

Independent Audit of the Central States Fund

To: Trustees of the Central States Pension Fund, Susan Mauren (Retiree Advocate), and James Hoffa (IBT General President)

Executive Director Thomas Nyhan plans to submit a “rescue plan” for the Central States Pension Fund that will propose deep cuts to the pensions of 400,000 Teamsters and their families. We need a second opinion. Prior to the submission of any such plan to the Secretary of Treasury and other oversight bodies, we call for an immediate independent review of the Central States Fund by independent actuaries and pension experts that evaluates other alternatives and possible changes that may indicate other options to any proposed cuts. This independent audit shall be paid for by the Central States Fund.
