"... Modules include elements such as journeys, environmental management, creative outdoor study and spirituality."²

- The University of Glamorgan also offers a BSc (Hons) to those who wish to study **"Science: Fiction and Culture"**:

*"Science fiction revolutionised the 20th century as the genre that dealt with scientific and technological progress and their relation to human society and ambition. It influenced our visions, dreams and deeds in all areas of science, society and culture and few areas of academic study are able to boast the broadness of education that a study of science and SF allows... On this unique degree, you will gain an understanding of the nature and evolution of science, and its social, political and cultural context, through the study of complementary strands of science, science fiction and culture."*³

The screenshot shows the University of Glamorgan website. The main heading is "BSc [Hons] Science: Fiction and Culture". Below the heading is a navigation bar with tabs for "ABOUT", "CONTENT", "PROSPECTS", and "ADDITIONAL INFORMATION". The "ABOUT" tab is selected. The page content includes:

- Faculty: Faculty of Health, Sport and Science
- UCAS Code: FDQ2
- Course Length: Full-time - 3 Years, Part-time - 5 or 6 Years, Sandwich - 4 Years
- Entry Requirements:
- ACCOMMODATION FEES
- UCAS tariff: Overall points 200-240 from a minimum of two

- The Welsh College of Horticulture offers anyone with four Cs at GCSE level the chance to study **"Equestrian Psychology"**. Upon completion of this foundation course, students can "top up to a BSc (Hons)":

*"The programme investigates the unique partnership between horse and rider during husbandry, training and competition. It aims to develop an understanding of equine behaviour, rider psychology and their interdependence and it highlights the importance of equine welfare."*⁴

The screenshot shows the Welsh College of Horticulture website. The main heading is "Equestrian Psychology". Below the heading is a navigation bar with tabs for "Student Information", "Academic Areas", "College Information", "Innovation & Research", "Business Information", "College VLE - Moodle", and "College Intranet". The "College Information" tab is selected. The page content includes:

- The BHS Approved Equine Unit provides a range of excellent facilities including an Indoor School (80x30m), a floodlit Outdoor School (80x40m), Stables, Paddock's, Cross Country Course and the opportunity for hacking in the college grounds.
- Fifteen of the horses at the college are stabled within the unit and the remainder live out at grass. The horses at the College vary in standard to provide appropriate experience from novice rider to Stage IV. All equine staff hold British Horse Society qualifications and have considerable experience both working and competing in many branches of the equine industry.
- All students are encouraged to work towards appropriate BHS qualifications.
- The college facilities provide a venue for short courses, clinics and competitions run by both the College and outside organisations. The quality of the facilities means that top riders and trainers can be recruited to run clinics. Full and part time students together with the public are encouraged to participate in all events run on the college yard and to enrol on the diverse range of part time courses offered.
- Community and Leisure Courses offer a wide range of interesting courses for beginners and improvers. If you are seeking a hands on course with limited of the 'Focus' or Short Courses Brochure, or contact the Information Centre on 01352 841000.

The “non-courses” cited above are joined by 398 others on offer for study in the 2007-08 academic year, making a mockery of Margaret Hodge’s pledge. The table below shows the top five “non-courses”.

Table 1: The top five “non-courses”

Course title	Institution	Example Modules/Course Content
Outdoor Adventure with Philosophy	Marjon - The College of St Mark & St John	Journeys; Environmental management, Creative outdoor study; Spirituality
Science: Fiction and Culture	University of Glamorgan	“On this unique degree, you will gain an understanding of the nature and evolution of science, and its social, political and cultural context, through the study of complementary strands of science, science fiction and culture.”
Equestrian Psychology	Welsh College of Horticulture	Sports Psychology, Equine Behaviour, Equine Performance Development, Research Skills, Work Based Learning
Fashion Buying	The Manchester Metropolitan University	Fashion buying; Marketing management; Fashion theory; Computer-aided design; Data management systems; Business management
Golf Management	UHI Millennium Institute	“The course provides a high-quality qualification with a comprehensive understanding of the modern golf industry. Regular field trips to courses such as St Andrews and Carnoustie are a feature of the course.”

The Effect on Universities

Professor Alan Smithers, Head of Employment and Education Research at Liverpool University, describes the underlying justification for “non-courses” as “the idea that you can take anything and develop comparable types of mental skills to those you develop when studying traditional bodies of knowledge”.⁵ By offering “non-courses” and blurring the distinction between learning that demands serious scholarship and that which requires none, universities put at risk academic credibility.

