

# 10 Reasons To Vote No

## **Two-Tier 22.4 Hybrid Drivers**

The deal lets UPS hire 22.4 Drivers to do the same work as package drivers, plus work weekends, for less money and no 9.5 rights. Teamsters will be trapped in these substandard jobs for years. All drivers' rights will be undermined by this giveback.

## **Harassment**

UPS will not pay any financial penalty if you win a harassment grievance. The only exception is for grievances that are decided at the national level. This can take years, and even then, UPS could pay no penalty when it's found guilty of harassment.

## **Excessive Overtime**

The 9.5 system is broken and this deal does not fix it. You still have to file a grievance and put a target on your back to get paid. The penalty is unchanged and UPS will not be forced to adjust your route. Instead of fixing 9.5, this contract lets UPS shift overtime to underpaid 22.4 drivers. That's no solution.

## **70-Hour Work Weeks**

UPS can impose 70-hour work weeks for package drivers during peak season. That's nuts.

## **40-Hour Guarantee Eliminated**

UPS can lay off drivers on Mondays if "no work is available" because of weekend deliveries.

## **Poverty Wages for Part-Timers**

Tens of thousands of part-timers will be stuck at or near the \$13 starting rate. Part-timers were promised a starting rate of \$15 and catch-up raises for current employees. This doesn't come close.

## **No Real Full-Time Jobs**

The only way for a part-timer to go full-time under this contract is to deliver ground packages on the weekend for substandard wages. There will be no new full-time combo jobs because a loophole lets UPS count 22.4 jobs toward the 5,000 jobs we were promised. This is a trick and a sellout.

## **More Subcontracting in Feeders**

This deal gives UPS the green light to unlimited subcontracting of all work they take off the rails in exchange for a promise by management to train more feeder drivers over the life of the contract.

## **Dishonesty & Technology**

UPS can still fire you for "dishonesty" based only on information from technology. Non-drivers lost their technology protections. They can now be fired based only on technology.

## **Say No to Givebacks**

UPS is making \$6 billion in profits. We should be winning improvements, not making givebacks.
