## Washington State correctional employees are our friends and neighbors.

We support our correctional employees because they protect us. But the fact is they haven't received a raise in 7 years. That's no way to treat our friends and neighbors. The legislature can do the right thing by funding the contract for correctional employees. That would not only support our neighbors that keep us safe, but it would also help local, small businesses thrive by pumping \$527 million into our state's economy. When we help each other we all benefit.

## Please thank these local, small businesses that support our correctional employees!