One example of these dangers lies in the number of university degrees now available in medicines which no scientific testing has shown to be effective. **David Colquhoun**, Professor of Pharmacology at University College London, has strongly attacked universities for offering bachelor of science degrees in Homeopathy. Professor Colquhoun wrote in the prestigious journal *Nature* that “awarding BSc degrees in subjects that are not science at all, but are positive antisience” was “plain dishonest”.⁶ By definition, an ‘alternative’ therapy is a medicine that cannot demonstrate its effectiveness when tested scientifically –

⁵ ‘A BA in Beckham? It’s valid says professor’, *The Daily Telegraph*, 27 July 2003, at <http://www.telegraph.co.uk/news/main.jhtml?xml=/news/2003/07/27/ndeg27.xml>

⁶ ‘Faith based degree ‘damages science’’, Mark Henderson, *The Times*, 22 March 2007 at <http://www.timesonline.co.uk/tol/news/uk/science/article1550602.ece>

'alternative' medicines that scientific experiments show to be effective become simple, unprefixed 'medicine'.⁷ Colquhoun argues that if this test is not required for science degrees then "[t]hey might as well offer degrees in astrology".⁸

Nonetheless, 60 different degree courses are now offered in such courses as **Acupuncture, Complementary Therapies, Aromatherapy** and **Traditional Chinese Medicine**. Exam questions include: "Psorinum and Sulphur are Psoric remedies. Discuss the ways in which the symptoms of these remedies reflect their miasmatic nature."⁹

The Effect on Students

The proliferation of "non-courses" means that increasing numbers of A-level students are committing themselves at the age of 17 to spending thousands of pounds and three years of their life studying a subject that may raise their expectations of employment while leaving them no more employable than when they started. "Non-courses" are often attacked as a way for students to watch television for years at taxpayers' expense, but the students themselves may come to pay a heavy price, graduating with a five-figure sum of debt to pay back and a degree no employer values. The average student now graduates with over £13,000 of debt.¹⁰

Professor Smithers explains how "non-courses" undermine opportunity:

*"I come from a poor, working class background and I was privileged to be able to take the subject of my choice to its limits at university. If, as a first-generation student, I had been tempted by the publicity on to some sexy-sounding but vacuous course, I would have been cheated."*¹¹

The dropout rate at universities reflects the extent to which students come to recognise that continuing to study "non-courses" is a poor use of their time:

- In July 2007, the **National Audit Office** pointed to a 20 per cent dropout rate at British universities: one student in five starting a full-time course in September will fail to complete their studies.¹²

⁹ 'Alternative medicine degrees 'anti-scientific'', Roger Highfield, *The Daily Telegraph*, 22 March 2007, at <http://www.telegraph.co.uk/connected/main.jhtml?xml=/connected/2007/03/22/nhealth22.xml>

¹⁰ Table 3, *The Class of 2006, a lifebelt for the IPOD generation*, Reform, September 2006 <http://www.reform.co.uk/filestore/pdf/Class%20of%202006,%20Reform,%202006.pdf>

¹¹ 'A BA in Beckham? It's valid says professor', *The Daily Telegraph*, 27 July 2003, at <http://www.telegraph.co.uk/news/main.jhtml?xml=/news/2003/07/27/ndeg27.xml>

¹² '20% of new students dropping out, says report', Anthea Lipsett, *The Guardian*, 26 July 2007, at <http://education.guardian.co.uk/higher/news/story/0,,2134548,00.html>

- **Fourteen institutions** have been named and shamed by the **Higher Education Funding Council** for **dropout rates above 25 per cent**. Revealing, all are former polytechnics that offer high numbers of “non-courses”:
 - Anglia
 - Central Lancashire
 - East London
 - Glasgow Caledonian
 - Glamorgan
 - Greenwich
 - Huddersfield
 - London Guildhall
 - Luton
 - North London
 - Paisley
 - South Bank
 - Sunderland
 - Thames Valley¹³

- **Six more former polytechnics** were also identified for their **high dropout rates**, including:
 - Abertay Dundee
 - Liverpool John Moores
 - Staffordshire
 - Teesside
 - Westminster
 - Wolverhampton¹⁴

This hints at where so many of the problems arise: school leavers ill-suited to university are being lured into study at the new universities and are finding the work too challenging, or an unproductive use of their time.

The cost to the taxpayer of this dropout rate alone has been estimated at **£300 million each year** in subsidised loans and tuition fees.¹⁵

The Government's 50 per cent target

Government targets to ensure 50 per cent of school leavers go on to university appear to be exacerbating the problems of “non-courses”. One of Britain's most distinguished academics makes this link explicitly. **Michael Beloff**, the former President of Trinity College, Oxford, describes the 50 per cent target as “arbitrary” and warns of the “danger of dumbed-down degrees coinciding with a graduate glut”. The result would be “a scary vision of students from ‘bog-standard

¹³ ‘One in four university students ‘drops out’, *The Daily Telegraph*, 18 December 2002, at <http://www.telegraph.co.uk/education/main.jhtml?xml=/education/2002/12/18/tendrop18.xml>

¹⁴ Ibid

¹⁵ Ibid

comprehensives' proceeding to take 'Mickey Mouse degrees'".¹⁶ Employers' bodies such as the **Institute of Directors** have also dismissed as "ludicrous" claims that more graduates will solve business's problems of skill shortages. The shortages are in skilled craftspeople, not in BAs.¹⁷

Despite its professed efforts to end what it calls 'Mickey Mouse degrees', the Government is demanding universities increase admissions dramatically. Central government therefore shares responsibility for the proliferation of "non-courses", and their cost to taxpayers.

