Attachment 2: Photo Document (Part 2: pages 16 to 30)

Photo 26. Upstream view from Hwy 16.

Photo 27. Upstream view to right bank; note line of foliar damage on westbound track above creek.

Photo 28. Upstream view to left bank: note defoliated red alder over creek on downstream side of rail bridge abutment, and damaged conifers on upstream side.
Photo 29. Upstream view to left bank: note defoliated red alder, and damaged cedar and shrubs beyond rail bridge.

Photo 30. View to upstream left bank: note extensive foliar damage, including on Western redcedar overhanging creek at some distance from rail bridge.
Photo 31. View to left bank, also showing vegetation on upstream right bank hanging over creek: note damaged foliage on Western redcedar on both sides.