The Cost to Taxpayers

The Department for Education and Skills' most recent figure for public funding of the average full-time student is £5,790 a year.¹⁸

According to data supplied to the TaxPayers' Alliance by the Universities and Colleges Admissions Service, in the academic year ending in 2007, **2,539 students** were accepted onto the 401 "non-courses" we have identified.¹⁹ Accounting for the fact that most courses are three years (see Methodology), this means the direct cost of these 401 "non-courses" to taxpayers is more than forty million pounds per year:

£40,427,227.50

Spent on other students, this £40 million would:

- knock **£104 off tuition fees**²⁰, equivalent to **a pint of beer a week** for each student; or
- cover **three quarters of the costs (outside London) of books and equipment** for each student.²¹

Instead, as the numbers of students and "non-courses" increase, millions of pounds of taxpayers' money is funding hundreds of "non-courses". Taxpayers and students deserve better value for money.

Methodology

The work of identifying the number of “non-courses” and their cost began with looking thoroughly at lists of every course offered in Britain through the Universities and Colleges Admissions Service and checking details of their modules and content on individual university web sites.

In determining what courses qualify, we asked the following questions in all cases:

- Does the course require scholarship in areas that could reasonably be defined as academic?
- If the course imparts practical skills only, is there a good reason it should be learned in an academic environment, rather than on the job or as part of genuine vocational training?

These requirements were applied stringently, so as to avoid casting the net too wide. Agricultural qualifications and degrees as esoteric as Caribbean Studies all *failed* to meet our definition of “non-courses”.

Having identified 401 “non-courses” on offer at 89 institutions for the 2007-08 academic year, the Universities and Colleges Admissions Service (UCAS) supplied us with a figure of 2,539 students accepted on these courses in the preceding academic year,²² which we multiplied by the Department for Education and Skills’ most recent figure for average spending per full time higher education student (£5,790).²³ As most, but not all, of the courses are three years, we multiplied this figure by 2.75 to reach an annual total, which exceeds £40 million.

UCAS also publishes figures for the number of students accepted onto all courses. In the 2006-07 academic year, 390,890 students were accepted.²⁴ To obtain the £104 cost of “non-courses” per student studying courses other than “non-courses”, we simply divided the £40 million cost of “non-courses” with the number of students not studying “non-courses” (390,890 – 2,539).

APPENDIX: FULL TABLES

Table A1: The top 25 “non-courses”

Course Title	Institution	Example Modules/Course Content
Activity & Play Leadership	Swansea Institute of Higher Education	Sports Coaching and Fitness; Play Leadership; Sports and Outdoor Leadership
Advanced Practices in Beauty Therapy	Bradford College	"The programme develops specialist skills and leads to recognition by the International Federation of Professional Aromatherapists and the International Federation of Reflexologists."
Adventure Recreation	University of Bedfordshire	Adventure in Action; The Sporting Mind; Socio-cultural Analysis of Sport and Adventure Recreation; Expeditioning Studies; Critical Sociological Perspectives of Sport
Adventure Travel	University of Central Lancashire	"Your course of study includes tourism operations and management plus outdoor leadership and expedition planning. You will have plenty of opportunities to experience a variety of outdoor pursuits and will be encouraged to achieve additional outdoor activity qualifications."
Aromatherapy and Therapeutic Bodywork	University of Greenwich	Basic Skills for Complementary Therapy Practitioners; Managing the Therapeutic Relationship; Clinical Massage; Science and Art of Aromatherapy; Neurobiology and Genetics; Pathophysiology
Baking Technology Management	London South Bank University	The Technology and Design of Flour Confectionery; Advanced Bread Technology; Advanced Patisserie, Flour Confectionery and Chocolate Technology; Advanced Design and Technology of Sugarcraft; Bakery Design, Plant Layout and Flow Processes
Beauty Therapy	UHI Millennium Institute	"This course will give you all the skills you need to join the growing UK beauty industry as a qualified beauty therapist."
Commercial Floral Design	Myerscough College	Floral Art; Floristry Enterprise; Personal Planning and Career Development; Current Issues in Floral Art and Design; Dissertation

Course Title	Institution	Example Modules/Course Content
Cricket Coaching	East Lancashire Institute of Higher Education	"The course will develop knowledge of the coaching process and will provide skills and abilities, both in practical coaching modules and through relevant work experience during the two-year programme of study. The application of fitness testing and training principles will be an essential part of providing students with the confidence and expertise to be able to work with different groups of varying ages and motivations."
Culinary Arts and Adventure Tourism	University of Derby	"We offer regular guest demonstrations and table service training, wine courses, and a look at the anthropology of food. As well as practical training you'll study aspects of world cuisine, the history of food and the diversity of culinary arts."
Equestrian Psychology	Welsh College of Horticulture	Sports Psychology, Equine Behaviour, Equine Performance Development, Research Skills, Work Based Learning
Fashion Buying	The Manchester Metropolitan University	Fashion buying; Marketing management; Fashion theory; Computer-aided design; Data management systems; Business management
Floristry Design	Bishop Burton College	Advanced Innovative Floristry Design; Contextual Studies; Innovative Plant Design; Personal Effectiveness and IT; Visual Studies
Food and Drink Management	Askham Bryan College	"This vocational qualification will equip you with both the technical knowledge and workplace skills needed for a managerial career in the food industry."
Golf Management	UHI Millennium Institute	"The course provides a high-quality qualification with a comprehensive understanding of the modern golf industry. Regular field trips to courses such as St Andrews and Carnoustie are a feature of the course."
Lifestyle Management	Leeds Metropolitan University	"Corporate clients and busy professionals who have little time to deal with personal organisation or tasks, are increasingly turning to lifestyle managers to co-ordinate their life outside work. They look to these managers to provide a wide range of services such as organising events and parties, arranging property relocation, co-ordinating travel and holiday plans and providing concierge services. This course has been designed to equip you with the skills and knowledge to fulfil these roles."

Course Title	Institution	Example Modules/Course Content
Martial Arts and Adventure Tourism	University of Derby	"The martial arts industry is a dynamic section of the sports and recreational industry with participation at the same level as rugby. There's a growing need for people with recognised national governing body qualifications and we'll give you an understanding of the nature and background of martial arts, which will nurture your skills. You'll be introduced to concepts which are then explored and analysed and gain key transferable abilities, ideal for a range of roles."
Modelmaking	University College for the Creative Arts	"Your main studies will be enhanced with design, culture and theory units with digital model making a key element at all stages of the course. You will learn 2D digital drawing and image skills, which will lead to 3D digital models and animation. You will discover how traditional techniques interact with digital technology and the importance of new methods of manufacture using computer data."
Outdoor Adventure with Philosophy	Marjon - The College of St Mark & St John	Journeys; Environmental management, Creative outdoor study; Spirituality
Professional Practice – Hairdressing and Media	Blackpool and The Fylde College	"Modular based, the programme leads to one of four distinct qualifications that will allow students to become professional practitioners in any of the following areas: Hairdressing, Beauty Therapy, Complementary Therapy, Sports and Rehabilitation Therapy." "Throughout this programme you must demonstrate the ability to research and synthesize, conceptualise and analyse independently. You will have the chance therefore to examine, reflect and critically evaluate the various philosophies and concepts involved in your specialist area."
Science: Fiction and Culture	University of Glamorgan	"Science fiction revolutionised the 20th century as the genre that dealt with scientific and technological progress and their relation to human society and ambition. It influenced our visions, dreams and deeds in all areas of science, society and culture and few areas of academic study are able to boast the broadness of education that a study of science and SF allows... On this unique degree, you will gain an understanding of the nature and evolution of science, and its social, political and cultural context, through the study of complementary strands of science, science fiction and culture."

Course Title	Institution	Example Modules/Course Content
Specialist Make-up Design	University of Bedfordshire	Styling for the camera; Wig dressing and making; Cultural meanings of make-up; Business skills; Fashion show and research project
Stop-motion Animation and Puppet-Making	Staffordshire University	"The course aims to develop you as a creative Stop Motion Animator or Rigging Artist. This animation route offers the opportunity for you to specialize in modelling, animation and composite based applications in the creation of stop motion character film-making."
Visitor Attractions	Blackpool and The Fylde College	Visitor Attractions and the Tourism Environment; The Visitor Attractions Product; Visitor Attractions Resource Planning; Managing Visitor Attractions: Current Issues; Gaming and Visitor Entertainments; Dark Tourism and Visitor Attractions
Watersports and Adventure Activities Management	Swansea Institute of Higher Education	Coaching Adventure Activities; Sport in Society; Outdoor Activity Management; Use of Outdoor Resources

Table A2: The full list of 89 institutions offering “non-courses”

	Institution	No. of "non-courses"
1	University of Derby	41
2	Writtle College	17
3	Marjon – The College of St. Mark and St. John	15
